To the Trade:

It is with pleasure we present our fourth General Catalogue, which we trust will be useful as a book of reference and authority.

The same general plan and arrangement which proved so satisfactory in our previous editions has been followed in this issue, with changes made necessary by our increasing line. We have aimed to illustrate and describe the goods in a comprehensive manner, but in the smallest possible space. On lines having no standard manufacturers' lists, we have supplied prices which will give an idea of comparative values. We are constantly adding to and improving our assortment, and as new goods appear we shall issue supplementary circulars to keep our customers fully posted.

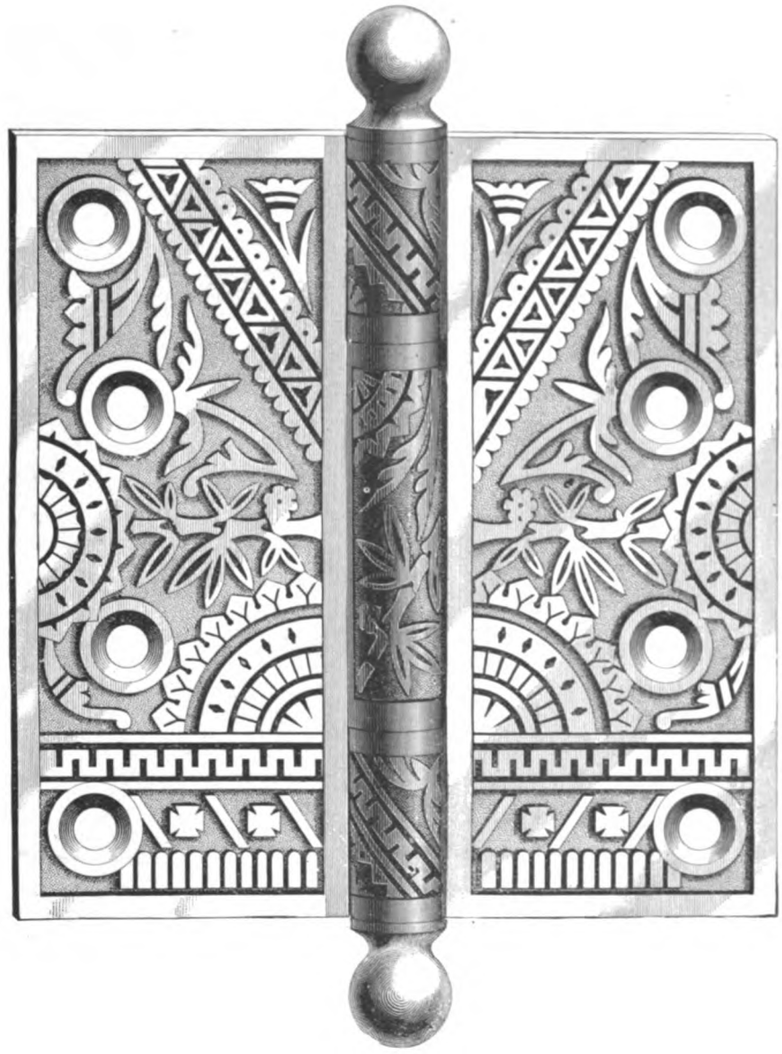

As values are constantly changing we issue no discount sheet, but shall take pleasure in quoting prices to dealers upon application.

Hibbard, Spencer, Bartlett & Co.

Chicago, September 15, 1891.

HALF DOZEN IN A BOX.

The circular shape of this tool enables it to work in smaller circles than other Shaves. The angle of the knife is such that it cuts instead of scraping the grain of the wood. Either handle can be removed to work in cramped places.

LARGER SIZES MADE TO ORDER.

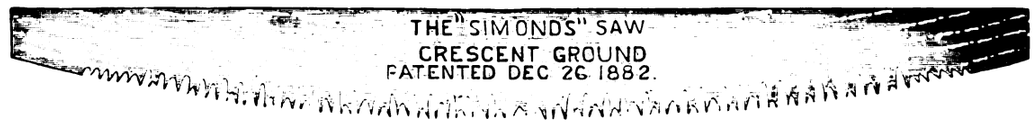

When ordering Saw Mandrels, send sketch and give distance from Saw to end of Mandrel if the pulley is between the bearings. If the pulley is on the end of Mandrel, give distance from Saw to inside edge of pulley. Also, whether the pulley is on the right or left-hand side of Mandrel when Saw is running toward you.

Our Mandrels are made with pulley on right-hand side, with left-hand thread, unless otherwise ordered.

Bailey's Adjustable Planes.

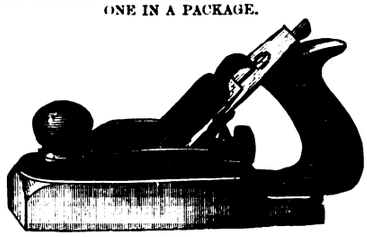

The above Sectional View of a Plane illustrates the new method of Adjusting a Plane Iron, sidewise, to set the cutting edge exactly square with the face of the Plane. A Lever located just under the Plane Iron, enables the workman to thus regulate his cutter. This Lever for sidewise adjustment, as above shown, is attached to all Bailey Iron Planes and Bailey Wood Planes, and to Block Planes, Nos. 16, 17, 18 and 19.

Stanley's Adjustable Planes.

Wood Planes.

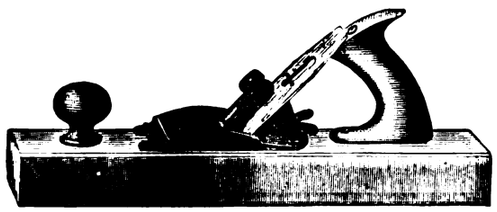

NO.	DESCRIPTION.	EACH.
122	Smooth, 8 inches in length, $1\frac{3}{4}$ inch Cutter,	$1 50

ONE IN A PACKAGE.

NO.	DESCRIPTION.	EACH.
135	Handle Smooth, 10 in. in length, $2\frac{1}{8}$ in. Cutter,	$2 00

ONE IN A PACKAGE.

NO.	DESCRIPTION.	EACH.
127	Jack, 15 inches in length, $2\frac{1}{8}$ inch Cutter,	$2 00
129	Fore, 20 inches in length, $2\frac{3}{8}$ inch Cutter,	2 25
132	Jointer, 26 inches in length, $2\frac{5}{8}$ inch Cutter,	2 50

These Planes are adjusted by a Lever, and are especially adapted for working on soft woods.

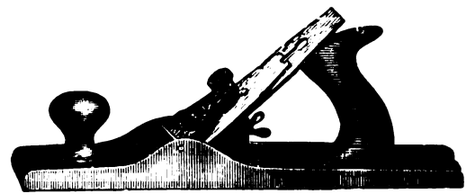

ONE IN A PACKAGE.

Wrought Steel Planes.

NO.	DESCRIPTION.	EACH.
104	Smooth, 9 inches in length, $2\frac{1}{8}$ inch Cutter,	$2 75

ONE IN A BOX.

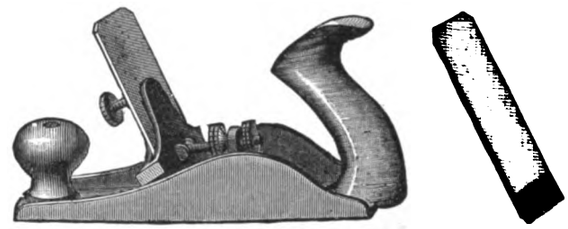

NO.	DESCRIPTION.	EACH.
105	Jack, 14 inches in length, $2\frac{1}{8}$ inch Cutter,	$3 50

Planes Nos. 104 and 105 have a wrought steel stock, and are adjusted by a Lever. They are commended for their lightness and the ease with which they can be worked.

ONE IN A BOX.

Adjustable Scraper Plane.

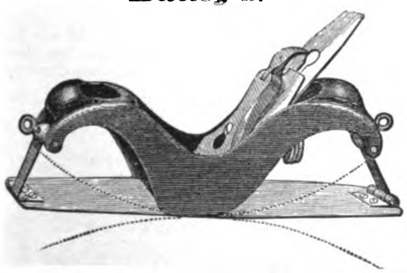

NO.	DESCRIPTION.	EACH.
112	Adjustable Scraper, 9 in. in length, 3 in. Cutter,	$3 00
	Cutters, for Veneer Scraping, - - - -	25
	Cutters, for Toothing, Nos. 22, 28, 32 (22, 28 or 32 teeth per inch,) - - - - -	35

This Tool, by its peculiar construction, can be used for scraping and finishing Veneers, Cabinet-work or Hard-woods in any form, or it can be used equally well as a Tooth Plane.

ONE IN A BOX.

Circular Planes.

Bailey's.

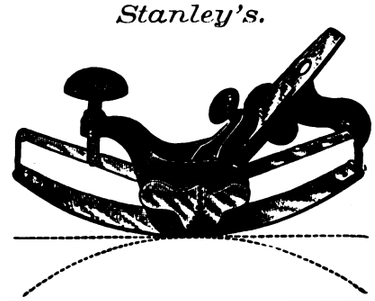

NO.	DESCRIPTION.	EACH.
13	Adjustable Circular, $1\frac{3}{4}$ inch Cutter, -	$4 00

This Plane has a flexible steel face, and by means of the thumb screw at each end of the stock, can be easily adapted to plane circular work—either concave or convex.

ONE IN A BOX.

Stanley's.

NO.	DESCRIPTION.	EACH.
113	Adjustable Circular, $1\frac{3}{4}$ inch Cutter, -	$4 00

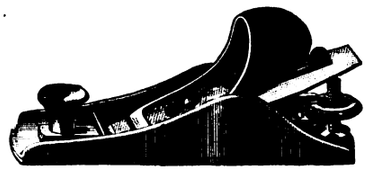

This Plane has a flexible steel face, which can be easily shaped to any required arc, either concave or convex, by turning the Knob on the front of the Plane.

Patent Adjustable Planes.

Stanley's Bull-Nose Plow, Filletster and Matching Plane.

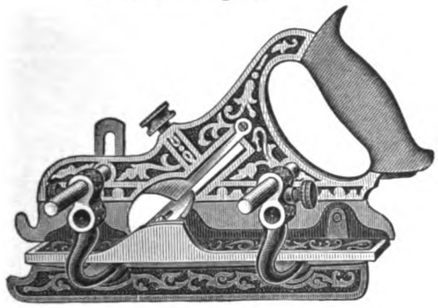

NO.	DESCRIPTION.	EACH.
141	Bull-nose Plow, Filletster and Matching Plane, Iron Stock and Fence, - -	$7 00
143	Bull-nose Plow and Matching Plane, Iron Stock and Fence, - - - - -	5 00

Two interchangeable front parts go with this Tool. The form shown above is that of a Bull-nose Plow; and the cutter will easily work up to, and into a ½ inch hole, or any larger size—as in Sash-fitting, Stair-work, etc. With the other front on, it takes the ordinary form of a Plow, and is adapted to all regular uses.

With each Tool eight Plow Bits, (1-8, 3-16, 1-4, 5-16, 3-8, 7-16, 1-2 and 5-8 inch,) a Filletster Cutter and a Slitting Blade, are furnished; also a Tonguing Tool (1-4 inch).

ONE IN A BOX.

Miller's Plow, Filletster and Matching Plane.

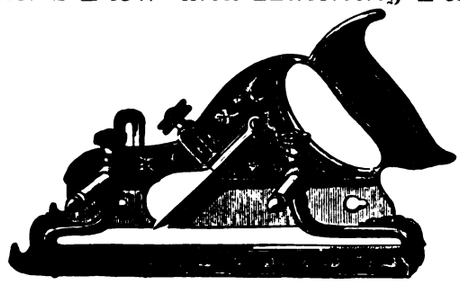

NO.	DESCRIPTION.	EACH.
41	Iron Stock and Fence, - - -	$ 9 00
42	Gun Metal Stock and Fence, - -	12 00

This Tool embraces the common Carpenter's Plow, an Adjustable Filletster and a Perfect Matching Plane. The entire assortment can be kept in a smaller space, or made more portable than an ordinary Carpenter's Plow.

With each Plow a Filletster Cutter and eight Bits (1-8, 3-16, 1-4, 5-16, 3-8, 7-16, 1-2 and 5-8 inch) are furnished; also a Tonguing Tool (1-4 inch), and by use of the latter, together with the 1-4 inch Plow Bit for grooving, a Perfect Matching Plane is made.

ONE IN A BOX.

Miller's Plow and Matching Plane.

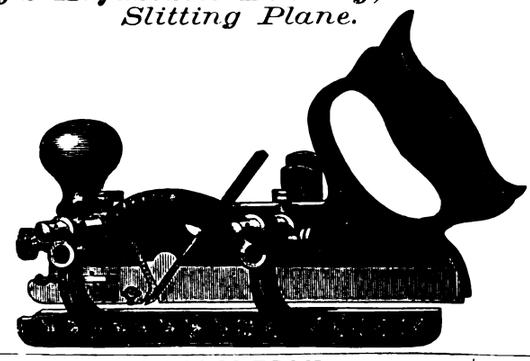

NO.	DESCRIPTION.	EACH.
43	Iron Stock and Fence, - - -	$ 7 00
44	Gun Metal Stock and Fence, - -	10 00

This Tool includes Bits same as No. 41, except the Filletster Cutter.

ONE IN A BOX.

Stanley's Adjustable Beading, Rabbet and Slitting Plane.

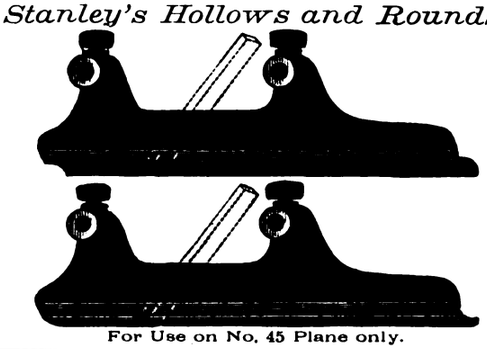

NO.	DESCRIPTION.	EACH.
45	Iron Stock and Fence, including Beading Tools, Bits, Slitting Tool, &c., - -	$8 00
5	Nosing Tool, 1¼ inch, - - -	1 00
2	Reeding Tools, 2 Beads, ⅛, 3/16 or ¼ inch,	20
3	Reeding Tools, 3 Beads, ⅛, 3/16 or ¼ inch, -	30
4	Reeding Tools, 4 Beads, ⅛, 3/16 or ¼ inch,	40
5	Reeding Tools, 5 Beads, ⅛, 3/16 or ¼ inch, -	50

This Plane embraces Beading and Center Beading Plane, Rabbet and Filletster, Dado, Plow, Matching Plane, and a Superior Splitting Plane.

Each Plane is accompanied by seven Beading Tools (1-8, 3-16, 1-4, 5-16, 3-8, 7-16 and 1-2 inch), nine Plow and Dado Bits (1-8, 3-16, 1-4, 5-16, 3-8, 7-16, 1-2, 5-8 and 7-8 inch), a Slitting Tool and a Tonguing Tool.

ONE IN A BOX.

Stanley's Hollows and Rounds.

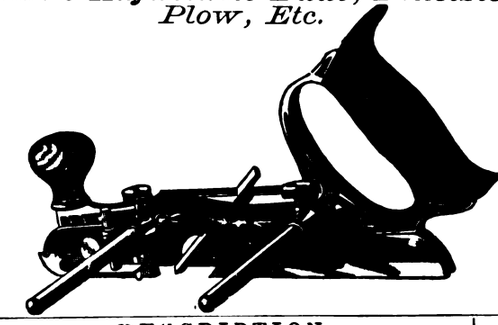

For Use on No. 45 Plane only.

NO.	DESCRIPTION.	PER PAIR.
6	½ inch Cutter, works ¾ inch Circle, - -	$1 40
8	⅝ inch Cutter, works 1 inch Circle, -	1 40
10	¾ inch Cutter, works 1¼ inch Circle, - -	1 40
12	1 inch Cutter, works 1½ inch Circle, -	1 40

ONE PAIR IN A BOX.

Traut's Adjustable Dado, Filletster, Plow, Etc.

NO.	DESCRIPTION.	EACH.
46	Adjustable Dado, Filletster, Plow, etc., including Plow and Dado Bits, Tonguing and Slitting Tools, Iron Stock and Fence,	$7 00
47	Adjustable Dado, including Bit, ⅜, ½, ⅝, ⅞ and 1¼ inch, Iron Stock and Fence, -	4 00

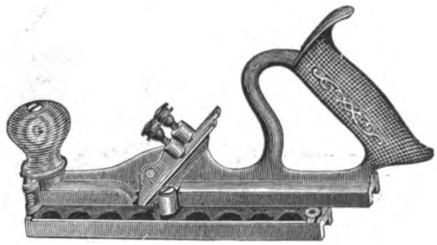

This Tool is accompanied by eight Plow and Dado Bits (3-16, 1-4, 5-16, 3-8, 1-2, 5-8, 7-8 and 1 1-4 inch), a Filletster Cutter, a Slitting Blade, and a Tonguing Tool. All, except the Slitting Blade, are secured in the main stock on a *skew*.

ONE IN A BOX.

Patent Adjustable Planes.

Stanley's Adjustable Tonguing and Grooving Plane.

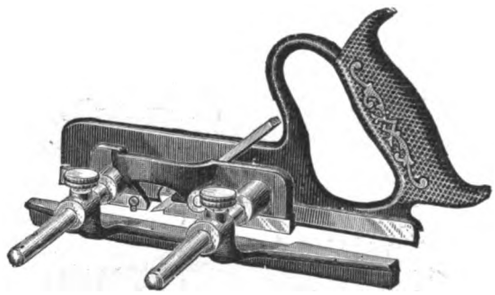

NO.	DESCRIPTION.	EACH.
48	Iron Stock and Fence, for $\frac{3}{8}$ to $1\frac{1}{4}$ in. boards,	$2 50
49	Iron Stock and Fence, for $\frac{3}{8}$ to $\frac{3}{4}$ in. boards, Including Tonguing and Grooving Tools.	2 50

These planes have two separate cutters, a suitable distance apart. When the guide, or fence, is set as shown above, both cutters work and a tongue can be made.

The fence is hung on a pivot, and can be swung around, end for end. This movement covers one of the cutters, and also furnishes a guide for grooving an exact match for the tongue.

ONE IN A BOX.

Stanley's Adjustable Beading Plane.

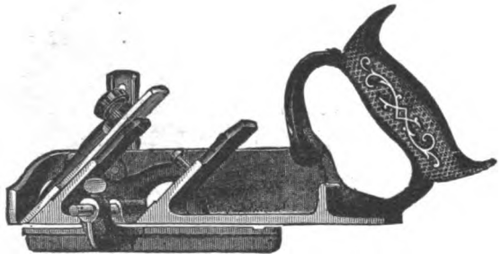

NO.	DESCRIPTION.	EACH.
50	Iron Stock and Fence, with $\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$ and $\frac{1}{2}$ in. Cast Steel Bits, - - -	$4 00

By adjustment of the fence, center beading can be done up to five inches from the edge of the board. Except for working across the grain, the spurs need not be used.

ONE IN A BOX.

Stanley's Duplex Rabbet and Filletster Plane.

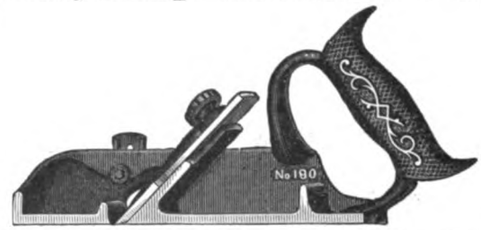

NO.	DESCRIPTION.	EACH.
78	Iron Stock and Fence, length $8\frac{1}{2}$ in., $1\frac{1}{2}$ in. Cutter,	$1 50

Remove the arm to which the fence is secured, and a Handled Rabbet Plane is had, and with two seats for the cutter, so that the tool can be used as a Bull-Nose Rabbet if required.

The arm to which the fence is secured can be screwed into either side of the stock, thus making a superior right or left hand Filletster with adjustable spur and depth gauge.

ONE IN A BOX.

Stanley's Improved Rabbet Plane.

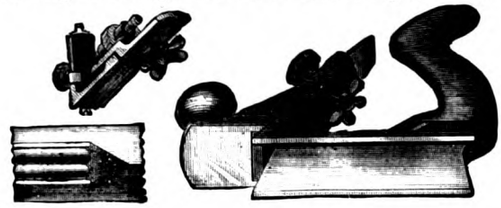

NO.	DESCRIPTION.	EACH.
180	Iron Stock, 8 in. in length, $1\frac{1}{2}$ in. wide, -	$1 00
181	Iron Stock, 8 in. in length, $1\frac{1}{4}$ in. wide, - -	1 00
182	Iron Stock, 8 in. in length, 1 in. wide, -	1 00
190	Iron Stock, 8 in. in length, $1\frac{1}{2}$ in. wide, with spur,	1 15
191	Iron Stock, 8 in. in length, $1\frac{1}{4}$ in. wide, with spur,	1 15
192	Iron Stock, 8 in. in length, 1 in. wide, with spur,	1 15

This Plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

ONE IN A BOX.

Stanley's Adjustable Chamfer Plane.

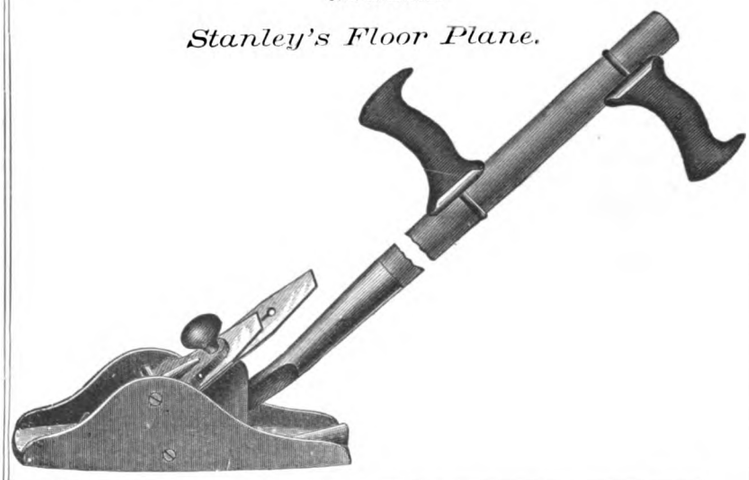

NO.	DESCRIPTION.	EACH.
72	Iron Stock, 9 in. in length, $1\frac{5}{8}$ in. Cutter, -	$2 00
$72\frac{1}{2}$	Same as No. 72, with Beading and Moulding Attachment, including 6 Cutters, - -	3 00

The front section of this Plane is movable up and down. It can be firmly secured to the rear section at any desired point by means of a Thumb-Screw. Without the use of any other tool, this Plane will do perfect chamfer or stop-chamfer work of all ordinary widths.

For Beading, Reeding or Moulding a chamfer, an additional section to this Plane is furnished with six cutters, sharpened at both ends, including a large variety of ornamental forms.

ONE IN A BOX.

Stanley's Floor Plane.

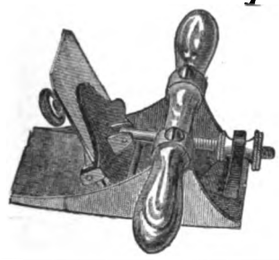

NO.	DESCRIPTION.	EACH.
74	Floor Plane, $10\frac{1}{2}$ in. in length, $2\frac{5}{8}$ in. Cutter,	$4 50

This tool will be found useful for planing Floors, Bowling Alleys, Skating Rinks, Decks of Vessels, etc. The construction of the Plane will enable the owner to do more work, and with less outlay of strength, than can be done with any other tool. The weight of the Plane is about 10 pounds, and the full length of the handle 45 inches.

ONE SET IN A BOX.

Bit and Square Levels.

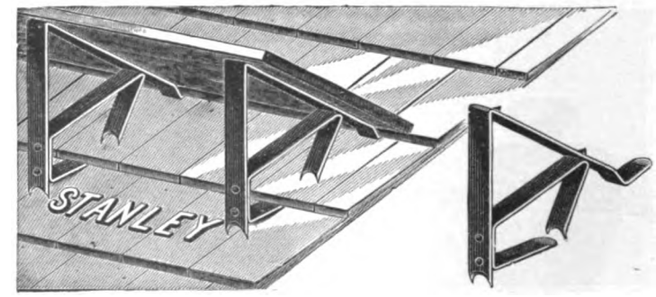

Half Size Cuts.

NO.	DESCRIPTION.	PER DOZEN.
44	Stanley's, Brass Frame, - -	$3 60

The frame of this Level has three pairs of V slots on its back edges. A thumb-screw secures the Level to the Bit; and boring can be done with perfect accuracy as to perpendicular, horizontal, or angle of forty-five degrees, by observing the bubble glass, while turning the bit. The frame can also be attached to a Carpenter's Square—two shoulders rest on the top of the horizontal leg to the square, thus making it an accurate Spirit-level; and the upright leg of the square will indicate an exact Plumb-line.

ONE IN A BOX.

Roofing Brackets.

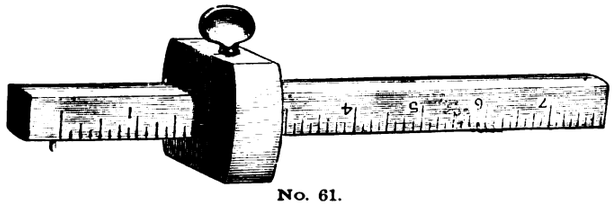

NO.	DESCRIPTION.	PER DOZEN.
1	Stanley's Roofing Brackets, 9 inch, -	$3 00

The parts are of spring-steel, and firmly reveted together. Push the beveled ends up under two layers of shingles already nailed down; the bracket will then have two separate bearings on the roof, and is so formed that any increase of pressure from above, increases its stability. Two steel spurs project above the horizontal surface of the bracket, to secure the staging boards. One dozen per minute can be placed in position, or removed; and great economy in lumber and nails will be found. There are no loose parts to get lost, and no nail holes in the roof. In constant use these brackets will last a life-time.

HALF DOZEN IN A BOX.

Face Plates for Gauges.

Stanley's Patent.

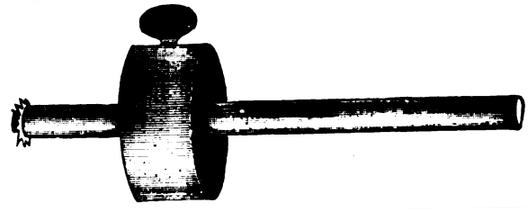

The Brass Face, with two ribs or projections, attached to one side of the Gauge-head (see cut), will enable the owner to run a gauge-line with perfect steadiness and accuracy arouud curves of any degree, and either concave or convex. The opposite side of the Gauge-head remains flat, and can be used for all ordinary work.

Any No. of Gauge with this valuable improvement included—may be ordered as Nos. 161, 162, etc., instead of Nos. 61, 62, etc.

We do not sell the Face Plates separate.

The extra cost to be added to the List Price, is $1.00 per doz.

Kinney's Patent Rotary Marking Gauges.

DESCRIPTION.	PER DOZ.
Kinney's Rotary Marking Gauges–Bright Steel Rod,	$5 00

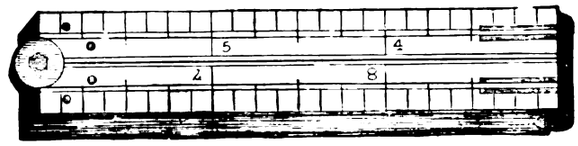

There is a Fine Toothed Marker on end of shaft which rotates, enabling it to step over the grain, consequently it cannot follow the grain of the timber. This Gauge is also useful in slitting thin stuff.

THREE DOZEN IN A BOX.

GENUINE BRONZE METAL

AND

ELECTRO BRONZED

HOUSE AND STORE TRIMMINGS.

The Following Pages (to and including page 265,) embrace our Entire Line of Electro Bronzed and Genuine Bronze Metal Builders' Hardware, which we have separated from other goods for convenience. The same goods will also be found under their Regular Classification.

DESCRIPTION OF FINISHES.

ELECTRO BRONZED IRON.—Electro Plated, with Black Background, designated by the letter **B** being placed before the number; commonly known as "Geneva" Finish.

ORNAMENTAL BRONZE METAL.—Polished Surfaces and Black Background, commonly known as **No. 3 Finish,** designated by the plain number without prefixed letter. Genuine Bronzed Goods with "Old Copper" Finish, also, take the plain numbers without prefixed letter.

PLAIN BRONZE METAL.—Light or Natural Color, Plain Polished Surfaces, designated by the letter **P** being placed before the number.

ONE DOZEN IN A BOX.

Deal's Combination Drawer Locks.

Full Size Cut of No. 250.

NO.	DESCRIPTION.	PER DOZEN.
250	2½ inch, Solid Bronze, Unlimited Changes,	$30 00

DIRECTIONS.—To Lock the Combination, pull the knob.

To Open the Combination.—first pull the knob, and then, releasing the knob, press in succession the Buttons corresponding to the figures on which it is set, holding down the last Button while the Knob is turned, and the Drawer or Door can then be opened.

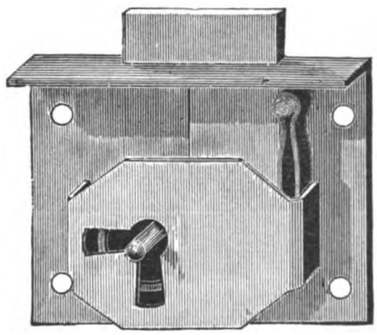

To Change the Combination—remove the two lower screws in back of Cap, pull the lock out in front by means of the Knob, take out little screw at edge of plate, which can then be turned round so that sleeves can be slipped out; take out the Combination sleeves (which are the ones round at end), and interchange with others so as to make any Combination desired—but Combination sleeve with spring in must always be last number of Combination. Replace screw—return lock to its place, taking care that flattened side is placed at bolt end of case; replace back screws.

Try Combination before closing drawer, so as to be sure that everything is all right.

Eureka Door Bells.

Full Size Cuts.

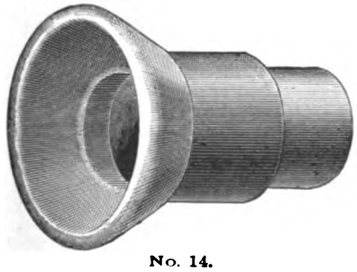

Continuous Stroke, Adjustable to Thickness of Wall.

NO.	DESCRIPTION.	PER DOZEN.
10	Polished Brass, with No. 3 Finish Bronze Metal Push Button, - - -	$30 00
11	Nickel Plated, with No. 3 Finish Bronze Metal Push Button, - -	33 00

Simple, solid, practical, as carefully made as a clock; can be applied to either door or casing; furnished with Push Button and Adjustable Extension Rod, making it possible to work the Bell through a thick wall. Has to be wound but two or three times a year for all ordinary use. Will ring continuously as long as the button is pressed. Can be easily attached, and will never fail for want of battery power as do the Electric Bells.

Spring and Blank Butts.

Chicago Double Acting.

Chicago Double Acting Blank.

Chicago Single Acting.

Garden City Double Acting.

Chicago Double Acting Spring Butts,

Size of Door,	⅞ to 1 in.	1⅛ to 1¼ in	1⅜ to 1½ in.	1¾ to 2 in.	2¼ to 2½ in.	2¾ to 3½ in.
No. 1, Japanned, Per Pair,	$1 20	1 50	2 50	4 00	7 00	10 00
No. 21, Nickel Plated, Per Pair,	3 00	3 75	5 50	7 50	10 00	14 00
No. 31, Bronze Plated, Per Pair,	3 00	3 75	5 50	7 50	10 00	14 00

When applied to the door, the Spring of this style is concealed when closed. The Spring has a purchase power in closing the door.

ONE PAIR IN A PACKAGE.

Chicago Double Acting Blank Butts.

Size of Door,	⅞ to 1 in.	1⅛ to 1¼ in	1⅜ to 1½ in.	1¾ to 2 in.	2¼ to 2½ in.	2¾ to 3½ in.
No. 3, Japanned, Per Pair,	$0 60	75	1 25	2 00	3 50	5 00
No. 23, Nickel Plated, Per Pair,	1 50	1 80	2 75	3 75	5 00	6 50
No. 33, Bronze Plated, Per Pair,	1 50	1 80	2 75	3 75	5 00	6 50

To economize for light doors, put a Spring Butt at the top and a Blank Butt at the bottom of the door. Never use a Blank on outside doors, as it takes the full power of two springs to hold door against the draft. Always put it below the Spring Butt.

THREE PAIRS IN A BOX.

Chicago Single Acting Spring Butts.

Size of Door,	¾ to 1⅛ in.	1¼ to 2 in.

One Quart Cans,	5 00

ONE PINT CANS, TWO DOZEN; QUART, ONE DOZEN IN A CASE.

Lubricating Oils.

Capitol Cylinder Oil.

DESCRIPTION.	PER GALLON.
This is an Oil of amber color, is very high fire test and lasting properties, which are not affected in any way by the heaviest steam pressure. It will prevent corrosion or gumming up of Cylinders, thus keeping them clean and in perfect condition, - - - - - -	$0 72

Model Cylinder Oil.

DESCRIPTION.	PER GALLON.
This is an Oil of similar properties to the Capitol Cylinder, but made more especially for smaller engines. The cost of this oil being less, we can name a very low price, - -	$0 66

Shield Cylinder Oil.

DESCRIPTION.	PER GALLON.
This is an Oil of similar properties to the Model Cylinder, but of lighter color. It is a cheaper grade than the Model, - - - - -	$0 56

Eldorado Engine Oil

DESCRIPTION.	PER GALLON.
A light colored Oil of exceedingly rich and heavy character, of extremely high fire test and low cold test. The nature of this oil is such that it will last longer than other oils, and as a lubricant is superior to animal oils in every respect, - - - - - - - - -	$0 42

Eldorado Castor Oil.

DESCRIPTION.	PER GALLON.
An Oil similar to the Eldorado Engine Oil, but is of a richer and heavier character, - -	$0 44

Peerless Machinery Oil.

DESCRIPTION.	PER GALLON.
This is an Oil of similar color and properties to Eldorado Engine, but made for lighter machinery. It has all the properties required for lubricating the lighter grades of machinery, the cost being less than that of Eldorado,	$0 40

IXL Engine Oil.

DESCRIPTION.	PER GALLON.
This is a Red Oil, and good for general use,	$0 44

Challenge Machine Oil.

DESCRIPTION.	PER GALLON.
A light-colored Oil made to supply the demands for cheaper grades of machinery oil. We recommend a better grade, as being cheaper in the end, - - - - - - - -	$0 38

Llama Wool Oil.

DESCRIPTION.	PER GALLON.
This Oil has had a very large sale, and is regarded by woolen manufacturers as being an excellent substitute for lard oil. It readily scours out clean, and does not stain goods of any description, - - - - - -	$0 40

Golden Machine Oil.

DESCRIPTION.	PER GALLON.
This is a light Amber-colored Oil, and is generally used far light-running machinery, -	$0 36

Zero Lubricating Oil.

DESCRIPTION.	PER GALLON.
A Black Oil, that will stand zero cold test, -	$0 30

All these oils are put up in fine shipping condition in barrels of about 50 gallons each. We do not break original packages except to send in half barrels at a cost of $1.00 per half barrel extra.

We recommend "Eldorado Engine" as desirable for the Hardware Trade. It takes the place of Lard Oil and is far better. Costs 25 per cent. less money.

Lawn Mowers.

Rowlett's Champion.

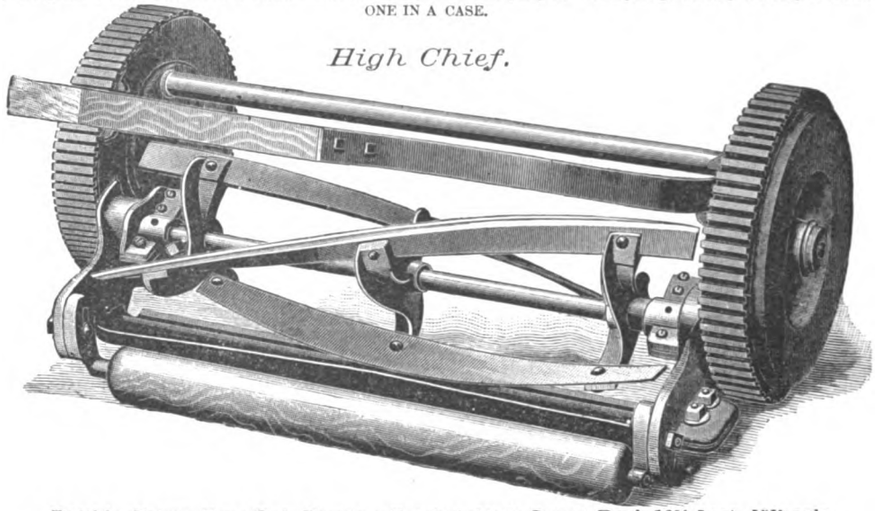

Double Drive, Rear Cut, Positive Ratchet, High Speed Reel, 8 Inch Wheels.

Cut, -	10	12	14	16	18	20 inch.
Each, - -	$13 00	15 00	17 00	19 00	21 00	23 00

Open Hearth Steel Blades, with Oil Temper; Steel Reel Shaft, Malleable Iron Arms, Steel Handle Arms, Fine Grade of Gray Iron, High Speed Reel, with Continuous Spiral Cut; Adjustable Reel Shaft Boxes, Simple and Substantial Adjustment of Cutting Bar, Shrubbery Guard Rod in front of Reel, Adjustable Roller and Swinging Handle. The Anti-Backing Ratchet is Noiseless and Positive, provided with Case-Hardened Steel Pawls. The Handle is provided with Steel Arms, so attached to the Mower as to admit of sufficient swing to enable the operator to cut over uneven ground and terraces, without making any change of attachment in the Handle. With the Guard in front of Reel, the grass can be cut from around shrubbery without scarifying it. No Springs of any description about the Mower.

ONE IN A CASE.

High Chief.

Double Drive, Rear Cut, Positive Ratchet, High Speed Reel, 10¼ Inch Wheels.

Cut, - - - - - - -	16	18	20	24
Each, - - - - - - -	$26 00	28 00	30 00	34 00

In the construction of this Mower, the same mechanical lines that Rowlett's Champion is built on are followed, increasing in size one-fourth throughout the Machine. The Traction Wheel is 10¼ inches in Diameter, the Reel 6½ inches in Diameter. First-class material only is used in the construction of this Mower. This Mower contains all the patented devices that is contained in the Rowlett's Champion.

ONE IN A CASE.

HIBBARD, SPENCER, BARTLETT & CO.

Philadelphia Lawn Mowers.

Style D.

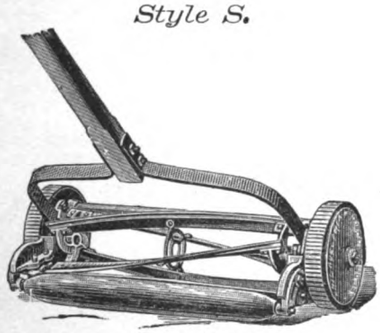

6½ inch Wheel.

Cut, - -	10	12	14 in.
Each, -	$13 00	15 00	17 00

Intended particularly for Grass Plots and Lawns of one-eighth of an acre. They are very light and easily worked. They have a three-bladed solid wiper that cannot spring.

ONE IN A CASE.

Style S.

7 inch Wheel.

Cut, - -	14	16	18 in.
Each, -	$17 00	19 00	21 00

This machine runs very quietly, and weighs much less than other Lawn Mowers. With the exception of the wiper it is practically the same as Style M, but has four spiral blades and a larger pinion. It has a little quicker clip, and this will make rather smoother work at a close cut.

ONE IN A CASE.

Style M.

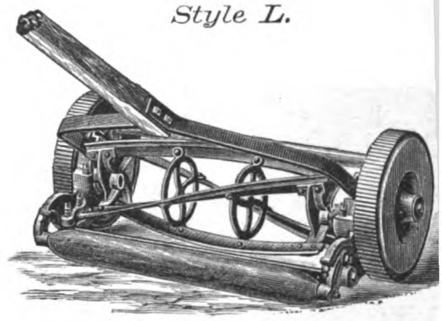

7 inch Wheel, Silent Ratchet.

Cut, - -	14	16	18
Each, -	$17 00	19 00	21 00

This style is used for general purposes, and is easy runnin will cut as high grass as any mower made.

ONE IN A CASE.

Style L.

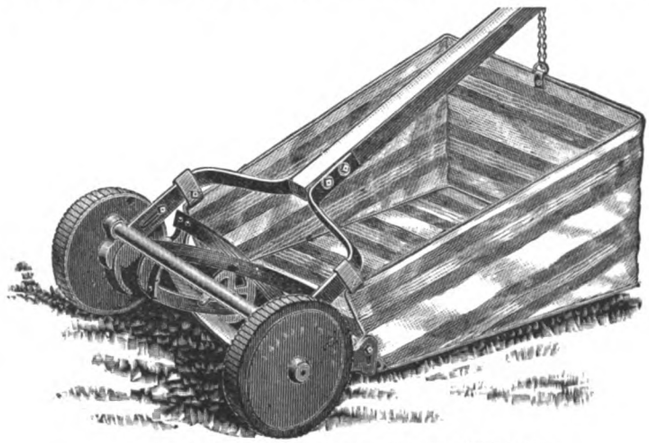

7 inch Wheel, for High Grass.

Cut, - - - - -	17 inch.
Each, - - - -	$25 00

Furnished with new corrugated spiral blades, which admi the blade being quickly filed to an edge when battered, and is s impossible to knock the wiper out of true. In other respects, st Especially adapted to soft and lumpy ground, or extra large Blade Riveted Steel Wiper, 6½ inches in diameter.

ONE IN A CASE.

Explanations.

To ascertain the Length of Tie Required, add 3 inches to the measure around the Bale when under pressure.

Cost of Bale Ties is from 40 to 50 cents per ton of hay. For 17x22 Perpetual Presses, use Ties 8, 8½ or 9 feet Long; No. 14 Wire for heavy work, No. 15 for light work. For 14x18 Perpetual Presses, use Ties 8, 8¼ or 8½ feet long; No. 14 Wire for extra or extreme heavy work and No. 15 for heavy or medium work, and No. 16 for light work. For 12x15 Perpetual Presses, use Ties 7½, 7¾ or 8 feet long; No. 15 Wire for heavy work, and No. 16 for medium or light work. For Upright Hand Presses, use No. 14 and No. 15 Wire. For Upright Light Horse Presses, use No. 14 wire. For Upright Heavy Portable or Light Stationary Horse Presses, use No. 13 Wire. For Upright Heavy Stationary and Beater Presses, use No. 12, No. 11 and No. 10 Wire, according to the size of bale and number of Ties used. It has been repeatedly proven that the use of these Ties is more economical to the pressman than the use of wire from the coil. Only the best material is used in their manufacture, and all Ties are carefully tested before leaving the factory, thus securing reliability and uniformity.

The Widths of Netting are given as woven in the machine. Owing to the spring of the wire, the netting may not appear to be the width ordered. It will safely stretch, however, the proper width. At the top and bottom it has a twisted wire rope selvedge, made of three compactly twisted wires, which give strength and stability to the fence, and is far superior to a selvedge composed of a single wire. The best galvanized steel wire is used, and of ample strength. The measure of the mesh is the length and breadth of the opening.

54 INCH AND NARROWER, TWENTY RODS; LARGER THAN 54 INCH, TEN RODS IN A ROLL.

Greenland Refrigerators are made of Hardwood and Finished Antique. They are lined throughout with Zinc. Have Solid Bronze Hinges, a Bronze Surface Locl Metal Provision Shelves and Malleable Iron Casters. The walls are filled with pure Charcoal, which is acknowledged to be the BEST FILLER known when all the con ditions for which it is used are considered. We have had the Greenland constructed to meet the following necessary qualities in a Refrigerator:—1st, Preservation Foods—which is accomplished by a dry, cold air of even temperature. 2d, Economy of Ice, caused by thick walls, filled with Charcoal, by tight joints and first-clas workmanship. 3d, Durability and beauty of finish. 4th, Cleanable Flues.

Ice Cream Freezers.

Arctic.

Quarts, -	2	3	4	6	8	10
Each, -	$3 75	4 50	5 50	7 C0	9 00	12 00

Gearing completely covered. A strong Tub bound with Galvanized Iron Hoops. A Can of the best quality of Charcoal Tin-Plate, with Cast Iron Top and Bottom, nicely galvanized.

The Gear Frame of the Arctic Freezer may be tipped back over the edge of the Tub, allowing the Can to be removed or contents examined, but if necessary to detach it from the Tub, it can be easily done. The Can of the Arctic may be revolved after the Beater is removed, making it desirable as a Fruit Freezer.

Lightning.

Quarts,	2	3	4	6	8	10	14
Each,	$3 75	4 50	5 50	7 00	9 00	11 00	14 00

The Gearing is entirely inclosed, preventing any possibility of injuring the operator. The Tubs are extra large, made of best quality cedar. The Can may be revolved after the Dasher has been removed, if desired.

Workmanship and Material of the best quality.

White Mountain.

Quarts, - -	2	3	4	6	8

Ice Shaves.

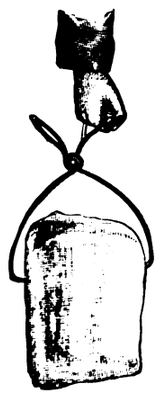

Two-Thirds Size Cut.

DESCRIPTION.	PER DOZEN.
Gem Ice Shaves, Galvanized, Adjustable Cut,	$9 00

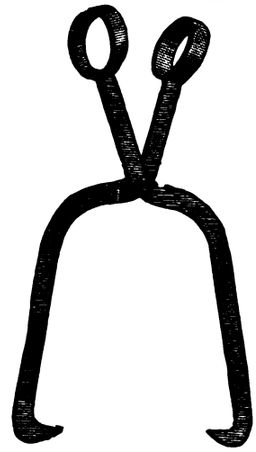

A simple and handy tool for shaving and collecting ice from blocks without removing the latter from the refrigerator or ice chest. It is constructed like an ordinary plane, with a knife adjustable to shaving fine or coarse. In front of the knife is a receptacle about the size of a tumbler, closed by a lid, in which the shaved ice collects when the tool is pushed forward and backward on a block of ice. When filled, the lid is raised and contents emptied, which will be found as fine as snow. The tool is quite short and of convenient size to fit the hand.

Simplex Cash Registers.

No. 1, Front View.

No. 1, Rear View.

No. 2.

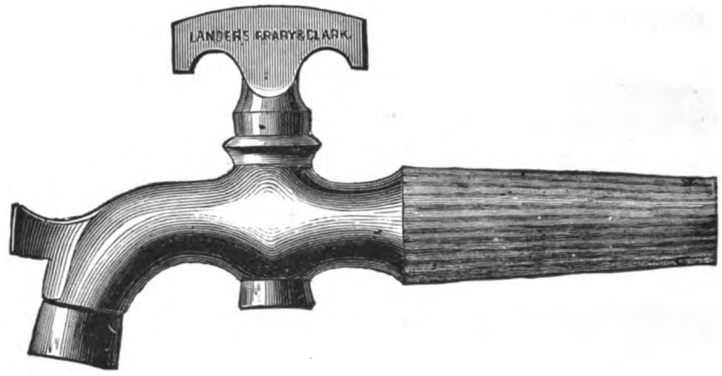

Quarter-Sawed Oak, Finely Finished.

NO.	DESCRIPTION.	EACH.
1	Front Indicator, Rear Drawer, Length 26 inch, Width 20 inch, Height 15 inch,	$50 00
2	Front Indicator and Drawer, Length 26 inch, Width 20 inch, Height 15 inch, -	50 00

The Simplex Cash Register is constructed on entirely different principles from all other Registers now in the market, and every feature is novel, unique, and the embodiment of simplicity. By the Use of a Small Marble and a Metal Strip Bent at Right Angles, we dispense with nearly two hundred separate parts used in other machines. An ample supply of Marbles is furnished with each Register, which are kept in the center compartment of the cash drawer. The Cash Drawer has six hoppers for coin and three for bills, and is provided with a combination lock. When a Sale is made a marble is dropped into one of the series of holes (as illustrated in cut to the right, at the top of the Register), corresponding to the amount of the purchase. For Example: Should the sale be five cents a marble would be dropped into the first opening to the left, which is denoted by a large, plain figure in front of it. The marble rolls down a slotted incline and instantly comes in contact with the metal strip, nearly balanced on a shaft, and under the weight of the marble the heavy end drops and the light end is displayed with a card attached bearing the amount. The marble is held by a swinging bar, and by a simple device the cash drawer may be closed without releasing the marble. When the next sale is made and the cash drawer is opened, the bar is swung sufficiently to allow the marble to escape and the metal strip to drop to its normal position. The little marble then continues on its journey to accomplish another object. It is dropped from the swinging bar into a trough, down which it rolls until the end is reached. There are Twenty-six of these troughs in the Register tray (which is kept locked by the proprietor of the store), each denoting a different denomination of money. Each marble registers the amount of sale in this way. Should there be eight marbles in the 40-cent trough the last figures visible in this trough would be $3.20. If three marbles in the 75-cent trough the last figures in this would be $2.25, etc., etc. When the total amount of sales during the day shall have been ascertained, the cash and register drawers are pulled partly out and, by lifting a cross-bar in the Register tray or drawer, the marbles roll into the cash drawer to be ready for the morrow. The "Simplex" not only accomplishes all that the higher priced and more elaborate Registers will, but has several desirable features which none others possess, among which may be mentioned the COMBINATION LOCK AND CATHEDRAL GONG ALARM. The Combination Lock to the cash drawer is simply four latches susceptible of a number of changes, any of which may be made in a moment. The lock requires no effort to open it when the combination is known. When the cash drawer is opened the Cathedral Gong is sounded. The tone is soft and musical. The "Simplex" Register will record from one to over Seven Hundred Sales per day, and by emptying the tray many times this number may be made each day. It is absolutely correct and it is impossible for the Register to make a mistake.

Progress Oil Stoves.

No. 2.

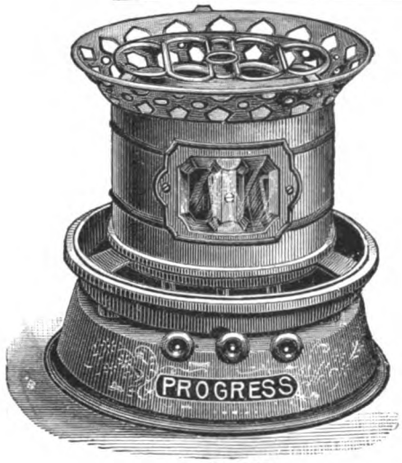

No. 3.

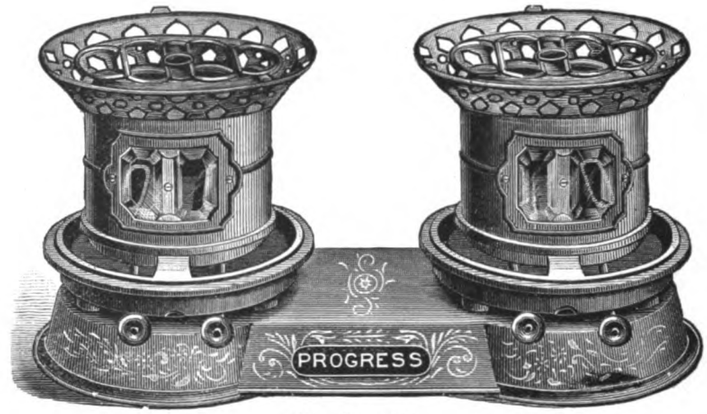

No. 4.

NO.	DESCRIPTION.	PER DOZEN.
2	One 3-inch Burner,	$15 00
3	Two 3-inch Burners,	20 40
4	Two 4-inch Burners,	28 20

No 10.

Nos. 5 and 6.

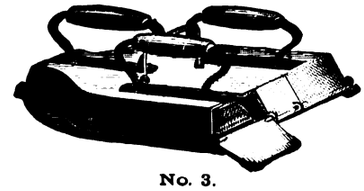

NO.	DESCRIPTION.	PER DOZEN.
10	Single Stove, with Three 4-inch Burners,	$36 00
5	Double Stove, with Two 3-inch Burners,	42 60
6	Double Stove, with Two 4-inch Burners,	58 80
20	Double Stove, with Three 4-inch Burners,	74 40

The "Progress" is made of Tin, Japanned, and is so arranged that the top Pan, on which rests the body and top, can by a slight turn be separated from the tank, leaving the inside exposed. It also has the patent adjustable hinge, which will allow the body to be tipped back or entirely removed, and also a door for lighting and extinguishing. There are few stoves made which can so easily be repaired as this one can, should it get out of order. The upper part of the stove can be readily detached and free access be had to the wick working apparatus. The reservoir which contains the oil never gets warm, as the air circulates between it and the burner.

Dampers.

Devore's.

Wood Handle, Friction Spring

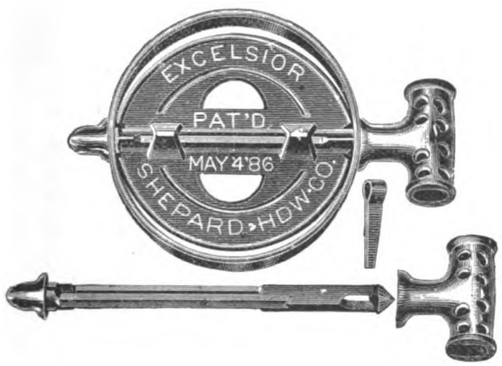

Inches,	5	6	7
Per Dozen,	$1 25	1 50	2 00

The Damper Spindle is so constructed that with it a suitable hole for its insertion in the pipe can be formed, without the use of a tool.

The Spindle Handle is non-heating, being made of wood, fastened with wire staples, and always cool. The Wire Friction Spring is one and one-half inches in length, insuring its elasticity and durability.

The Spindle is attached to the Damper Plate by passing it through the open arches, and passing it inwardly, until the recessed portion of the Spindle passes between the open lugs on the blade.

Bunker's Adjustable Stove Backs.

Adjusts Both Ways.

NO.	DESCRIPTION.	PER DOZ. SETS.
18	Adjustable from 14 to 22 inches in length, and from 5½ to 7½ inches in width without breaking off or the use of bolts, -	$10 50

It will either fit wood or coal stoves. Parties who have been accustomed to use Stove Backs that adjust both ways and fastened together with wrought iron bolts which burn off or expand and allow the pieces forming the Back to fall apart, will find this to be the only durable one in the market.

Improved Change from Wood to Coal.

NO.	DESCRIPTION.	PER DOZ. SETS.
17	This can be easily fitted into any Wood Stove without tools, there being no bolts,	$29 25

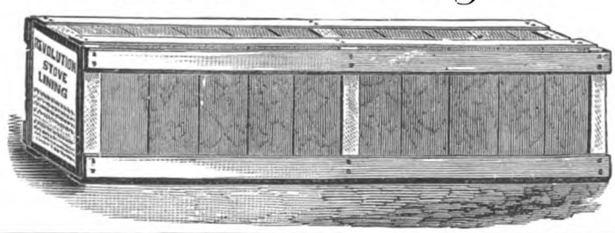

Schenck's Adjustable Fire Backs.

DESCRIPTION.	PER DOZ.
Schenck's Adjustable Fire Backs, - - -	$12 00

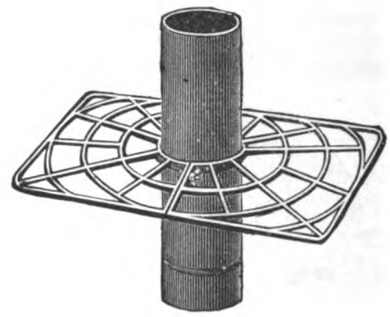

Adjusts itself both ways, from 5 to 6½ inches in width, and from 14 to 24 inches in length Is so constructed that when contracted, it will fit the smallest size cook stove, and when extended, as shown in cut, it will fit the largest size stove.

To enable purchasers to estimate the quantity of our MIXED PAINT required for any given surface, add the number of feet in width (front and rear) to the number of feet in length (both sides); multiply this by the average height, divide this by 200 (as one gallon of this paint covers 200 square feet, two coats,) will give the number of gallons required.

Should the surface be smooth and hard, less than the above would be required; if rough and porous, more.

Put up in cans containing ¼, ½, 1, 2, 3 gallons, also in 5 and 10 gallon kegs, and in half barrels and barrels. No charge for packages.

Cases packed for shipment as follows: 24 quart cans, 12 half-gallon cans, 6 one-gallon cans, 4 two-gallon cans in case.

Smeeton's Metallic Shingles.

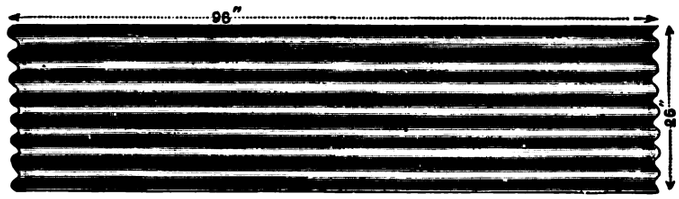

SIZE.	DESCRIPTION.	PER SQUARE.
14 × 20	Smeeton's Patent Improved, Painted,	$8 25
14 × 20	Smeeton's Patent Improved, Painted, with two Patterns of Shingles stamped on each Shingle,	9 75
10 × 14	Smeeton's Patent Improved, Painted	9 75

Each Shingle is made out of a single piece of the best tin or other roofing metal, which is so bent and doubled at its edges as to form locking joints on all sides.
They can be applied to any building where any Metallic or Wood Shingles, Slate or Tile Roofing could be used, and can also be used for siding.
They can be easily and quickly applied by any workman of ordinary ability.
All Shingles are first dipped in good paint and then brushed on both sides, so that they are perfectly painted before leaving the manufactory.

Painted Corrugated Iron.

Shows Straight Corrugated Sheet, 26 x 96 inches; Corrugation, $2\frac{1}{2}$ inches from Center to Center; $\frac{5}{8}$ inch deep.

For Siding, Ceilings. Doors, Shutters, Arches and Awnings.

SIZE OF CORRUGATION.	NUMBER OF CORRUGATIONS LAPPED.	AVAILABLE WIDTH NUMBERS 24 TO 27.	AVAILABLE WIDTH NUMBERS 16 TO 22.

$1\frac{1}{4}$ inches,	2 inches,	$24\frac{1}{4}$ inches.	24 inches.

It has the following qualities essential to all covering material: It is fire, water and wind proof; it is cheap, light, and durable; it allows for the use of a light frame, being a support in itself.

It is the custom of trade generally, as it is ours, in selling by the square, to furnish a number of sheets, the total superficial measurement of which equals 100 square feet.

The most salable size used is No. 27, 8 feet long, $2\frac{1}{2}$ inch Corrugations.

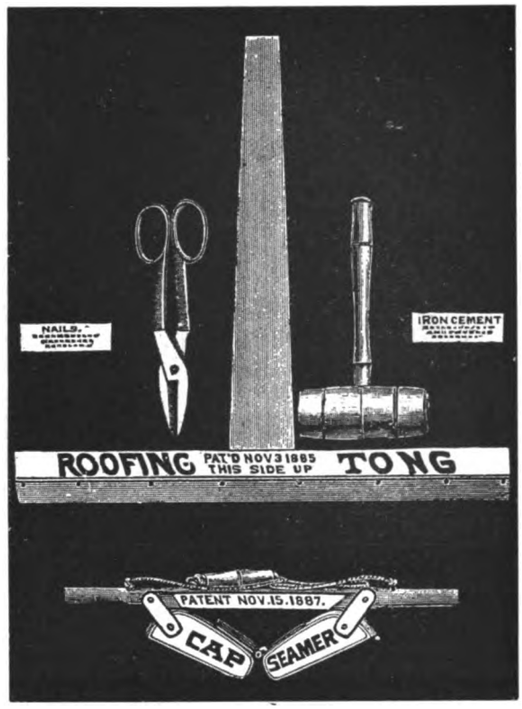

Stock lengths are 60, 72, 84, 96, 98, 101, 108 and 120 inches.

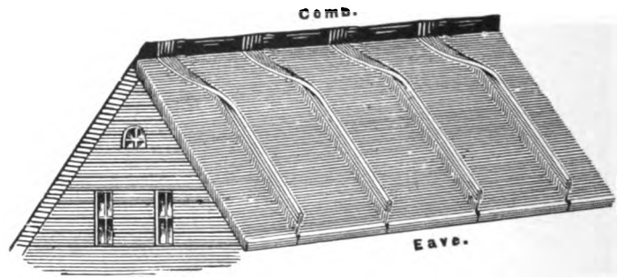

Stock widths are $27\frac{1}{8}$ inches, in $2\frac{1}{2}$ inch Corrugation, and $26\frac{1}{8}$ inches, in $1\frac{1}{4}$ inch Corrugation, Covering width of Sheets. allowing lap as stated, are found in the above table.

Caldwell's Sheet Steel Roofing.

DESCRIPTION.	PER SQUARE.
100 Square Feet in a Roll Complete with Caps, Anchors, Nails and Set of Tools without extra charge, - - - - - - - - - - - -	$6 00

Flat Seam Metal Roofs composed of plates soldered together, forming a single sheet, must, of necessity, in a climate so variable in temperature as ours, be weakened in every joint by the strains of Contraction and Expansion. Roofs, such as are made of Compounds, Gravel and Tar, become as brittle as glass or soft to the extent of running in extremes of cold and hot weather, and if Fire ever reaches the sheathing of Tar and Gravel Roof, nothing can save the contents of a building from complete ruin. Heat from fire in an adjoining building will cause the tar on such roofs to run and readily ignite. Added to these objections against the Tar and Gravel Roofs is the great weight which keeps increasing on account of the Recoatings put on from time to time to keep them from Leaking.

The formation of our Caps and adjustable Anchors (or cleats), which hold the roof to the sheathing is such as to allow for all the Contraction and Expansion of the metal that can possibly arise. The Steel Nails which fasten the anchor (or cleats), of the cap to the sheathing are prevented from Rusting or being Loosened by the Weather, as they are not exposed to the atmosphere, being Underneath and Entirely Covered by the sheets of the metal roof; and no wind or storm, however strong, can loosen or detach the roof from the sheathing. This roofing is painted on both sides with the best mineral paint and linseed oil. Each roll (see cut), contains one square, is so packed and secured as to be merchantable and transportable anywhere without injury to the material or package. All the anchors (or cleats) with the nails and tools are furnished Free of Cost to the purchaser, are contained inside of package, and by the aid of directions to be found in each Tool Rool anybody can put it on; no solder required.

IC, - -	20 x 28 inches.	112	240 lbs.	29	
IX, -	20 x 28 inches.	112	300 lbs.	27	

These plates are allowed to absorb all the metal they possibly can, and are not passed either through the grease pot or patent rolls, to reduce the quantity. Ordinary brands of roofing plates have about 4 pounds of coating on a box of 14 x 20, and 8 pounds on 20 x 28, while our old process has 18 and 36 pounds respectively IC, 14 x 20, weighs 120 pounds and IC, 20 x 28, 240 pounds to the box; crosses regular difference. Every sheet is perfectly squared and branded.

DESCRIPTION.	EACH.
Improved Machine Standards, - - - -	$1 00

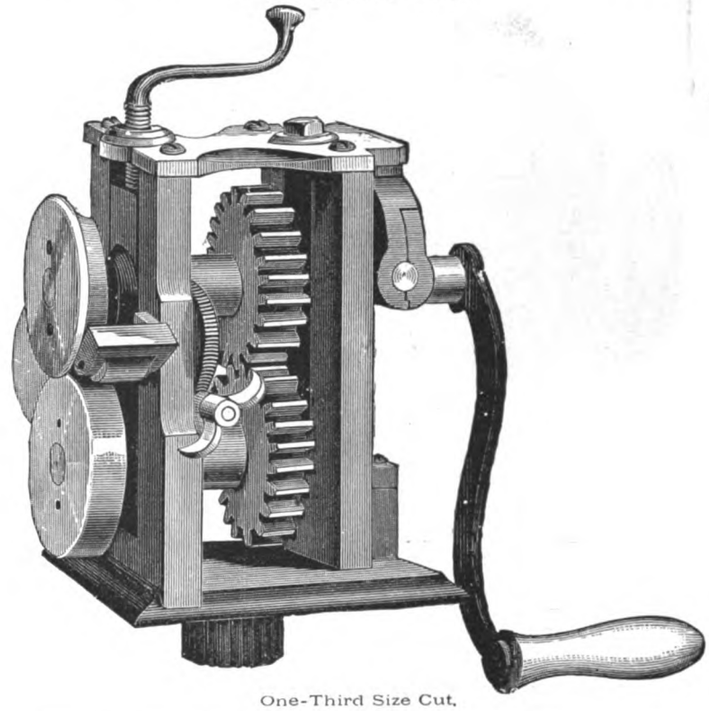

These Standards are so made as to be used on any bench, varying in thickness from one to three and one-half inches. The necessity of cutting holes in the bench is obviated, and the Tinner is enabled to use a Machine in any part of his shop most convenient to his work. The WRENCH is ALWAYS attached to the Standard. These Standards are also adapted to RAYMOND'S MACHINES.

Tinners' Tools and Machines.

Stow's Patent Double Seaming Machines.

Eleven Discs.

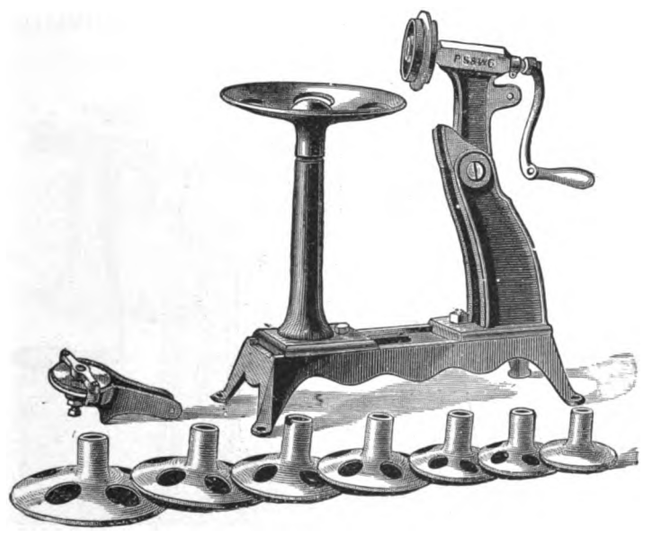

NO.	DESCRIPTION.	EACH.
10	Without Setting Down Attachment, -	$24 C0
	Extra Heads, - - - - -	2 50

This Machine is more readily adjusted to double seam vessels of different sizes than any other manufactured. It is also the most expeditious in its operations.

It acts more favorably in passing seams or locks, because the pressure to set down a double seam is obtained by means of a foot lever, which yields as the rolls pass the seam.

It is well adapted to Wash Basins, Pans &c., and will do any work that can be done on similar Machines.

Stow's Patent Double Seaming Machines.

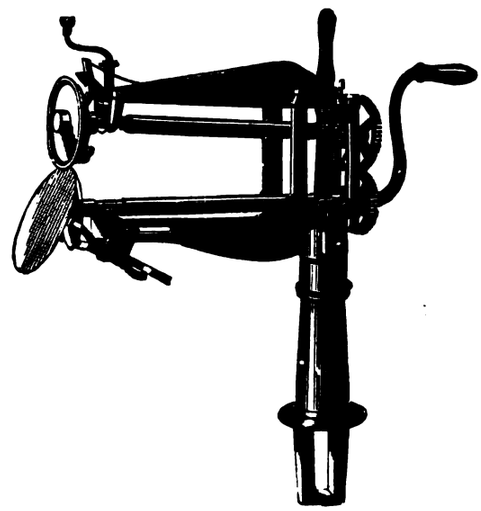

Eleven Discs.

NO.	DESCRIPTION.	EACH.
5	With Setting Down Attachment, -	$28 00
	Extra Discs, - - - - - -	1 00
	Extra Heads, - - - - - -	2 50

The Setting Down attached to this Machine will set down any work that can be Double Seamed on the Machine. It works rapidly and accurately, and an inexperienced workman can use it without difficulty.

It is also intended to be used on work that does not require to be Double Seamed, and to a large extent will take the place of the Setting Down found in the set of Machines.

Moore's Patent Double Seaming Machines.

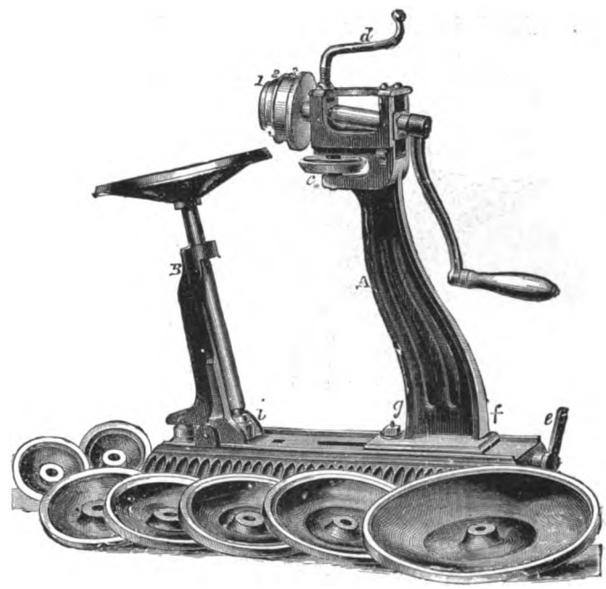

With Standard.

NO.	DESCRIPTION.	EACH.
2	Moore's Patent, for Common Work, -	$19 00
	Extra Faces, - - - - - -	2 50

This Machine, simplified by the improvement secured by recent letters-patent, we are enabled to offer at a less price than any other Double Seaming Machine, and, for general use, we believe will give better satisfaction than the higher priced Machines.

We feel warranted in recommending it as a superior article, and the best suited to the wants of ordinary Tinsmiths who desire a Machine adapted to different kinds of work.

Olmsted's Double Seaming Machines.

Eight Discs. With Setting Down and Deflector.

NO.	DESCRIPTION.	EACH.
1	With Setting Down Attachment, - -	$30 00
	Extra Discs, - - - - - -	2 00

This Machine is 15 inches high, weighs 100 pounds, and is made with brass boxes and cap. It is adapted for straight or flaring work, and may be used on light or heavy tin.

Tinners' Tools and Machines.

Tinners' Rule and Straight Edge.

Front.

Back.

DESCRIPTION.	EACH.
Plain Polished, 36 inches long, - - - - -	$3 75
Nickel Plated, 36 " " - - - - -	4 00

This Rule is gotten up expressly for tinners' use. It is made of steel, three feet in length, one and a quarter inches in width, and one-eighth inch in thickness—making a very neat and convenient straight-edge.

It is laid off on one side with two rows of figures. The first row like an ordinary steel-square, by eighths and inches, up to three feet. The second row is a line of circumferences divided into one hundred and thirteen equal parts; each of these divisions are again sub-divided into eight equal parts, the large divisions representing an inch to a scale and the sub-divisions an eighth of an inch. Therefore, against any diameter we can find circumference in this line to a scale in inches and eighths of inches.

The reverse side of the Rule gives the dimensions of measures and cans. The first two tables are for flaring measures. 1st. Liquid measures, from one to five gallons. 2d. Dry measures, from one peck to two bushels, giving diameter of top and bottom, and the height of each size and kind.

The third table is for cans with pitch or cone tops, from one to ten gallons, giving diameter of top and body, and compass mark for striking breast.

The fourth table is for flat top cans from one to two hundred gallons (thirty-one different sizes), giving height and diameter.

The fifth table is for dry measure, from one quart to three bushels, giving height and diameter.

These tables are gotten up with great care, and with especial reference to economy of stock, with the best proportions in cans and measures.

Parker Hammerless Guns.

The Standard American Gun. Choke Bored, For Hard Shooting.

Is in the hands of Sportsmen in every State and Territory in the Union and most of the foreign countries, and has stood the test in the most satisfactory manner for hard and continuous service, in competition with the best guns of both home and foreign manufacture. This gun is presented to the trade and to sportsmen to meet a demand that exists for a "Hammerless Gun" which will sustain their reputation for workmanship, shooting qualities, etc. It is a departure from any other hammerless gun in many respects, one of which is the Spiral Main Spring, and applied as it is in this gun, establishes its superiority over any spring ever made. Its action is quick and durable, and will stand six times longer than any leaf spring made, and we guarantee it for twenty-five years against breakage.

All the working parts of this gun are attached to the solid iron work (instead of portions being attached to the wood), thus rendering the action of this gun in all climates positive, and not liable to be thrown out of adjustment by the action of the atmosphere on the wood.

For safety the gun is so constructed that the hammers can never be lightly let down to rest on loaded shells—an operation that is very dangerous—and they have guarded against the possibility of its being done. The safety for locking triggers is automatic, also positive and absolutely safe.

The cocking is easy and smooth from start to full cock. The action frame is long, insuring much greater strength and durability than is possible to get with the short action used in most foreign made Hammerless Guns.

The Barrels of this gun can be detached and attached at all times, same as in the Hammer Gun, without reference to gun being cocked or not, thus avoiding the necessity of cocking it before replacing the barrels.

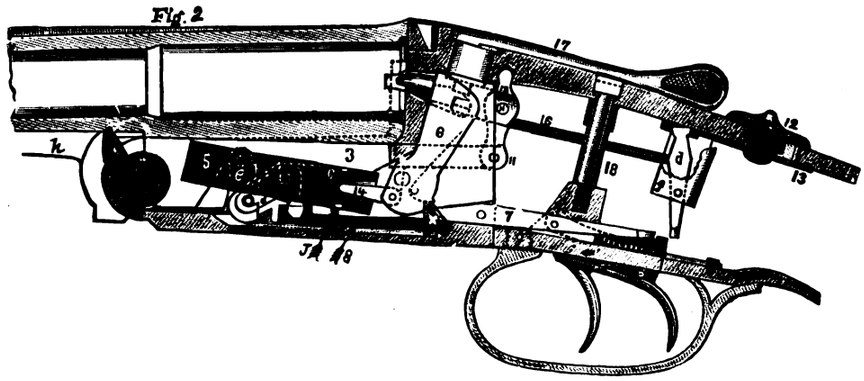

The locking bolts are the same as are used on the Top Action Hammer Gun with so much satisfaction.

Particular attention has been paid to the proper shape and distribution of materials, and the greatest strength will be found where the strain is most severe, and where the wear and tear is greatest. In this gun will be found that symmetry of proportion, beauty of outline and perfection of balance for which the Parker Gun is so justly celebrated.

Manufactured in 10, 12 and 16 Bores, Damascus and Twist Barrels; weight, 16 Bore, 6¼ to 7½ lbs.; weight, 12 Bore, 7 to 9 lbs.; weight, 10 Bore, 8 to 10½ lbs. Length of Barrels, 28 to 32 inches. "Drop" of Stock, 2½ to 3½ inches. Stocks (measured from center of Front Trigger to center of Butt Plate), 14 to 14½ inches. Can make shorter or longer Barrels and different Stocks to special orders and prices, according to extra amount of labor.

Parker Hammerless Guns.

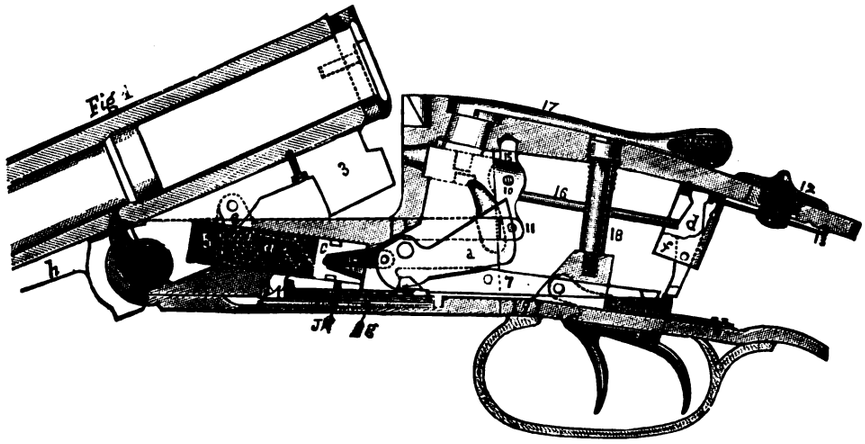

Cut Represents the Gun as Closed.

Pressing the lever 17 to the right gives the upper bolt 10 rear movement, and having projecting ears on each side, entering into side of both right and left hammers, thereby drawing both back sufficiently to prevent nose of hammer from clinging to the indented cap when gun is to be opened after firing.

The cocking is effected by the link E, which, when barrels are put on, connects or hooks on to crank A, which gives movement to slide X, lying in lug slot top of trigger plate, having arms right and left engaging with and drawing both hammers to cock, thus insuring simultaneous cocking.

The pin 16, being forced back by movement of upper bolt 10, forces the safety lever D over the top of triggers, thus making it impossible to snap or fire the gun until it has been fully closed; then safety slide 12 can be forced forward by the thumb making ready to fire.

The pin which projects from end of frame at joint being forced back when fore-end H is put on, moves back the unhooking slide G, thus allowing link E to hook on crank A, as above described. Thus, when fore-end is removed, the unhooking slide spring forces the link E to unhook or let go, and barrels are detached.

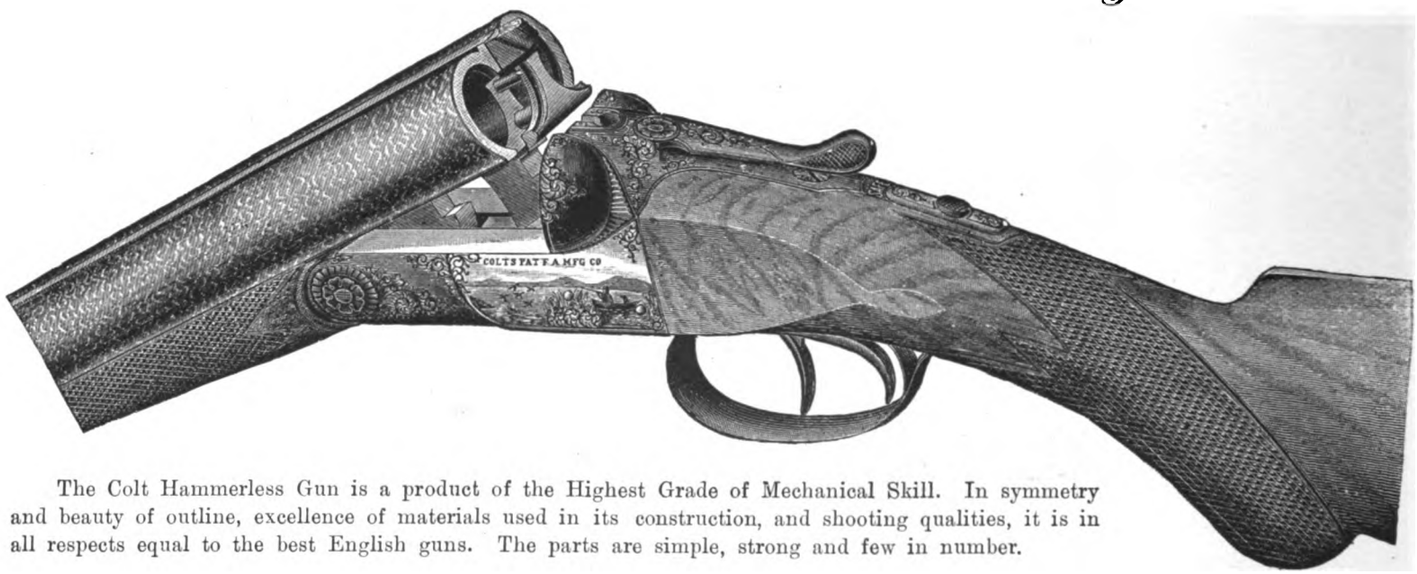

Cut Represents Gun as Open.

Choke Bored.

Colt's Hammerless Breech Loading Gun.

The Colt Hammerless Gun is a product of the Highest Grade of Mechanical Skill. In symmetry and beauty of outline, excellence of materials used in its construction, and shooting qualities, it is in all respects equal to the best English guns. The parts are simple, strong and few in number.

A, Frame.
B, Barrel.
C, Fore-end.
D, Extractor Cam.
E, Safety Bolt.
F, Trigger Plate.
G, Lock Cover Plate.
H, Stock.

I, Screw Holes in Draw Bar.
J, Main Spring.
K, Sear Spring.
L, Hammer.
M, Sear.
N, Cocking Pin.
O, Body Pin.

The cuts are vertical sections of the breech action of the gun, showing it, 1st—after it has been fired; 2d—when it has been open for loading.

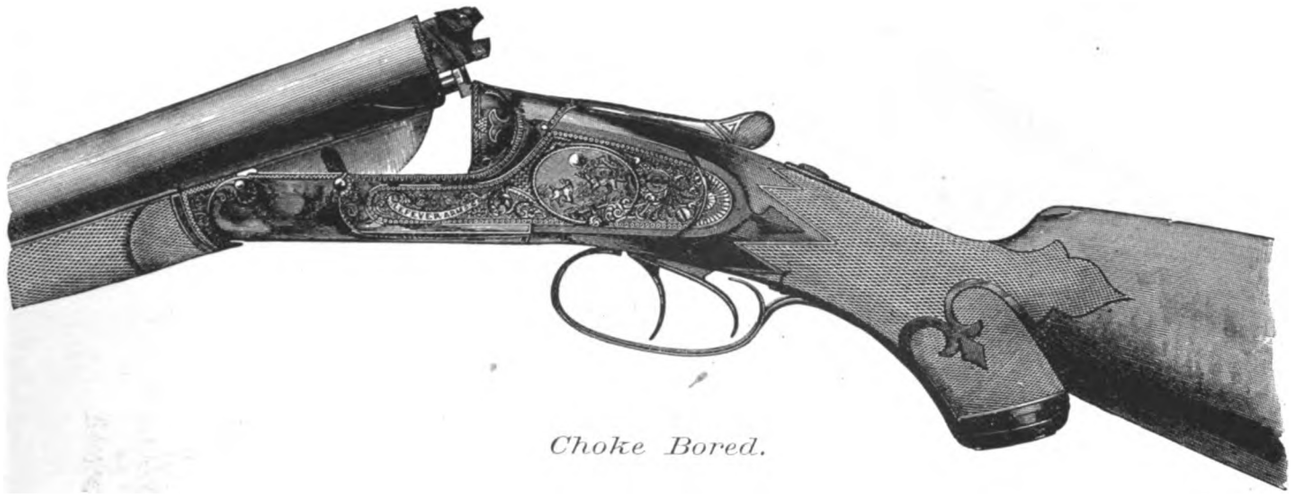

OPERATION OF THE GUN.—The gun is cocked, 1st—by throwing down the barrels, and 2d—by bringing them back into place. An inspection of the drawings shows that the second motion increases the tension of the main spring by pushing its inclined surface above the roll of the hammer, thus utilizing both motions of the barrels and making the forces required to open and close them more nearly equal. The main springs move on rolls, making the friction the least possible. The safety apparatus does not require the cutting away of the stock, so that the stock is very strong. The triggers are firmly secured by a positive lock, and not by springs. The hammers can be let down separately or together by pressing the safety slide forward, and pulling one or both triggers while closing the barrels.

Price List of Colt's Hammerless Breech Loading Shot Guns.

OE	10 Gauge, Damascus or Laminated Steel Barrels, Horn or Steel Butt Plate, Full Pistol Grip with Horn Cap, Border Engraving, Full Compensated Action, 30 and 32 inch. Weight, 9 to 10 lbs.,	100 00
F	12 Gauge, Damascus or Laminated Steel Barrels, Horn or Steel Butt Plate, Pistol Grip, Full Compensated Action, 30 and 32 inch. Weight, 8 to 9 lbs.,	80 00
OF	10 Gauge, Damascus or Laminated Steel Barrels, Horn or Steel Butt Plate, Pistol Grip, Full Compensated Action, 30 and 32 inch. Weight, 9 to 10 lbs.,	80 00

The Lefever Gun is celebrated for its symmetry, balance and strength; has an unexcelled record for pattern and penetration; the only Gun in the world with compensated action to take up wear in every direction. A failure to cock can be instantly detected by means of the indicators projecting from each lock plate, when the gun is at full cock. All guns bored on the taper system, giving the greatest penetration and even distribution of shot.

New Ideal Lefever Guns.

Damascus Steel Barrels, Matted Rib, Choke Bored.

NO.	DESCRIPTION.	EACH.
G	12 Gauge, Damascus Barrels, English Walnut Stock, Oil Finish, Full Pistol Grip, Rubber Butt. Weight, 7 to 9 lbs.,	$65 00

Ithaca Hammerless Guns.

Made of the Best Materials and Warranted in Every Part, Shooting Included.

NO.	DESCRIPTION.	EACH.
61½	Quality No. 1, 12 Gauge, Fine English Stub Twist Barrels, American Walnut Stock, Pistol Grip, Checkered, 30 and 32 inch Barrels, - - - - -	$50 00
061½	Quality No. 1, 10 Gauge, Fine English Stub Twist Barrels, American Walnut Stock, Pistol Grip, Checkered, 30 and 32 inch Barrels, - - - -	50 00

One of the many improvements in the manipulation of the Ithaca Hammerless Gun is the attachment of our cocking device, which enables us to put on and remove barrels at all times, same as a Hammer Gun, without reference to the gun being cocked or not, thus avoiding the necessity of the continued tension on the main springs when the gun is not in use, or oblige one to cock it before replacing the barrels. The locks are rebounding, and thus avoid the danger of firing pins pressing upon the primers with full force of the main spring, when the gun is not cocked, which is true of no other Hammerless Gun. It is also provided with the combined automatic and independent safety, which can be changed from automatic to independent by a touch of the thumb, and vice versa, which enables one in rapid firing to use his gun independent of the safety, if desired.

Ithaca Hammer Guns.

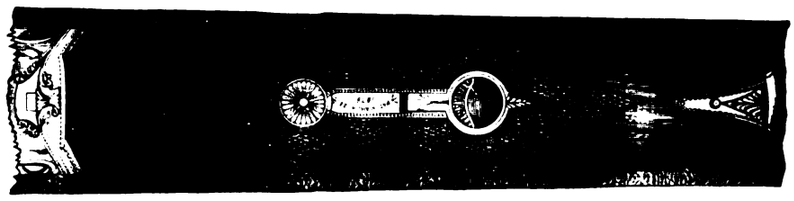

Top Lever, Low Hammers, Rebounding Locks, Extension Rib, Pistol Grip, Interchangeable Parts, Self-fastening Fore-end and Choke Bored.

Parker Hammer Guns.

Parker Fore-End.

Parker Lock.

Simple, Durable and Effective. Choke Bored. 10, 12 and 16 Gauge.

The Parker Gun has Stood the Test of Years, and Stands To-Day at the Head. These Guns are all made with the Improved Check Hook and Pin, Fore-End Lock, Extension Rib, Solid Head Plungers and Rebounding Locks.

NO.	DESCRIPTION.	EACH.
T	12 and 16 Gauge Twist Barrels, American Stock, Rubber Butt Plate, Engraved, Pistol Grip, 28, 30 and 32 inch. Weight, 12 Gauge, 7 to 9 lbs.; 16 Gauge, 6¼ to 7½ lbs.	$55 00
R	10 Gauge Twist Barrels, American Stock, Rubber Butt, Engraved, Pistol Grip, 30 and 32 inch. Weight, 8½ to 10½ lbs.	60 00
G	12 and 16 Gauge, Fine Damascus Steel Barrels, Fine Figured American or Imported Stock, Engraved, Rubber Butt Plate, Pistol Grip, 28, 30 and 32 inch. Weight, 12 Gauge, 7 to 9 lbs.; 16 Gauge, 6¼ to 7½ lbs.	80 00
E	10 Gauge, Fine Damascus Steel Barrels, Fine Figured American or Imported Stock, Engraved, Rubber Butt Plate, Pistol Grip, 30 and 32 inch. Weight, 8½ to 10½ lbs.	85 00

The Parker Gun is distinctively an American production, and has all the advantages of the modern system of gun manufacture. The parts being made to gauge and fit accurately, are on the interchangeable plan, thus producing a gun for which any part can be readily duplicated. All material used is selected with the greatest care, and no metals enter into its construction but the best cast steel and wrought iron.

All grades have the Improved Check Hook and Pin, Fore-End Lock, Solid Head Plungers, Extension Rib, Rebounding Locks and low Hammers.

New Baker Guns.

Only the Best Material Used in its Construction.
Fully Guaranteed.

NO.	DESCRIPTION.	EACH.
B 12½	12 Gauge, Fine English Stub Twist Barrels, English Walnut Stock, Pistol Grip, 28, 30, and 32 inch Barrels. Weight, 7 to 9½ lbs.,	$30 00
OB 12½	10 Gauge, same description as No. B 12½, 30 and 32 inch Barrels. Weight, 8 to 10½ lbs.,	30 00

Has the best English Stub Twist Barrels, Extension Rib, Checkered Pistol Grip, English Walnut Stock, Rubber Butt Plate, Low Circular Hammers, Solid Strikers, Rebounding Locks, Top Snap Action, Interchangeable Parts, Choke Bored, unless otherwise ordered, Compensating Fore-end, which positively takes up wear in the hinge joint and prevents the gun from becoming loose. This, it is well known, has been one of the greatest difficulties with which gunmakers have had to contend. The New Baker Gun is fully guaranteed, and should any part fail through defect in material or workmanship, they agree to replace the same at their factory at Batavia, N. Y., free of charge.

The New Baker Gun is designed especially for those sportsmen who want the Best Shooting Gun that money will buy, and at a very moderate price.

Remington New Model Guns.

Spencer Machine Made Guns.

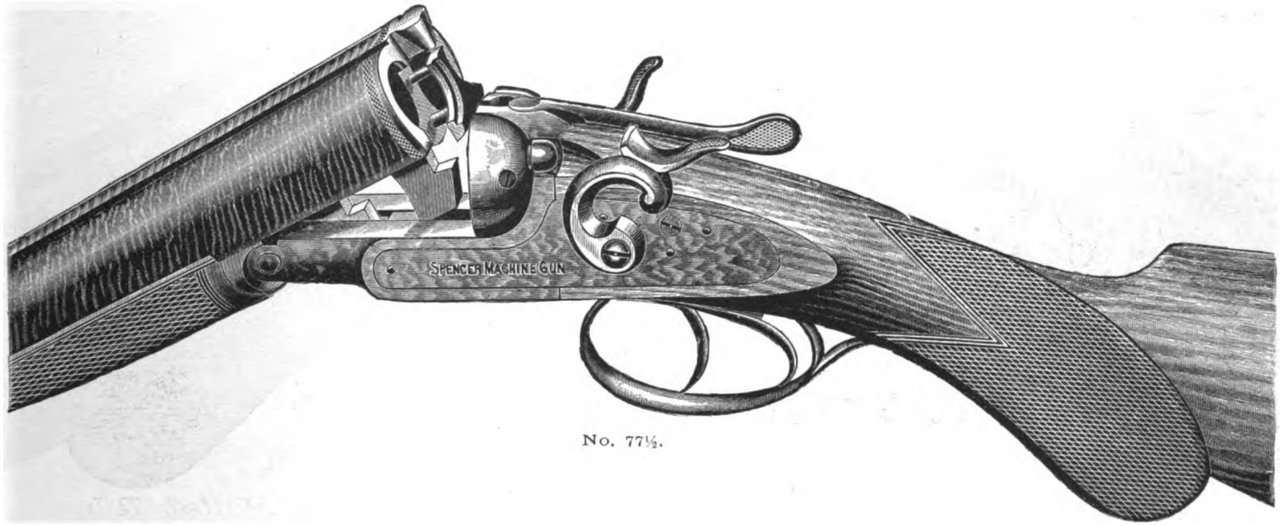

No. 75½.

Top Lever, Extension Rib, Back Action, Choke Bored.

NO.	DESCRIPTION.	EACH.
75½	Top Lever, Twist Barrels, Back Action Locks, Rebounding Circular Hammers (below line of sight), Double Bolt, Elevated Extension Rib, Pistol Grip, D. & E. Fore-End, Solid Plungers, Matted Rib, Ornamented Rubber Butt, Left Barrel Choke Bored, 12 Gauge, 30 and 32 inch Barrels. Weight, 7½ to 9 lbs., -	$29 25
075½	Same as No. 75½. 10 Gauge, 30 and 32 inch Barrels. Weight, 9 to 10½ lbs., -	29 25

The Spencer Machine Made Guns, although low in price, combine all the latest improvements and all the advantages in shooting qualities of high cost machine guns. The parts are interchangeable, and are finished in the best manner. The gun is closely fitted, working smooth and easy. No engraving. In elegance and durability it is equal to the most celebrated guns of English and American make. The barrels are soldered by a special contrivance and patented machine, and soldering is done entirely with copper. By this process strength, rigidity and perfect boring are secured. The uniform shooting qualities of these guns are their greatest recommendation, and their style and finish are unsurpassed.

Winchester Repeating Shot Guns.

12 and 10 Gauge, 6 Shots.

NO.	DESCRIPTION.	EACH.
30½	12 Gauge Winchester Repeating Shot Gun, 6-shot, Rolled Blued Steel Barrel, Plain Pistol Grip Stock, 30 inch Barrel,	$25 00
32½	12 Gauge, Same as above, but 32 inches,	25 00
030½	10 Gauge, same description as No. 30½,	25 00
032½	10 Gauge, same description as No. 32½,	25 00

The Winchester Repeating Shot Gun, having been thoroughly tested during the past years, both by experts and novices, has been found to meet all the requirements of the sportsman. Double shots may be fired as quickly and as rapidly as with the double-barrel breech-loading gun, and the four shots in reserve may be fired with like rapidity. Every care has been taken in the construction of the gun, both as to material and workmanship, making it the equal in these respects to any gun in the world. All the parts of the system are made to gauge, and are therefore interchangeable.

Sportsmen will find this a strong, serviceable arm. The system contains but sixteen parts in all.

The breech block and finger lever form one piece, and move together in opening and closing. The hammer, placed in the breech block, is automatically cocked during the closing motion, but can also be cocked or set at half-cock by hand.

The trigger and finger lever are so adjusted that the trigger cannot be pulled prematurely, and the gun cannot be discharged until closed.

The barrel can be examined and cleaned from the breech.

The magazine and carrier hold five cartridges, which, with one in the chamber, make six at the command of the shooter.

The standard gun will be made up with rolled steel barrel, case-hardened frame, and pistol grip stock of plain wood, not checked. All guns will be full choked, and no gun will be sent out which will not make a good target.

Two kinds of Damascus Barrels will be furnished, when desired at prices given below.

The standard gun will have a stock 12¾ inches in length, and 2¾ inch drop, and any variation from standard length or drop will be charged for extra.

Price List of Extras.

DESCRIPTION.	EACH.
Fancy Walnut Stock and Fore-arm, not checked,	$10 00
Checking Stock and Fore-arm,	5 00
Extra Length or Drop of Stock, to order,	10 00

Air Rifles.

Dandy Repeating Air Rifle.

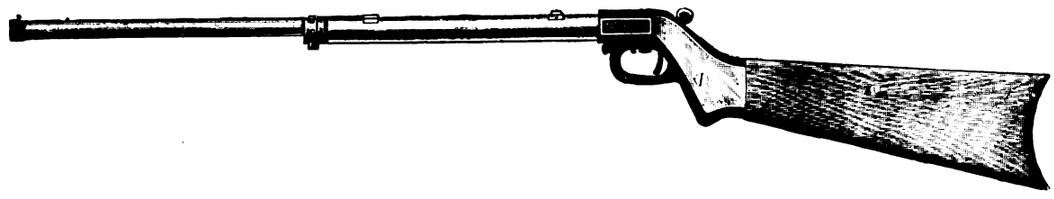

Length, 29 Inches. Shoots 45 Times Without Reloading. One Movement in Loading.

NO.	DESCRIPTION.	EACH.
5004	Nickel-plated Barrel, 16 inches long, 29 inches over all, - - -	$2 00

Nice, light colored, hardwood stock. Shoots "BB" shot. Cocking lever works similar to those on the Winchester Repeating Rifle.

Matchless Repeating Air Rifle.

Length, 36 Inches; Weight, 2 lbs. 11 oz. Shoots "BB" Shot.

NO.	DESCRIPTION.	EACH.
5002	Nickel-plated Barrel, Full Length 36 inches, Shoots 65 Times, - -	$2 50

In designing the "Matchless" Air Gun, the aim has been to provide a good, substantial weapon, capable of killing small game, and having the appearance of a regular rifle, heavy enough for strength and light enough for small boys to handle easily; it has the greatest amount of effecting force possible to get from an exertion in loading not beyond the strength of an ordinary boy, and so constructed that ammunition for a day's shooting could be stored within the gun itself, one shot at a time being thrown into place when required. We are now offering this gun to the trade, being satisfied that it is the best thing for the money ever made.

Every one of these guns is thoroughly examined by an expert before leaving the factory. During this test each gun is discharged from 20 to 50 times. Ten test sighting shots are made at one of our targets, at 40 feet distance; an average of 9 shots out of the 10 imbedding themselves into a pine board.

Chicago Air Rifle.

Shoots Regular Air Gun Darts and Bullets. Entire Length Over All, 33 Inches.

NO.	DESCRIPTION.	PER DOZ.
5003	Shoots Darts and Slugs, Full Length 33 inches, - - - -	$12 00

It will shoot a common "BB" shot 40 rods and kill small game at 50 feet. No powder or caps. No noise. Not dangerous to handle. By its use a person can become a perfect shot. It costs but one cent to shoot 100 times. The barrel, air chamber and all working parts are made of brass and steel. The stock is maple, nicely stained and varnished, representing rosewood. The air chamber and barrel are of mandrel drawn brass, accurately bored and polished. The barrel has a perfect device for holding the ball tight to place. The plunger or piston is of the very best of steel, and made especially for this purpose. All parts are made to stand continued usage and not get out of order.

Air Rifles.

The Improved Daisy Air Rifle.

NO.	DESCRIPTION.	PER DOZEN.
5001	All Metal. Shoots BB Shot. Length, 31 inches. Weight, 1¾ lbs.,	$18 00

In presenting for your inspection "The Improved Daisy," we wish to call your attention to the following: The "Daisy" has been before the public two years; it has gained a reputation second to none. To-day it leads the van. We believe in advancement, and believe the trade, as well as the boy, demands a rifle (even if sold at a small price), as near perfect as is possible to make. It has been the aim in improving the Rifle to lose none of the excellent qualities of its predecessor, but to add strength, ease of manipulation, accuracy and force in shooting. The "Daisy" embodies every good quality and has many points of superiority, to all of which we most respectfully invite your careful inspection and comparison.

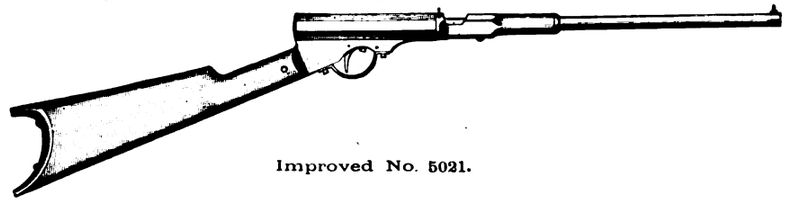

The King Air Rifle.

NO.	DESCRIPTION.	EACH.
5005	All Metal, Nickel Plated,	$1 25

Entire length over all, 34 inches. Shoots common B. B. shot accurately and with sufficient force to go through ¼ inch soft pine. The barrel and all working parts can be easily removed by simply unscrewing the metal cap on front part of gun, a feature when seen that must be appreciated, as it makes the removal of shot that are sure to become lodged in all muzzle-loading Air Guns a very simple and easy matter. Each gun is sighted with movable sights, and packed in a paper box with sample package of shot and directions.

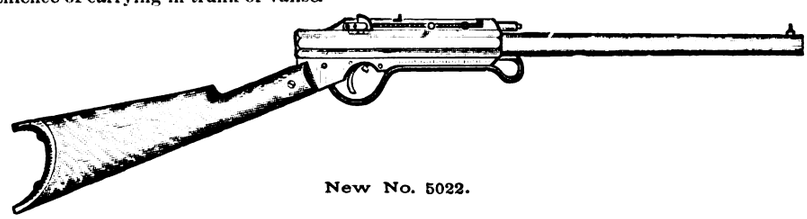

Quackenbush Improved Air Guns.

Improved No. 5021.

NO.	DESCRIPTION.	EACH.
5021	21-100 Caliber, Full Nickel Plated, Full Length, 36 inches. Weight, with appurtenances, 4½ lbs. Shoots Darts and Slugs,	$8 00

Each Gun is neatly boxed, with six Patent Darts, six Paper Targets, one hundred Slugs, together with a combined claw and wrench. The Gun can be instantly taken apart for the convenience of carrying in trunk or valise.

New No. 5022.

5022	Magazine Shot Air Gun, 22-100 Caliber, Full Nickel Plated, Full Length, 37 inches. Weight, with appurtenances, 4 lbs., 6 oz. Shoots No. 3-0 Shot only,	$12 00
	5 lb. Sack of Special Shot to fit this Gun,	80

This Gun is one of the finest and handiest of any on the market. It has a magazine attached for holding 20 No. 3-0 Shot, making a desirable improvement. The magazine can be quickly filled and operated, making the Gun always ready, and saves the inconvenience and delay of handling the shot each time. Each Gun is neatly boxed, with 6 Colored Targets and 200 Shot, No. 3-0.

H. M. Quackenbush's Safety Cartridge Rifles.

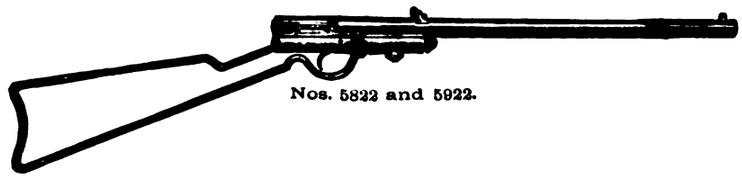

Globe and Peep Sights.

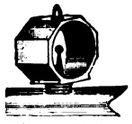

Plain Sights.

Peep Sight.

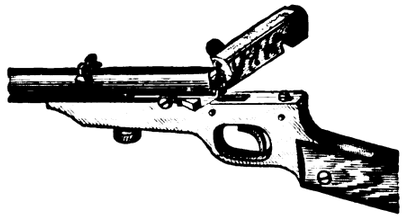

Nos. 5822 and 5922.

Globe Sight.

Shoots "BB" Caps, 22 Short and Long Cartridges.

NO.	DESCRIPTION.	EACH.
5822	Junior, 22 Caliber, long or short, Skeleton Stock, Standard Length, 18 inch Barrel, with Regular Sights, Nickel Plated Finish,	$5 25
5922	Junior, 22 Caliber, long or short, Skeleton Stock, Standard Length, 18 inch Barrel, with Regular Sights, Blued Barrel,	5 35
6022	22 Caliber, Long or Short, Standard Length, 18 Inch Barrel, with Regular Sights, Nickel Plated Finish,	6 35
6122	22 Caliber, Long or Short, Standard Length, 18 Inch Barrel, with Regular Sights, Blued Barrel,	6 35
6222	22 Caliber, Long or Short, 22 Inch Barrel, Globe and Peep Sights, Nickel Plated Finish,	9 35
6322	22 Caliber, Long or Short, 22 Inch Barrel, Globe and Peep Sights, Blued Barrel,	9 35
6422	22 Caliber, Long or Short, 22 Inch Barrel, with Regular Sights, Nickel Plated Finish,	8 00
6522	22 Caliber, Long or Short, 22 Inch Barrel, with Regular Sights, Blued Finish,	8 00

Whole length, 33 inches. Weight, about 4½ lbs. Caliber, 22-100 for regular "BB," or long and short cartridges.

We would call your attention to the Safety Cartridge Rifle as being accurate, safe to handle, quick to operate, and reliable in every respect. It has a rifled Steel Barrel, Automatic Cartridge Extractor, and Adjustable Rear Sight. Its Stock is of Black Walnut, Handsomely Finished or the Skeleton Stock, and so fastened to the barrel that the two may be easily and quickly separated, making the arm handy to carry in a trunk, valise or package. The barrel and parts are durably nickeled, except the breech block, which is case-hardened in colors. Each rifle is thoroughly tested before leaving the works. Taken as a whole, this rifle is equal, if not superior, to the higher priced firearms, and is so constructed as to material and workmanship that it will bear incessant use without impairing its efficiency in the least degree. It is a capital rifle for the shooting gallery, target practice and shooting game.

Merwin Hulbert & Co. Junior Rifles.

Taken Apart.

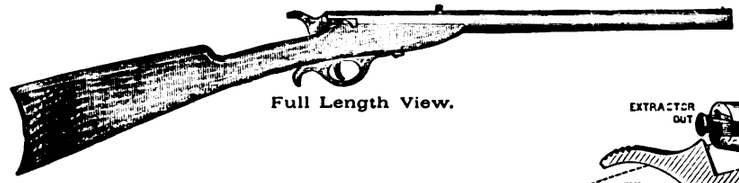

NO.	DESCRIPTION.	EACH.
4022	22 Caliber, 22 inch Round Barrel, Rebounding Lock, Walnut Stock, Case-hardened Frame and Mountings. Weight, 4½ lbs., - - - - - -	$ 7 50
4122	22 Caliber, 22 inch Octagon Barrel, Rebounding Lock, Polished and Checkered Stock and Fore-end, Case-hardened Frame and Mountings, Sporting Rear and Lyman Ivory Bead Hunting Front Sight. Weight, 4½ lbs., - -	10 50

This Rifle can easily be put together and taken apart without the aid of a tool, and when in the latter condition, can be carried in a valise, trunk, or canvas cover, being reduced in size to the length of the barrel. The accuracy of the shooting is guaranteed to be equal to that of any other Rifle. 22 Short and Long Cartridges as well as Bullet Breech Caps and 22 Shot Cartridges can be used in the same gun. A vertically closing Breech Block, securely fastened by the lever, renders all accidents impossible and premature explosions are prevented by a rebounding lock. The construction of the extractor is such as to eject the shells clear of the breech, leaving the barrel free to be reloaded without having to remove the empty shells.

Besides being an excellent Target Rifle, it will kill rabbits, rats, quail, sparrows or any small bird or animal, and will prove very useful to fruit growers and taxidermists.

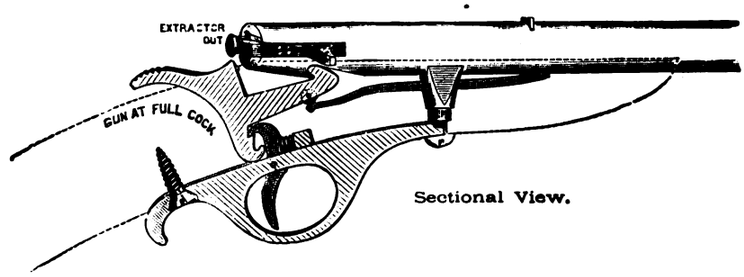

To properly eject the shells clear of the breech, snap down the lever by pressing down on it with the thumb.

The Atlas "Cadet" Rifle.

Full Length View.

Sectional View.

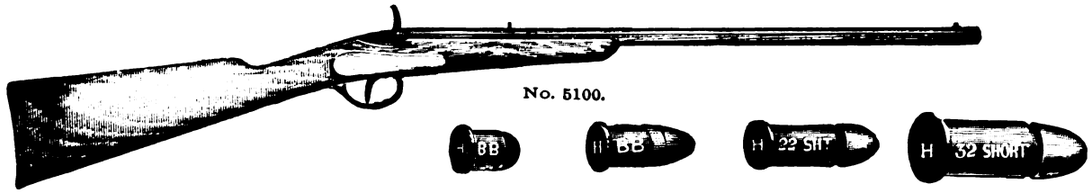

Shoots BB Caps and 22 Shorts.

NO.	DESCRIPTION.	EACH.
5622	22 Caliber, 18 inch Barrel. Weight, 2¾ lbs., - - - - -	$4 50

The Atlas Rifle is designed to take the place of the cheap Flobert Rifle with which the country is flooded, and will be found to be far superior in workmanship and accuracy to the Flobert. The barrels are made of Steel, Nickel Plated and scientifically bored, having the new Quick Twist. The Lock is very simple and and of few parts, and therefore not liable to get out of order (see sectional view). We are the Sole Agents for this Rifle.

Sectional View of Winchester Single Shot Rifle.

This rifle has the old Sharp's breech block and lever, and is as safe and solid as that arm. The firing-pin is automatically withdrawn at the first opening movement of the gun, and held back until the gun is closed. The hammer is centrally hung, but drops down with the breech block when the gun is opened, and is cocked by the closing movement. It can also be cocked by hand. This arrangement allows the barrel to be wiped and examined from the breech. In outline everything has been done to make the gun pleasing to the eye. It can be furnished with or without set trigger, with barrels of all ordinary lengths and weights, and for all standard cartridges. All .22 caliber rim fire rifles are fitted with a kicking extractor, which throws the shell clear of the gun.

Winchester Magazine Rifles.

Sectional View of Model 1886 Winchester Repeater.

The Winchester Repeating Rifles are the most successful all around Guns ever made. The sale of the 44 caliber, model 1873, the first of the centre fire models, has exceeded 250,000; and this is only one size of the many calibers which are manufactured to meet the different requirements of the various kinds of shooting in the vast territory in which these Arms are used, from tiger, elephant, elk, buffalo, antelope and other large game at long range, to the rabbit, squirrel, geese and other small game at short range.

They are universally used by all classes of sportsmen, and are the essential part of the equipment of the hunter, explorer, cow boy, scout or prospector in hunting game for pleasure or as a source of food supply, as well as an absolute protection against the danger from wild animals and savage tribes.

The Winchester is the favorite with these men, for the reason that it is *the most reliable Arm* made. It can be carried through the sands of the Sahara Desert or to the head waters of the Amazon. It can be subjected to all the exposure incident to a frontier life, or to the rigors of the arctic circle yet the Arm is ever ready for use and the working parts ready to perform their several functions.

The calibers in which the Winchester Rifles are made, have become, on account of their immense sale and by the excellence of the Arms, the Standard for the different classes of game shooting.

The Winchester Rifles are manipulated by a finger lever. This part has a short movement, enabling easy and rapid firing of the gun from the shoulder. The arrangement of the breech-bolt, finger-lever and locking bolts gives power to put in and take out a cartridge, and to withstand any charge, as well as to repeat the action of loading and extracting with greater rapidity and with less deflection of the Arm from the line of sight than obtains in any other magazine rifle.

Winchester Repeating Rifles.

New Winchester, Model 1890, 22 Caliber.

NO.	DESCRIPTION.	EACH.
704	24 inch Octagon Barrel, Plain Trigger, for Short Cartridges, 15 Shot, Weight about 5¾ lbs.	$16 00
705	24 inch Octagon Barrel, Plain Trigger, for Long Cartridges, 12 Shot, Weight about 5¾ lbs.	16 00
706	24 inch Octagon Barrel, Plain Trigger, for W. R. F. Special Cartridges, these being especially designed for this Gun, having 7 grains Powder and 30 grains Lead, with inside Lubricated Bullet, 10 Shot,	16 00

The system is a new one, with sliding forearm movement, and is well adapted to small cartridges. The breech block locks itself in plain view, and is of such size as to permit a strong firing-pin and extractor, and offer a good cover to the head of the cartridge. The gun locks at each closing movement, and cannot be opened except by letting down the hammer or pushing forward the firing-pin. The parts are few, and are strong and are made interchangeable.

The arrangement of breech-block and hammer is such that the gun cannot be prematurely fired, nor can the hammer be pulled prematurely, causing misfire.

The method of loading the magazine is, we think, the best that can be devised. Many experiments have convinced us that cartridges as small as the 22 short cannot be easily loaded into the magazine when pushed against the pressure of the magazine spring. They are too small to be firmly held after the fingers and cartridges have become greasy, as they necessarily must in handling this kind of a cartridge.

The sliding forearm movement we believe to be particularly applicable to a gun handling this size cartridge, where little power is required to put the cartridge into the chamber.

We feel sure that this gun will be found to be always serviceable, and that the action will require no care to keep it in order, nor will the action need any cleaning.

In calibers as small as the 22 short, too much care cannot be expended in keeping the barrel clean.

Rifles of this model will be adapted to the regular 22 short, 22 long and 22 Winchester rim-fire cartridges (the latter being especially designed for this gun, with inside lubricated bullet). A gun chambered for the 22 short cartridge will handle that cartridge only, a 22 long will handle the 22 long cartridge only, and so on.

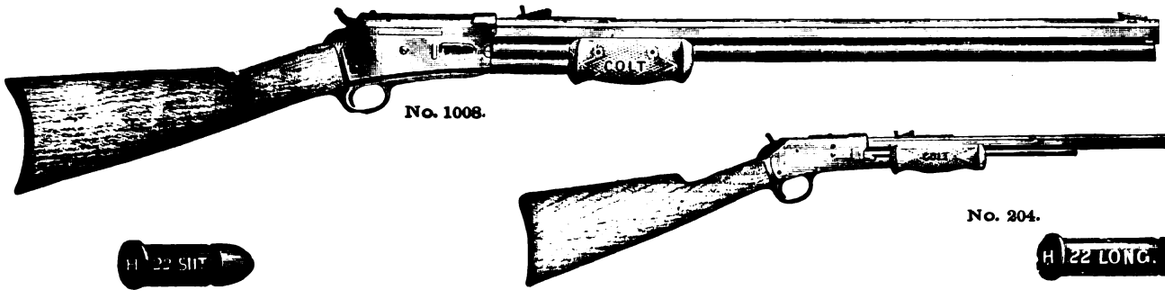

Guns will be furnished only with 24 inch octagon barrels, plain triggers and straight grip, rifle stocks. We are not prepared to furnish longer barrels, set triggers or pistol grip stock.

Rifles chambered for 22 short will not take 22 long. Rifles will use one cartridge only.

1208	45-85 Caliber, 10 Shots, Octagon Barrel, 28 inches. Weight, 10 lbs., - -	20 50

22 Caliber Rifles will take all long or all short 22 caliber cartridges, or a part long and a part short.

The 45-85 uses Colt, Ballard or Marlin cartridges, or the 45-70 Marlin as a repeater. As a single shot only, will take 45-70 (405 gr. or 500 gr. bullet) cartridges.

This Rifle is believed to possess advantages over all others now in the market, by the adoption of the left-handed method of handling, which enables the breech action to be so much simplified and lightened, without detracting from its strength. The materials used in its construction are the best of their kind, and the workmanship is of the same high standard as that of the other arms manufactured by this company.

The hammer is automatically locked and unlocked by a simple device connecting hammer and handle. The Rifle may be loaded and discharged with lightning rapidity by using the reciprocating motion of the slide, keeping the trigger constantly pressed back during the operation.

Marlin Safety Repeating Rifles.

Marlin Safety, Model 1889.

Solid Top. Side Ejecting. Automatic Lever Catch. Compound Extractor.

NO.	DESCRIPTION.	EACH.
3189	32 Caliber, 24 inch Round Barrel, 14 Shot. Weight 6¾ lbs.	$18 00
3289	32 Caliber, 24 inch Octagon Barrel, 14 Shot. Weight 6¾ lbs.	19 50
3724	38 Caliber, 24 inch Round Barrel, 14 Shot. Weight 6¾ lbs.	18 00
3824	38 Caliber, 24 inch Octagon Barrel, 14 Shot. Weight 6¾ lbs.	19 50
4324	44 Caliber, 24 inch Round Barrel, 14 Shot. Weight 6¾ lbs.	18 00
4424	44 Caliber, 24 inch Octagon Barrel, 14 Shot. Weight 6¾ lbs.	19 50

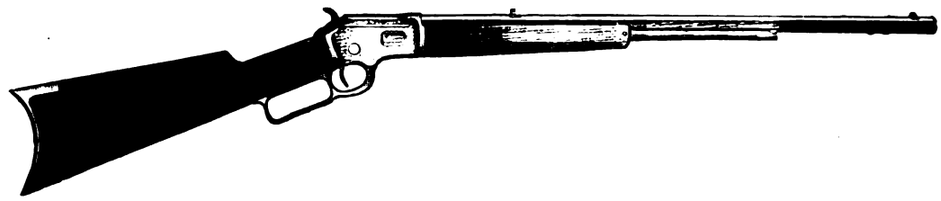

Cartridges made for Colt Lightning or Winchester 1873 can be used.

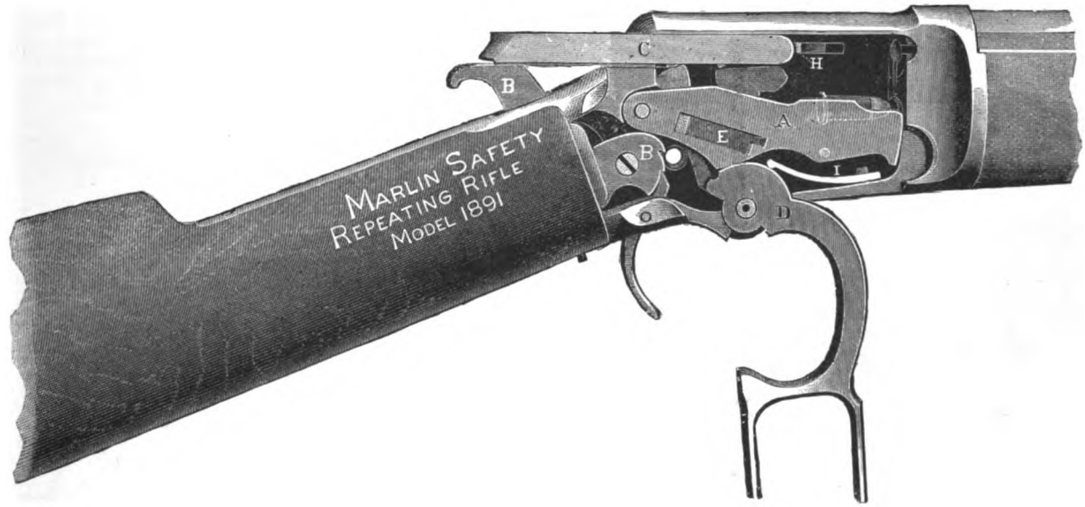

The above cut represents the new Safety Repeating Rifle, Model 1889, which for strength and simplicity, combined with the well known quality of all Marlin goods, warrant us in saying that it is one of the best Repeating Rifles yet produced. This Gun is so arranged that there is no danger of the action being clogged, or prevented from working by getting a short cartridge in the magazine, the top of the action being closed solid, and open on the side, no rain, snow or ice can get in to interfere with the parts as in other Magazine Guns open on top. In case of a defective cartridge giving out around the head, no injury can come to the person using the arm, by having powder blow in his face and eyes, as the solid top forms a perfect shield to protect him. Premature explosion of a cartridge impossible.

Marlin Repeating Rifle.

Marlin Safety, Model 1891, 22 Caliber.

NO.	DESCRIPTION.	EACH.
2124	22 Caliber, 24 inch Round Barrel, Magazine will hold 19 Short Cartridges, 16 Long and 14 Long Rifle Cartridges. Weight 6¼ lbs. - - - - -	$18 00
2224	22 Caliber, 24 inch Octagon Barrel, Magazine will hold 19 Short Cartridges, 16 Long and 14 Long Rifle Cartridges. Weight 6 lbs. - - -	19 50

The public has for a long time been making a strong demand for, and manufacturers have often tried to furnish a repeating rifle to use the cheap rim-fire 22 caliber ammunition. We believe that the Marlin Safety Rifle, Model 1891, is the first to fully meet the popular want.

This arm is designed for short range target work; also for snap shooting on the wing, and for hunting small game.

In one and the same rifle, without any adjustment, may be used any or all of the following well known rim-fire cartridges: 22 short, 22 long and 22 long rifle ball cartridges; 22-50 U. M. C. and 22 long Am. shot Cartridges, 22 long and extra long blanks. Of these cartridges the 22 short gives good results at distances less than 125 feet. The 22 long gives fair results at distances less than 150 feet. The 22 long rifle gives excellent results up to 200 yards. The shot cartridges give a good target at 30 feet. C. B. C's. and B. B. C's are loaded with fulminate, which contains glass, and they will ruin a rifle barrel in a short time.

The rifle is operated by a finger lever. The throw of the lever is very short and the manipulation remarkably easy. The solid top and side ejecting principle, so successfully introduced in our model of 1889, is retained in this arm, and is of very great importance because the rim-fire cartridges are very often prematurely discharged. A slight squeezing of any part of the rim is all that is necessary to explode them. Such explosions are neither dangerous nor disagreeable on a solid top gun.

The two greatest difficulties in the way of making a 22 caliber Magazine Rifle are brought about because the ammunition is lubricated on the outside of the bullets, and because the shells are not firmly crimped onto the bullets. Lubricating on the inside makes the ammunition expensive. Crimping the shell makes it less accurate. From the first condition it results that when the arm is heated the lubricant melts and unites with the burnt powder and penetrates every recess of the action, hardening as the arm cools. After using a few days, "the gun works hard;" the action must be cleaned. From the second condition it sometimes results that the cartridge breaks in two in the action and the shell and bullet are jammed in all manner of ways, completely locking the arm. In order to counteract, as much as possible these objectionable features, we introduce our greatest improvement, a removable side; an entirely new feature, and one which will be of great practical value.

The unscrewing of the thumb screw on the right-hand side of the action allows the entire side of the receiver to be removed, and also in turn the carrier block, finger lever and breech bolt. From the breech bolt may be taken the firing pin and extractor; all this without any tools whatever, and with the lever in any position. This allows the action to be thoroughly cleaned without trouble or tools, and allows the barrel to be wiped out from the breech, which is very desirable in a small bore gun, and if the action becomes clogged, one minute is time sufficient to open the gun and remove the obstruction.

Stevens Rifles.

Celebrated for their Accuracy, Simplicity, Durability and Compactness.

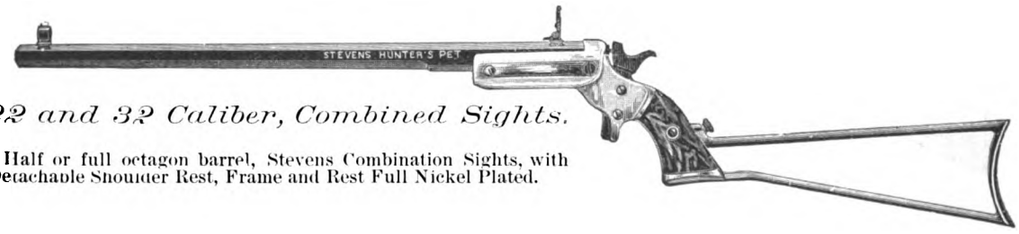

We think it is unnecessary to go into a long statement explaining the merits of these Rifles. Those who have used these arms take pleasure in recommending them to their friends, knowing full well that they never allow an imperfect article to leave their factory. The rifling and boring is done by the finest of machinery, and particular attention is given to have it perfectly systematic, so that one gun will shoot just as well as another. We claim the greatest possible accuracy, which is based upon the testimonials of sportsmen, rifle galleries, and experts with rifle or shot gun. The simplicity of these arms is an important feature. The compactness and portability of them should receive special notice, as the stock can be detached from the barrel in less time than it takes to tell it, thus enabling the owner to put them in an ordinary trunk when traveling.

The success of this company with the 22 long rifle cartridge brought many requests for a rifle between the 22 and 32 caliber; something suitable for small game shooting and target practice. After exhaustive experiments it was concluded that 25 caliber was best suited for that purpose, and a few months ago this company brought to seeming perfection the rifle for the 25 caliber central-fire cartridge. This cartridge has a solid head shell, which can be reloaded an indefinite number of times.

The Stevens 25 Caliber Central-Fire Rifle will shoot with great accuracy at 200 yards, is suited for small game shooting as well as target practice. If a person desires an extremely accurate small bore rifle for this purpose the Stevens 25 Caliber Rifle is superior to all others.

25 Caliber Rim-Fire Cartridge.—The success of the recently introduced 25 caliber Central Fire Rifle has attracted the attention of sportsmen to this bore, and they have been urged to produce a rifle for a rim-fire cartridge of this caliber, as there are many who do not care for a central-fire cartridge, preferring not to reload their shells.

Rifle and Pistol Material.

The great number and variety or multiplicity of Repair Parts for Rifles and Repair Parts for Pistols, on account of the many changes in models, make it impossible to catalogue these goods complete. For the benefit of our Gunsmith trade we now carry in stock all the Standard Material used in the Machine Made Arms which we handle. We will obtain from the manufacturers any parts that are wanted, which we do not keep in stock.

HIBBARD, SPENCER, BARTLETT & CO.

Smith & Wesson Revolvers.

Cut Showing Action of the Automatic Shell Extractor as Applied to all Models of the Smith & Wesson Revolvers.

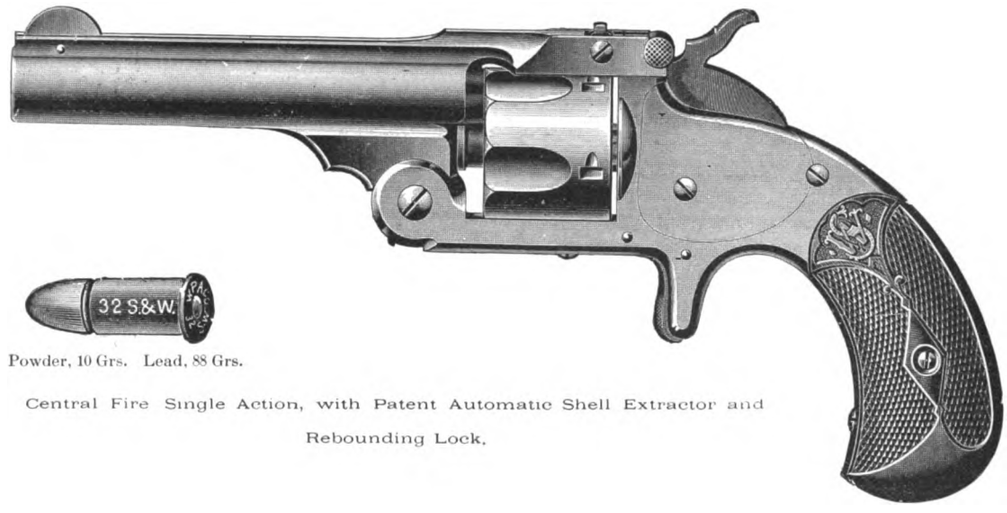

By the action of the Automatic Shell Extractor, the exploded shells are ejected from the cylinder by the simple means of opening the arm, which is then in position for loading. All the chambers of the cylinder being exposed at once, the process of loading is greatly facilitated.

Adopted by the United States Navy, after a series of the most searching trials, in preference to any and all other revolvers, on account of its solid frame and simultaneous ejection, coupled with its wonderful durability. Cut shows the revolver with the cylinder swung out, the ejector being represented in the act of throwing out the empty shells, after which it will be automatically returned to its place in the cylinder, which will then be ready for loading.

XL Bull Dog.

With Folding Hammer.

No hammer to catch when inserting into or withdrawing from the pocket. If used as a single action, when the arm is fired, the hammer returns automatically to its place closed.

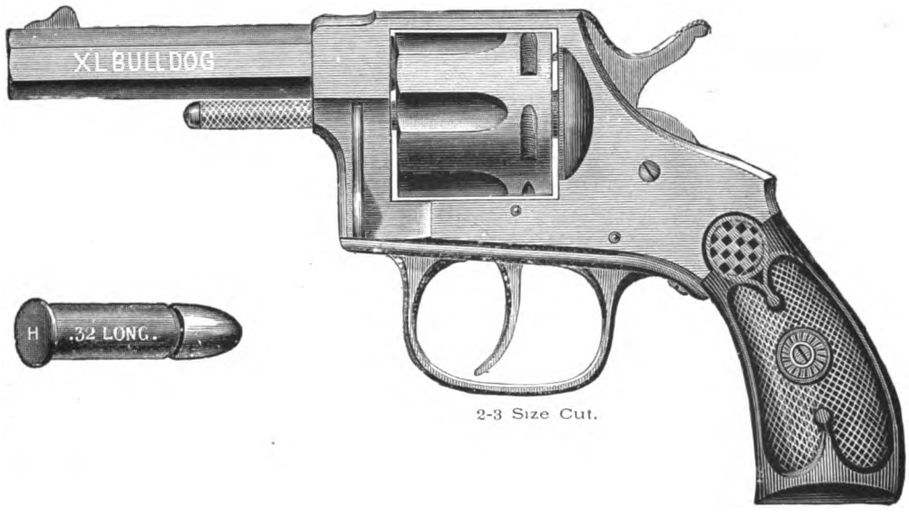

Accidents that have heretofore occurred by the accidental dropping of the arm and its striking on the hammer are entirely avoided by the folding hammer system.

Blasting Barrels, usual length, with thread cut, of size to fit Cartridges, furnished in quantities at reasonable prices.

This cartridge consists of a paper tube thoroughly water proofed, filled with Blasting powder and having the ends closed and sealed by tightly fitting, firmly secured, water proof discs. The cartridge has an external diameter of 1¼ inches scant, and is of various lengths from 4 to 36 inches. The powder contained is of any size grain desired. One of the discs closing the end has an aperture at one side of the diameter of a blasting barrel. This aperture is temporarily closed by means of a plug punched from the discs and re inserted. When used, this plug is pushed out and downward into the powder. The needle or blasting barrel is then inserted in the aperture thus made free, and the cartridge is placed in position, tamped and fired as usual. The Blasting barrel used is intended to have a thread cut on the end to be inserted, and is screwed into the aperture of the disc so as to make a water tight joint.

This cartridge was patented March 4, 1890, and several additional applications for patents are now pending. It has been put to the test in many mines in different parts of the country and under varying conditions, and has proved a great success—miners, operators and mine inspectors commending it in the highest terms. All agree that it is absolutely perfect, can not be improved upon, and is one of the greatest inventions for mining purposes yet made.

Its Advantages Are

First—It is not expensive. Being very simple in its construction, composed of the cheapest as well as the best material, and much of the work being done by machinery, the completed cartridge is placed in the hands of consumers, at a price but a trifle above that of common bulk powder. It is certainly much cheaper than a hand made cartridge, when there are taken into account the time and material required to make it, the powder spilled and wasted in filling it, and the shots often lost because of its imperfections.

Second—It is in line with modern improvements. Progress is the spirit of the age. No one is content to do things in the old fashioned way when there is a better. Consumers are no longer willing to take of manufacturers their half finished goods. Fixed ammunition of all kinds is now required by the trade. There is no reason why there should not be a Blasting cartridge fixed and ready for use.

Third—It overcomes Restrictions. As is well known, powder in the bulk is subject to many annoying and expensive restrictions, imposed by railroad regulations, State laws and city ordinances. With powder put up as proposed in small quantities in paper tubes and then in wooden cases, danger from fire or heat caused by friction is practically eliminated.

Fourth—It is better for the Powder. The paper being a non-conductor of heat and cold and being thoroughly water proofed and the ends water tight, the cartridge is absolutely impervious to dampness. Indeed, it is air tight.

Fifth—It furnishes Powder in just the quantities needed. The miner therefore is kept better satisfied. He is not so likely to be idle toward the end of the month rather than buy a whole keg of powder for the few remaining shots, and so anticipate his wages. Nor will he be obliged to store up powder in dangerous quantities at his home or in the mine.

Sixth—It is a great convenience in firing. The cartridge is always at hand ready for use, and made in the best possible manner. To open the aperture and screw in the blasting barrel is the work of a moment. Being of uniform size and rigid, it is easily shoved into the hole, and there is no danger of getting the barrel detached in placing the cartridge and tamping it. When it is remembered how much trouble it is to make the present imperfect cartridge, and how liable it is to get disarranged and torn in being placed, and the charge, in consequence, be lost, this effort for the miners' convenience will certainly be appreciated.

Seventh—It can be used in wet holes. As already said, the paper and the ends being thoroughly water proofed, and the blasting barrel being tightly screwed into the sealing disc, no water can possibly enter to damage the powder. No matter what the condition of the hole, there is no danger of losing the shot, as is now often the case with the hand made cartridges.

Eighth—It avoids damage to the mine. Through ignorance, carelessness or excusable mistake, an over charge of powder often gets into the holes, and, in firing, the roof, pillars and walls of the mine may be shattered, thus imperiling life and causing delay, extra work and expense. All of this may be avoided by the use of this cartridge.

Powder.

American Wood Powder.

Nearly Smokeless. Produces but Slight Recoil.

DESCRIPTION.	EACH.
Special Grades Trap, Quarter Kegs,	$5 00
Special Grades, Trap, Pound Cans,	85
All Other Grades, Quarter Kegs,	4 35
All Other Grades, Pound Cans,	75

We carry the following Grades in Stock:

Trap.—A Special grade of extra strength, for use in First Quality Arms Only. 12 Bore Trap is very quick, for 12 Bore Guns or smaller. 10 Bore Trap is quick for 10 bore Guns or larger.

Westminister "C."—Medium for general use.

Westminister "B."—Same as "C," but for 10 Gauge. Too slow for smaller Gauge Guns.

Pioneer "D,"—Fine, for small bore Shot Guns and Rifles.

Grade "E,"—Finest for small bore Shot Guns and Rifles.

Wood Powder is lighter in weight than Black Powder but Canisters contain same bulk as similar Canisters of Black Powder.

Non-explosive in Cans and Canisters.

Schultze Powder.

This Powder Must Not be Rammed. Charge for 12 Bore, 3 Drams. 10 Bore, 4 Drams.

DESCRIPTION.	EACH.
Pound Cans,	$1 00
10 Pound Drums,	9 75

Schultze Powder.

The claims on this Powder are: Greater Penetration, Closer Pattern, Less Recoil, Less Report, Less Smoke and Less Fouling than any Powder made. It has no Prejudicial Effect whatever upon the Barrel; is practically unaffected by Damp, and cannot be dried to a dangerous condition.

One pound of this Powder is equal to Two pounds of Black Powder.

Schultze Powder is lighter in weight than Black Powder, but Canisters contain same bulk as similar Canisters of Black Powder.

E. C. Smokeless Powder,

A Smokeless Powder of Great Strength.

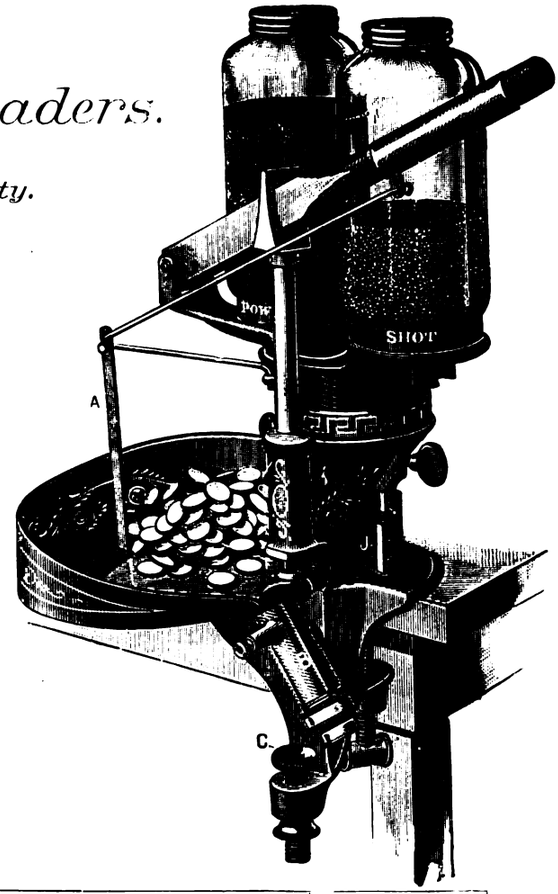

DESCRIPTION.	EACH.
Pound Cans,	$1 00
10 Pound Drums,	9 75

Loaded same as Black Powder. One Pound of E. C. Powder is Equivalent to Two Pounds of Best Black Powder. A Ten Pound Drum of E. C. Powder will not contain Ten Pounds in Weight, but what is Equivalent in bulk to Ten Pounds of Black Powder. The same will apply to the "Schultze" and "Wood."

Belcher's Automatic Cartridge Loaders.

Unequaled Rapidity, Accuracy and Security.

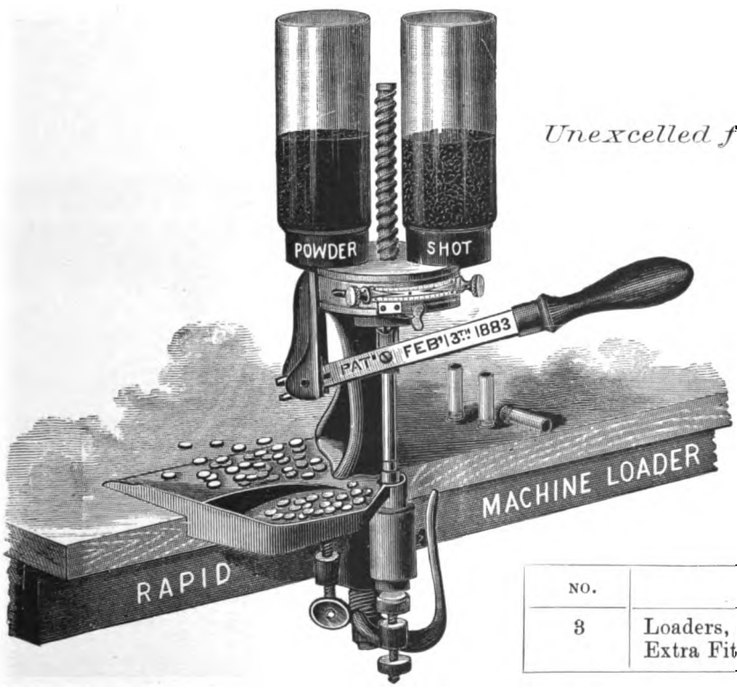

So simple and rapid is the whole operation that, with a little practice, 100 shells can be loaded in ten minutes. A fresh supply of ammunition is then required, which can, in less than a minute, be placed in position for recommencing loading, there being no tube or other intricate device to be filled with wads.

The accompanying woodcut shows the construction of the Loader, the powder being in the left hand jar, the shot in the right, and the wads upon the table. The shell holder, B, is shown as swung to the right, the empty shell having just been inserted. The next operation is to bring the holder to a vertical position, when the base of the shell rests against the head of the screw C. The sleeve, D, is then moved to the right, toward the end of the handle, when the powder runs into the shell. A wad is inserted with the left hand, and driven home by pressure upon the lever with the right. The sleeve is pushed along the handle to the left, when the shot enters the shell. The insertion of another wad and a second pressure of the lever completes the loading

The hexagonal sleeve, J, in which plays a rod attached to the charge measurer, forms an accurate gauge, which is readily adjusted so as to discharge a larger or smaller quantity of powder or shot, the rings on the rod indicating the weights When set for the desired change, the rod is fixed in place by the clamping screw shown.

1100–W	With Wheel, 10 and 12 Gauge, Patent Straight Feed, suitable for all Lengths of Shell, Red Japanned, New Style,	36 00

The Spangler Perfect Crimper.

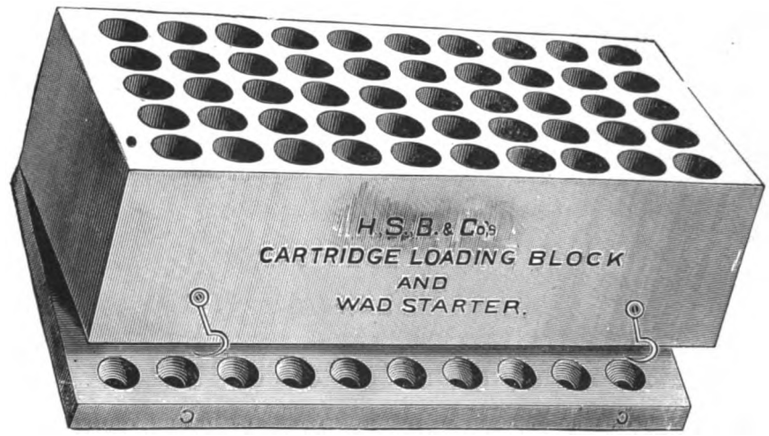

DESCRIPTION.	EACH.
The Spangler Perfect Crimper,	$2 50

This is a new Crimper, and the manufacturers claim for it that it is the only Crimper that will positively crimp every shell alike, no matter what the variation of load may be; the only tool having an automatic plunger which prevents ends of shell spreading toward center of wad. This insures not only uniformity, but entirely obviates the possibility of the load becoming loose. It is especially recommended to all users of Schultze, E. C. and Wood Powder.

Loading Blocks and Wad Starters.

Nos. 20, 020, 30 and 030.

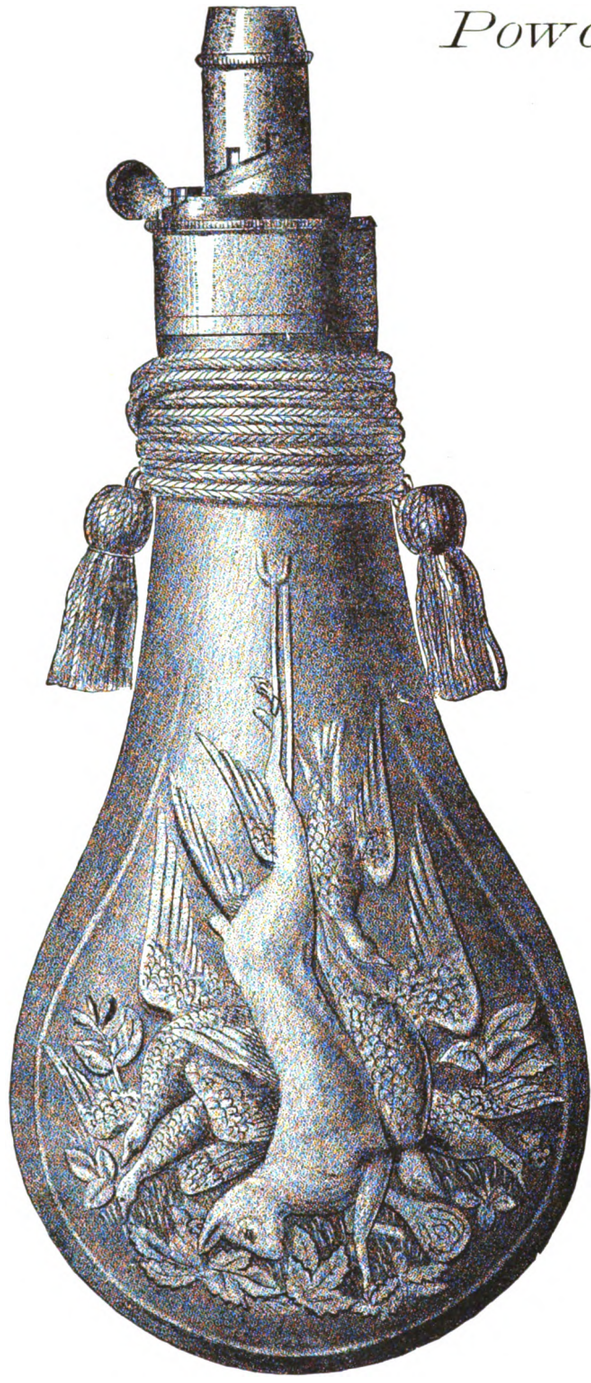

Nos. 50 and 050. Holding 50 Shells.

NO.	DESCRIPTION.	PER DOZ.
20	Holding 20 12-Gauge Shells, with Loader and Wad Starter,	$4 75
020	Holding 20 10-Gauge Shells, with Loader and Wad Starter,	4 75
30	Holding 30 12-Gauge Shells, with Loader and Wad Starter,	5 25
030	Holding 30 10-Gauge Shells, with Loader and Wad Starter,	5 25
50	Holding 50 12-Gauge Shells, with Loader and Wad Starter, very Deep Block,	15 25
050	Holding 50 10-Gauge Shells, with Loader and Wad Starter, very Deep Block,	15 25

Its advantages are, the Depth of Block allowing Shell to be inclosed its entire length—preventing bulging—Convenience and Speed in Loading, Absolute Safety, Economy, no Spilling of Ammunition, Cheapness and Portability.

Police Goods.

Bean's Giant Hand Cuffs. Weight, 10½ oz.

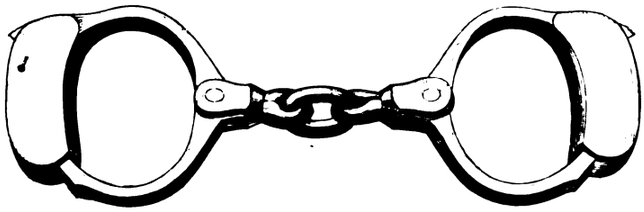

No. 35.

These Hand Cuffs are known as Sheriff's or Detective's Cuffs. They cannot be picked or unlocked by the prisoner even should he have the key. There is but one key hole, and both cuffs are unlocked at same time. Light, strong, and convenient; take up but little space, and are just the thing for Sheriffs and other officers who are obliged to take prisoners a long distance.

NO.	DESCRIPTION.	PER PAIR.
35	Bean's Giant Hand Cuffs, Nickel Plated,	$6 00

Bean's Prison Hand Cuffs. Weight, 17 oz.

No. 31, or Prison Hand Cuff.

With patent Stop-Catch in the Lock, operated by button on the outside of case. The Stop-Catch Prevents them being locked by the prisoner in a struggle with the officer when making an arrest.

NO.	DESCRIPTION.	PER PAIR.
31	Bean's Prison Hand Cuffs, Polished, -	$4 00
32	Bean's Prison Hand Cuffs, Nickel Plated,	4 75

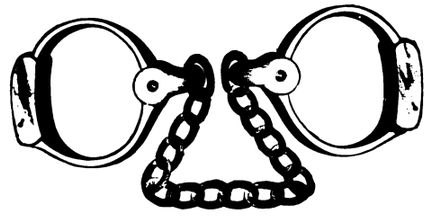

Bean's Detective or Patrolman's Hand Cuffs. Weight, 14 oz.

No. 27. Detective's Pocket Hand Cuffs.

These Cuffs are like the No. 31 and 32, the only difference being in weight, and are specially designed for officers whose duty compels them to carry cuffs on their person at all times.

NO.	DESCRIPTION.	PER PAIR.
27	Bean's Detective Hand Cuffs, Polished, -	$4 00
28	Bean's Detective Hand Cuffs, Nickel Plated,	4 75

Bean's Patent Leg Irons.

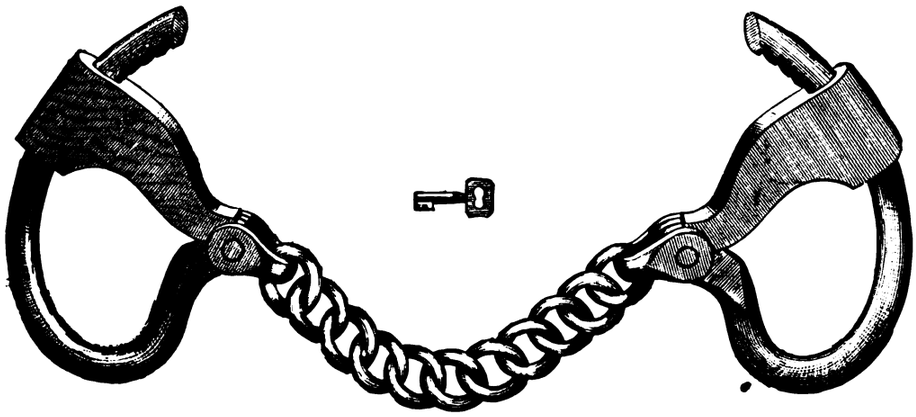

REDUCED DRAWING.

Weight, 27 oz. Same locking device as the Hand Cuffs.

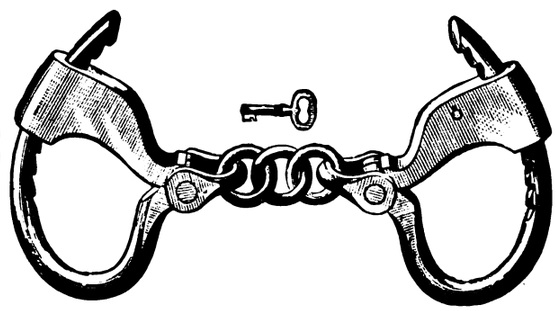

NO.	DESCRIPTION.	PER PAIR.
53	Bean's Leg Irons, Polished, - - -	$6 00
63	Bean's Leg Irons, Nickel Plated, - -	7 00

Tower's Celebrated Double-Locking Adjustable Hand Cuffs and Leg Irons.

The Double Lock is not a mere name, but in fact *two secure Tumbler Locks*, one of which is self-locking, and the other locked with the key. The adjustable feature of these shackles is too well known and appreciated to need any explanation.

NO.	DESCRIPTION.	PER PAIR.
50	Tower's Leg Irons, Polished, - -	$6 00
60	Tower's Leg Irons, Nickel Plated, -	7 00

NO.	DESCRIPTION.	PER PAIR.
30	Tower's Hand Cuffs, Polished, - -	$4 00
40	Tower's Hand Cuffs, Nickel Plated, -	4 75

A—Bullet Mould. B—Loading Chamber. C—Re-capper. D—Bullet Sizer. E—Opening Mouth of Shell.

Ideal No. 6.

No. 4, Ideal Reloading Tools.

NO.	DESCRIPTION.	PER SET.
4	32 Winchester, Model 1873,	$2 50
4	32 Colt's Lightning,	2 50
4	38 Winchester, Model 1873,	2 50
4	38 Colt's Lightning,	2 50
4	41 Colt D-A	2 50
4	44 Winchester, Model 1873,	2 50
4	45 Colt Army,	2 50

This implement is unequaled as a combined tool. It is a complete reloading outfit in itself. As constructed, it performs the operations of capping, decapping, mouth opening, bullet seating, bullet sizing and bullet mold. The mold being situated at the extreme end, enables the operator to cast without running the lead all over the tool and burning his hand. Our extracting device enables us to locate the loading chamber near the pivot, giving great power, so that the work is done with ease. The bullet sizing recommends itself. It makes the only Practical Tool for Colt Cartridges or those having Smaller Heads.

No. 6, Ideal Reloading Tools.

NO.	DESCRIPTION.	PER SET.
6	32-40 Marlin and Winchester,	$3 00
6	38-55 Marlin and Winchester,	3 00
6	40-60 Colt's and Marlin,	3 00

6	45-90 Winchester, Model 1886,	3 00
6	40-85 Ballard, Adjustable Chamber,	4 00

The demand for a Reloading Tool to load the larger sizes of cartridges similar to the No. 4 has induced the manufacturers of the Ideal to produce a No. 6, which will be found to meet the requirements of the trade. It is very complete and simple. The bullet sizer on the Ideal Tools is a great point of superiority over all others. The sportsman desiring a harder bullet uses a percentage of tin with lead. This does not shrink, same as pure lead, and leaves the bullet larger, which swells the shell and sticks the cartridge in the chamber, All this is overcome by forcing the bullet through the die, which will make the size correct.

DESCRIPTION.	EACH.
Ideal Dipper,	$0 50
Ideal Melting Pot,	50
Ideal Stove Cover, for Holding Melting Pot, will fit any Stove,	50
Ideal Bullet Mould,	1 10

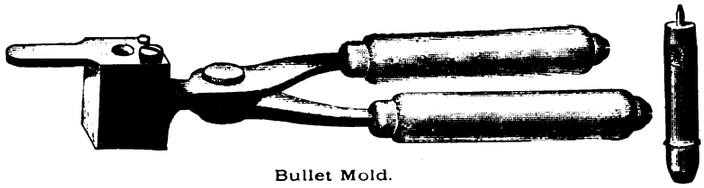

No. 1, Ideal Reloading Tools.

NO.	DESCRIPTION.	PER SET.
1	32 Short Center Fire,	$2 25
1	32 Smith & Wesson,	2 25
1	32 Long Center Fire,	2 25
1	38 Smith & Wesson,	2 25
1	38 Long Center Fire,	2 25

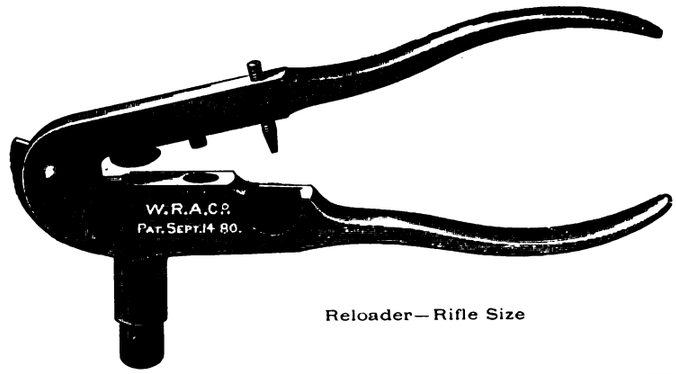

This implement is to supply a long felt want for a small, compact instrument capable of performing all the operations required in reloading small caliber cartridges. As constructed it molds the bullet, expels the exploded primer, reseats the new one, forces the bullet to place, crimps the shell upon it, leaving the cartridge ready for use. Being nicely finished and nickel plated, makes it the most useful as well as the neatest little implement ever made.

40–65	Winchester,	2 00	1 10	10	3 00
40–70	Straight Groved,	2 00	1 10	10	3 00

In offering these articles to the public, the manufacturers believe that they present the most complete and compact article that can be produced. The aim has been to give in one instrument all the functions possible, without complication.

As a matter of economy, many sportsmen desire to have cartridges that will reload. The shells of all center fire rifle cartridges are made of extra thickness for this purpose. Rim fire cartridges cannot be reloaded.

DESCRIPTION.		Reloader	Mold.	Cup	Per Set.
40–70	Straight Patched,	$2 00	$1 10	$0 10	$3 00
40–70	Necked Grooved,	2 00	1 10	10	3 00

50–70	Government,	2 00	1 10	10	3 00
50–95	Express,	2 00	1 70	10	3 50

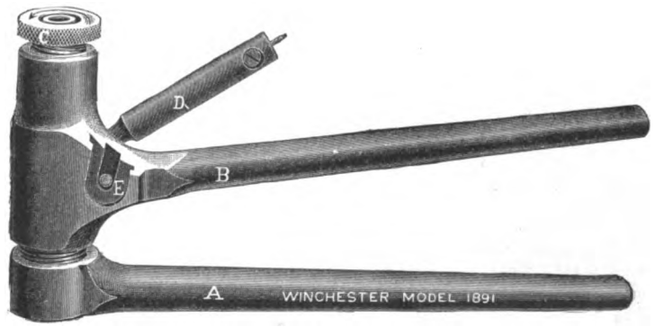

The reloading tool, as constructed, removes the exploded primer, straightens the shell at the mouth, inserts the new primer, and fastens the ball in the shell.

A set of implements comprises the reloading tool, a bullet mold and charge cup.

In ordering, state what particular cartridge is to be reloaded, as only one size can be reloaded with a single set.

The majority of cartridges require no wads in reloading. For such cartridges as require wads, a Wad Cutter will be added to the set at an addition of 50 cents to the list prices.

Model 1891. Reloading Tool.

This model will only be made for the following sizes of cartridges:

SIZE.	DESCRIPTION.	PER SET.
32-40	Winchester,	$3 00
38-55	Winchester,	3 00
38-56	Winchester,	3 00
40-65	Winchester,	3 00
40-82	Winchester,	3 00
45-70	405 Winchester,	3 00
45-70	500 Winchester,	3 00
45-90	Winchester,	3 00
50-110	Express Winchester,	3 00

This tool extracts the spent primer, inserts the new one, reloads and resizes the cartridge. It consists of four pieces, and its use may be readily understood by examing the cut.

Part "D" (the extractor plug), is furnished with a point to knock out the primer, and serves to insert the new primer.

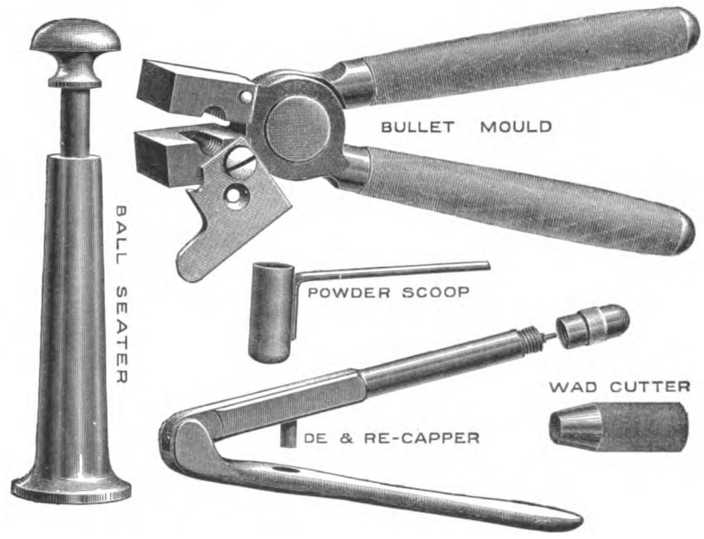

Part "C" is a nut with a *left-handed* screw, which is removed to place the cartridge in the die, and which is replaced to hold the same during the process of loading. It is furnished with a groove, serving to straighten the mouth of the shell.

Part "B," when turned about the die "A," by means of its handle, carries the nut "C" down upon "A," forcing the contained cartridge into the die "A."

Part "A" carries the sizing and reloading die, and is furnished with a handle as shown. This die is the vital part of the tool. The greatest care is taken to make it to the exact size and to give it a fine finish. It should be kept clean and free from rust.

Ballard Reloading Tools.

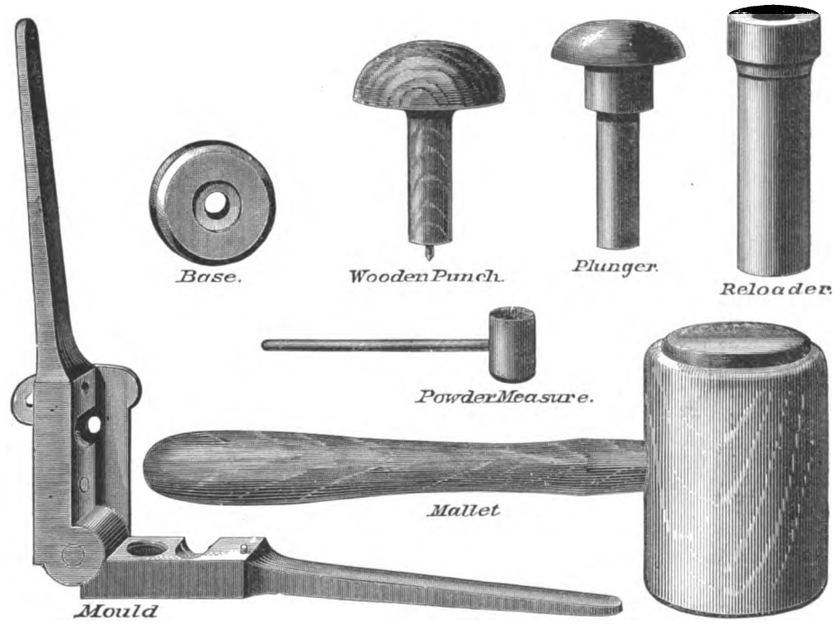

NO.	DESCRIPTION.	PER SET.
32–40	Ballard and Marlin,	$4 00
38–55	Ballard and Marlin,	4 00

NO.	DESCRIPTION.	PER SET.
40–63	Ballard and Marlin,	$4 00
40–85	Ballard and Marlin,	4 00

The above cut shows a complete set of Tools for Ballard Rifle, consisting of 5 separate pieces.
They can be furnished in 32-40, 38-55, 40-63 and 40-85, the present sizes in use.
The Ball Seater simply seats the ball in the shell, not crimping the latter. This is preferable in target shooting, and the only feasible plan when patched bullets are used.

Decoy Ducks and Geese.

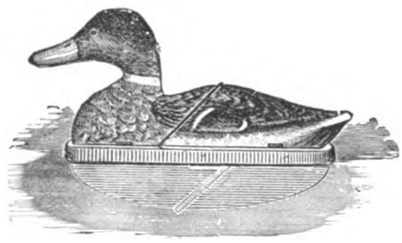

Danz—Style 3.

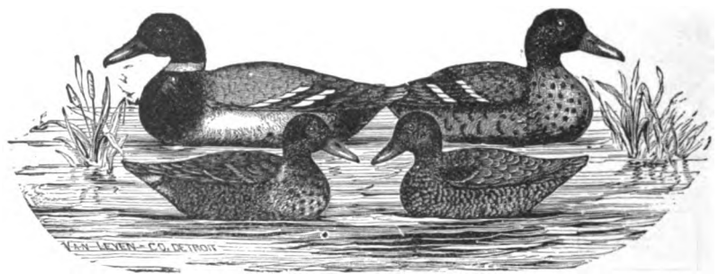

The Danz Double Duck.

Danz—Style 1.

The Danz Single Duck.

K'K'Kee Decoy Ducks.

Kankakee Decoy Ducks.

NO.	DESCRIPTION.	PER DOZ.
1	Decoy Ducks, assorted, 1 dozen in crate,	$9 00
2	Decoy Ducks, assorted, 1 dozen in crate,	7 00
3	Decoy Ducks, assorted, 1 dozen in crate,	5 00

These Decoys are made of best seasoned white cedar, flat bottomed, so that they will float evenly on the water at all times, are well balanced and nicely painted. We carry them in Mallards, Canvas Back or Red Head, Blue Bill and Blue Winged Teal. They are neatly packed one dozen in a crate, assorted one third female and two-thirds male. Nos. 1 and 2 are smoothly finished and painted in natural colors. No. 3 is painted in natural colors, but not as nicely finished as Nos. 1 and 2.

Danz's Profile Folding Decoy Ducks.

DESCRIPTION.	PER DOZ.
Double Ducks, - - - - - - - -	$9 00

These Ducks are designated as Double and Single, and are assorted in Mallard, Canvas Back, Blue Bill, Red Head and Teal.

The Double Duck has a profile hinged to each side of the float, and supported by well secured brass braces. Both the profiles may be alike, or different profiles are put on opposite sides of the float, as preferred.

DESCRIPTION.	PER DOZ.
Single Ducks, - - - - - - - -	$7 50

The Single Duck has but one profile, the reverse side consisting of a folding keel, sufficient to prevent the decoy from tipping over.

Danz's Folding Decoy Geese.

NO.	DESCRIPTION.	PER DOZ.
1	Danz's Profile Decoy Geese, without wings, - - - - - - - - - - - - - -	$ 9 00
2	Danz's Profile Decoy Geese, with wings, - - - - - - - - - - - - - -	15 00
3	Danz's Profile Decoy Geese, with wings, combined, - - - - - - - - - - - -	18 00

Are designated as Style 1, Style 2 and Style 3.

Style 1 is the Profile Goose—without wings.

Style 2 is the same as the above, with the addition of wings. Both these styles have the latest improved leg and necks. The former is pivoted to and always goes with the body. The latter represents a flock of geese, with heads in various positions, adding much to the effectiveness of the decoy.

Style 3, heretofore known as the Combined Goose, is designed for use on both land and water. With its profile, keel and leg, all hinged to a float, it combines the excellences of Style 2 Goose with those of the Single Goose.

Rudolph's Compact Game Carrier.

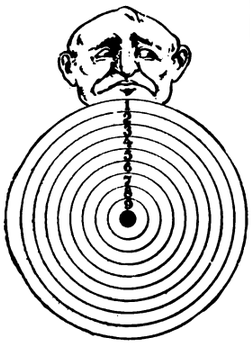

NO.	DESCRIPTION.	PER DOZ.
1	Rudolph's Compact Game Carrier, - - - - - - - - -	$6 00

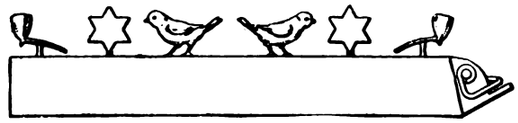

Our cuts illustrate how advantageous such a carrier is to any sportsman. You can carry from one duck to three dozen on either side; each stringer will hold a dozen ducks, or three dozen snipe, and it will take the head of a rabbit as well as a snipe, quail, chicken or goose. May be thrown over the shoulder or saddle, or carried on your cartridge belt, or one or both hands. The entire carrier weighs only three ounces. Each piece of game, when head is pulled through string, is instantly made secure by sliding one of the buttons down upon its neck; when stringer is full remove from ring, tie knot above last bird, and hang up where vermin cannot disturb them.

Standard Gallery Targets.

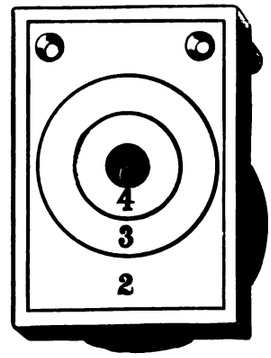

Nos. 21, 22, 8 and 82.

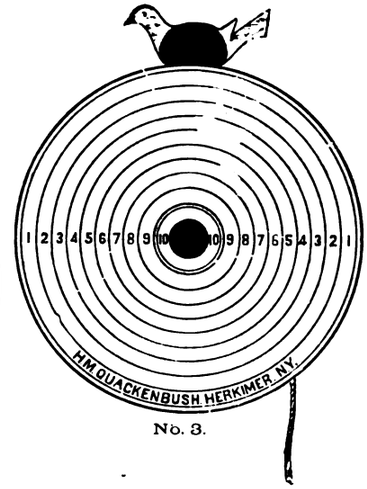

No. 11.

Nos. 18, 19 and 19¼.

No. 12.

No. 3.

NO.	DESCRIPTION.	EACH.
19¼	Plain Round, ⅜ inch Iron, 12 inches Diameter, Assorted Sizes, Open Bull's Eye, for BB Caps. Ringing Gong when Bull's Eye is hit. Self-setting, - - - - -	$1 33
19	Same as No. 19¼, ⅜ inch Iron, with Open Bull's Eye, for 22-100 Cartridges, -	1 67
22	Round, 12 inch Diameter, Entirely of Heavy Iron, for 22-100 Cartridges, Comic Figure Rising and Ringing Gong when Bull's Eye is hit. Reset by Rope from Stand,	4 80
21	Same as No. 22, but made of Light Iron, for BB Caps, - - - - - -	3 67
11x6	Entirely of Heavy Iron, for 22-100 Cartridges, Birds, Stars and Pipes Falling Back when hit. Six objects to shoot at; made for out-door shooting; reset by rope from stand,	4 67
11x8	Same as No. 11x6, but larger, with Eight Objects to shoot at, - - - - -	5 33
18	18 inch Heavy Iron, for 22-100 Cartridges, Open Bull's Eye, - - - - - -	6 00
8	18 inch Diameter, Entirely of Iron, for Flobert or Bullet Breech Cartridges, Comic Figures Rising and Ringing a Gong when Bull's Eye is hit. Reset by Rope from Stand, - - - - - - - - - - - - - - - -	6 67
82	Same as No. 8, Entirely of Heavy Iron, for 22-100 Cartridges, - - - - -	8 67
12	Square, Heavy Iron, Creedmoor Pattern, 200 Yards Target reduced to 25 Yards Practice. This Target can be used in shooting any match with rifles or pistols. The rings, it will be noticed, can be counted with either 5, 10 or 12, as Bull's Eye, so that any of the popular methods may be used. 8x12, ¼ thick, 1 inch Bull's Eye.	2 67

Our targets for out door shooting gallery practice, are made of fine, extra heavy, close grained gray iron, neatly painted all over, and are absolutely the best that can be made for the purpose. The new model patent rings, owing to their peculiar shape, never fill up while being repainted during use, and are superior to any goods of the kind ever put on the market. Each target is complete in itself, and is lettered, showing for what cartridges intended. They can be used as stationary or swinging targets. A complete outfit for shooting gallery can be set up in half an hour. Bull's Eyes may be had of the following sizes: ¼, ⅜, ½, ¾, 1, 1¼ and 2 inches in diameter. The Gongs on 12 inch Targets are *eight inches*, and on the 18 inch Targets are *twelve inches* in diameter. They are made of specially rolled and tempered steel, for this particular use, and are larger and heavier than any heretofore used. Cut shows sectional view of patent rings and heavy center.

H. M. Quackenbush's No. 3 Steel Bell Image Target.

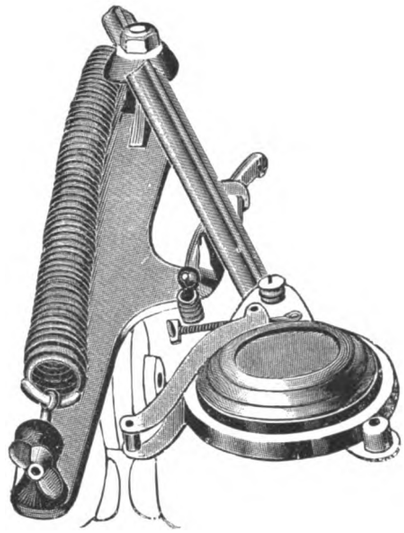

NO.	DESCRIPTION.	EACH.
3	H. M. Quackenbush's Steel Bell Image Target, 12 inches in diameter, weight 11½ pounds, - - - - - - - - - - - - - - - -	$3 75

This Steel Target is adapted for 22 Caliber Rifles, and is a very interesting one to shoot at; it rings a bell vigorously, and throws up a bird when the Bull's Eye is hit. The face is Steel, and graduated from 1 to 10. The whole is a neat, durable affair, well worth the money.

Plain Amber, packed 334 in a barrel.	$12 00

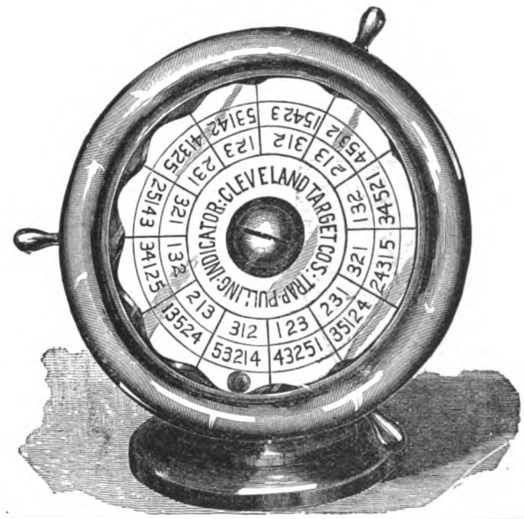

Cleveland Trap Pull.

DESCRIPTION.	EACH.
Pull for three Traps,	$8 00
Pull for five Traps,	10 00

Can be used with any trap. The neatest, most convenient and best in the market.

Cleveland Trap Pulling Indicator.

DESCRIPTION.	EACH.
Cleveland Trap Pulling Indicator,	$2 50

This convenient instrument is designed to give the order in which traps shall be pulled, and to prevent collusion between the shooter and trap puller. As the shooter goes to the score he gives the wheel a whirl. The ball rattles around on the corrugations and finally rests in one of them. The set of figures the ball stops opposite indicates the order in which the trap must be pulled. It answers for three or five traps.

Each,	$1 00

Wind Gauge Sight, with Spirit Level and Three Discs.

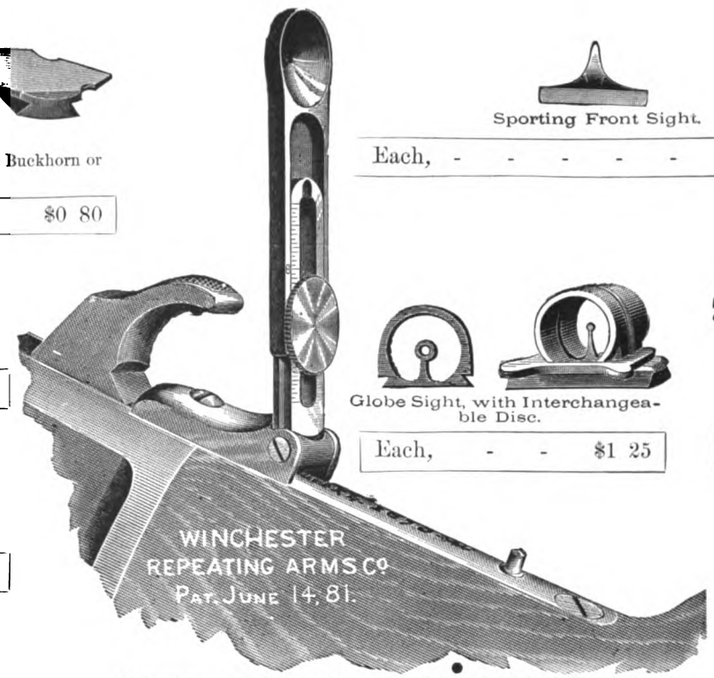

Each,	$4 00
Without Spirit Level,	3 00
Spirit Level,	1 00

The Winchester Barrel Reflector.

For examining the inside of Winchester Repeating Rifle Barrels.

Each,	$0 50

Winchester Folding Peep Sight, for Model 1873 only.

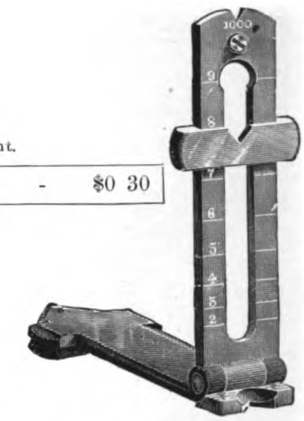

Each,	$3 00

Sporting Front Sight.

Each,	$0 30

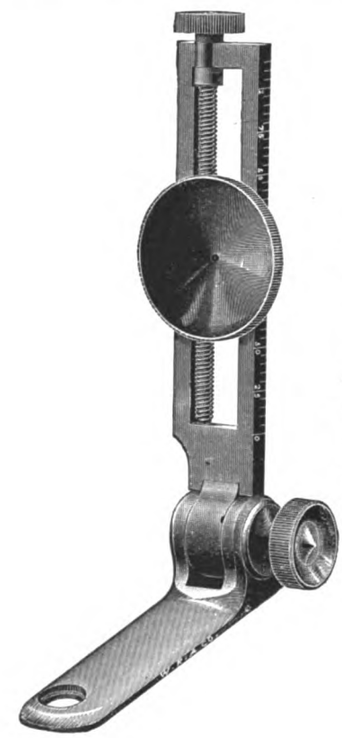

Globe Sight, with Interchangeable Disc.

Each,	$1 25

Sporting Leaf Sight.

Each,	$1 50

Mid-Range Vernier Peep Sight.

Each,	$4 00

This cut shows the Lyman Wind Gauge Sight on an '86 Model Winchester. This Rifle has such a long bolt action that it is necessary to file off one-fourth of an inch from the end of the bolt to prevent its hitting the Sight (see dotted line A). This does not injure the Rifle in any way, but rather improves its looks.

Graduated Peep Sight.

Each,	$3 00

We Carry a Full Stock of Lyman Sights for Winchester Rifles. See Page 1139.

Please be particular to State for what Model Winchester Rifle wanted.

Lyman Sights.

Cut shows effect of Lyman Sight for Hunting. Shows the Front Sight and the object aimed at, without intercepting any part of the view.

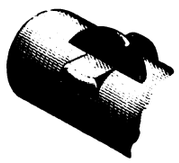

Cut of sight, showing Pin.

DESCRIPTION.	EACH.
Lyman Combination Rear Sight. - -	$3 00

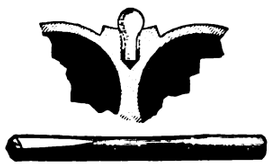

For all Standard makes of Rifles.

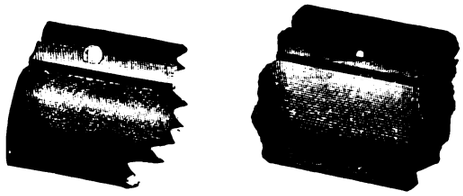

Lyman Ivory Bead Front Sight, - - -	$1 00

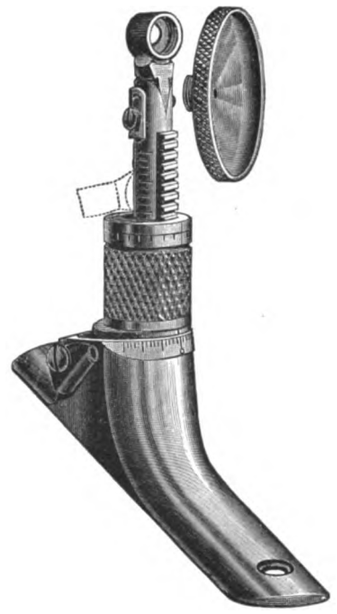

Lyman Ivory Front Hunting Sight, - -	$0 50

Reamer.

Lyman Ivory Shot Gun Sight, Front, - -	$0 50
Lyman Ivory Shot Gun Sight, Rear, -	0 50

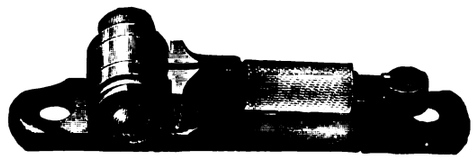

DESCRIPTION.	EACH.
Lyman Wind Gauge Sight, - - - - -	$5 00

For all Standard makes of Rifles. The Best Target and Hunting Sight Made.

The optical principle involved in this Sight is entirely new in its application, and is more easily seen than explained.

When aiming, this Sight has the appearance of a ring or hoop, which shows the Front Sight and the object aimed at, without intercepting any part of the view.

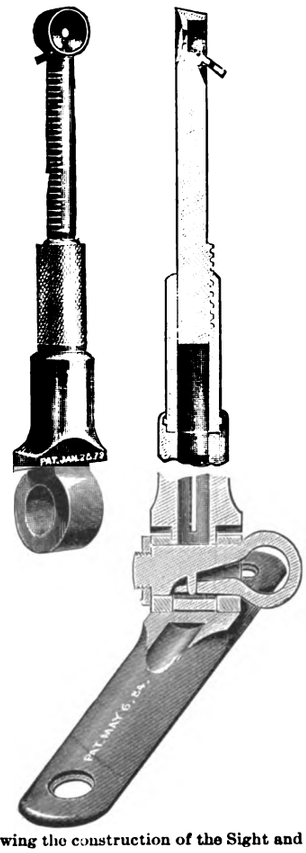

Lyman Sight Folded.

Cut showing the '86 Model Winchester Rifle with the action open. The Firing Bolt does not hit the Sight in loading.

It is often the case that a purchaser buys the wrong kind or size of Sight for this Rifle. For instance, he gets a Ballard Sight for a Marlin Repeater, and as the firing bolt knocks it down every time the gun is loaded, it is not a satisfactory Sight to use

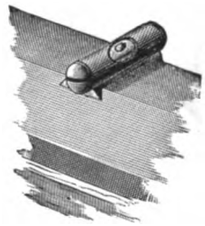

Cut showing the construction of the Sight and Base.

Blank piece to replace the rear crotch Sight, which is usually on the barrel when the rifle is purchased. Rear Sight should always be removed.

DESCRIPTION.	EACH.
Blank, - - - - - - - - - - -	$0 25

Spirit Level, to replace Rear Sight on Barrel, - - - - - - - - -	$1 00

Lyman's Patent Combination Rear Sight, applied to the Winchester Rifle, Model 1873.

We keep in Stock these Sights, adapted to all the Standard Makes of Arms.

ALWAYS GIVE NAME AND CALIBER OF RIFLE WHEN ORDERING LYMAN SIGHTS.

Heikes' Hand Protectors.

A Protection to the Hand from Hot or Cold Barrels.

DESCRIPTION.	EACH.
Heikes' Hand Protectors,	$1 00

In Ordering Give Gauge of Gun it is Wanted for.

It is a neat, small, half-roll of the finest spring steel so shaped by machinery, constructed for that purpose, that it fits snugly on the gun at the point where the hand grasps the barrel. It covers the underside of the barrel only about six inches—just enough to give the hand a good firm hold. It is covered with a fine grade of leather—a non-conductor of heat or cold. It takes but a second to slip it on or off of the gun. It is light—only weighs three ounces. It fully protects the hand grasping the barrel from heated or very cold barrels. The risk of a mangled hand from a bursting gun barrel at this point is reduced to an absolute insurance against such an accident. It fits the gun so snugly that anyone not perfectly familiar with seeing them would not know that you had anything on the gun not belonging to it. A good score means that the marksman must be comfortable. The Hand Protector enables the trap-shooter to score from five to ten more birds in every one hundred. This has been demonstrated by thousands of the best marksmen in this country who use them. It enables anyone using it to fire any number of shots in rapid succession without the slightest inconvenience from heated barrels. A cold gun barrel is nearly as bad as a hot one. The Hand Protector is as necessary in the field as at the trap. It covers the cold barrel and the hand is comfortable.

Crosby Combined Hatchet, Belt and Sheath.

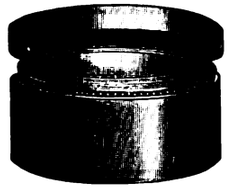

For Hunters.

Spring Lake Clinker Boats.

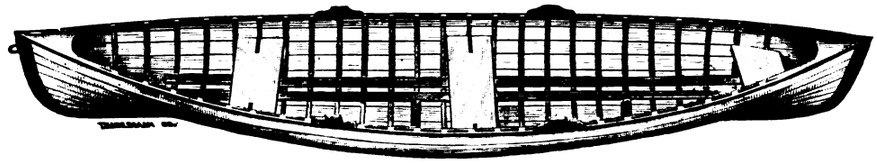

Duck Boat—Grade C.

DESCRIPTION.	EACH.
Length, 14 feet; beam, 32 inches; depth at ends, 17 inches; depth midship, 10½ inches; number seats, 2; seating capacity, 2; weight, 80 lbs.,	$30 00
Length, 16 feet; beam, 36 inches; depth at ends, 20 inches; depth midship, 13 inches; number seats, 3; seating capacity, 3; weight, 110 lbs.,	35 00

Oak keel, stems, ribs and gunwales. Planking pine. Seats fastened with two knees on each seat, sassafras or ash breast hook. Painted inside and out, with ribs, seats, clamps, gunwales and breast hooks finished in natural color of wood. Malleable Iron rowlocks. One pair straight ash oars. Movable platform and bottom boards.

Fourteen-foot boat has one pair rowlocks. Sixteen-foot boat has two pair rowlocks, trim with one to three persons. Ten-foot punting oar, extra $2.00.

No. 4—15 Feet.

DESCRIPTION.	EACH.
Length, 15 feet; beam, 40 inches; depth at ends, 21 inches; depth midship, 13 inches; number seats, 4; seating capacity, 4; weight 110 lbs.,	$28 00

These Boats were built originally to supply a popular demand for something *cheap*. Having greatly excelled our most sanguine expectations in meeting this demand, we take great pleasure in calling attention to their many merits. They are used as a hunting, fishing and family boat, being in great favor with tourists, who wish a boat for a season only, then laid aside or disposed of at a little sacrifice.

Oak keel, stem, stern and ribs. Gunwales oak or ash. Pine seats, fastened with iron knees. Ash or oak breast hook. Planking pine, fastened with iron nails and screws. Painted throughout Iron stem bands. Galvanized malleable iron rowlocks.

No. 4—13 Feet.

DESCRIPTION.	EACH.
Length, 13 feet; beam, 36 inches; depth at ends, 19 inches; depth midship, 12 inches; number seats, 2; seating capacity, 2; weight, 75 lbs.,	$25 00

Oak keel, stem, stern and ribs. Gunwales oak or ash. Pine seats, fastened with iron knees. Ash or oak breast hook. Planking pine, fastened with iron nails and screws Painted throughout. Iron stem bands. Galvanized malleable iron rowlocks. One pair straight ash oars.

No. 5—Square Stern.

DESCRIPTION.	EACH.
Length, 15 feet, 8 inches; beam, 38 inches; height stem, 22 inches; height stern, 21 inches; depth midship, 12 inches; number seats, 4; seating capacity, 4; weight, 120 lbs.,	$40 00
Length, 15 feet, 8 inches; beam, 42 inches; height stem, 24 inches; height stern, 23 inches; depth midship, 14 inches; number seats, 4; seating capacity, 5; weight, 140 lbs.,	45 00
Rudder and Yoke, extra,	2 00
Lazy Backs, extra,	3 00

These Boats are the safest, lightest, most durable and popular fishing and family boats afloat. Owing to their moderate cost and satisfaction given, they are in great demand. We claim they are the best boat in the market for the money.

Oak keel, stem, stern and ribs. Gunwales oak or white ash. Pine or white ash seats, fastened with four iron knees on each seat. Ash or Oak breast hook. Planking pine, fastened with iron nails and screws. Two pairs galvanized iron rowlocks. One pair straight ash oars. Iron stem band. Movable bottom boards. Painted throughout.

Fishing Rods.

Horton's Patent Tubular Steel Fishing Rods.

No. 185.

Telescopic and Jointed.

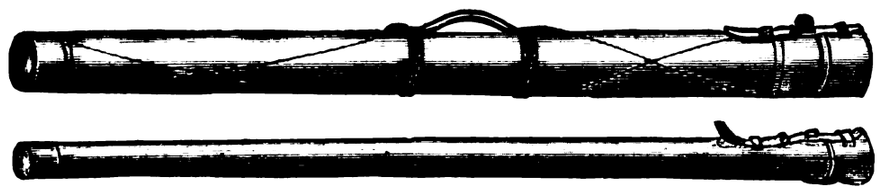

NO.	DESCRIPTION.	EACH.
174	Bass Rod, Telescopic, length 10 feet, Celluloid Handle, Full Nickel-Mounted, with solid Reel Seat above hand; each length is banded at smaller end with standing Ring Guides; line runs on outside through the Ring Guides; when telescoped the Rod is 37 inches in length; weight 10 oz.,	$8 50
175	Bass Rod, Jointed (not telescopic), length 10 feet, Celluloid Handle, Nickel-Mounted, with Solid Reel Seat above hand; each length is banded at smaller end with standing Ring Guides; weight 10½ oz.,	9 50
177	Extra Fine Bass Rod, Jointed (not telescopic), Full Nickel-Plated, with Agate Guides and Tip, Celluloid Handle; the most elegant Rod made; length 8½ feet; weight 10 oz.,	14 00
181	Fly Rod, Telescopic, length 10 feet, Celluloid Handle, Full Nickel-Mounted, with Solid Reel Seat below hand; line runs through the center of Rod; when telescoped the Rod is 37 inches in length; weight 10 oz.,	7 50
183	Fly Rod, Telescopic, length 10 feet, Celluloid Handle, Full Nickel-Mounted, with Solid Reel Seat below hand; each length is banded at smaller end with standing Ring Guides; line runs on outside of Rod through the Ring Guides; when telescoped the Rod is 37 inches in length; weight 10 oz.,	8 50
185	Fly Rod, Jointed (not telescopic), length 10 feet, Celluloid Handle, Nickel-Mounted, with Solid Reel Seat below hand; each length is banded at smaller end with standing Ring Guides; weight 10½ oz.,	9 50

The Telescopic when in use are threaded on wire, running through inside of tube; each joint locks 2½ inches; when closed are very compact and therefore easily taken care of in transportation; line runs through the center of Rod.

The Jointed have the same advantages as the regular Wood Rods, with Standing Ring Guides on outside of Rod, with perfect action, balance and Elasticity of the steel.

These Rods have had a thorough test, and are growing in popularity. With proper care, oiling after using, they will last a lifetime.

Merits.

The Perforated Spool, allowing the line to dry on Reel quickly.

The greater power obtainable, combined with speed, the handle being fastened at the furthest possible point from center of Reel. It is an acknowledged fact in all gearing that what is gained in speed is lost in power. These Reels being direct-acting and having a large diameter of spool, overcome this fault of multiplying Reels, while retaining their speed.

Lightness consistent with strength, and very free running.

The index click on Nos. 3340, 3140, 3340, 34100 and 34250 can be thrown off at will.

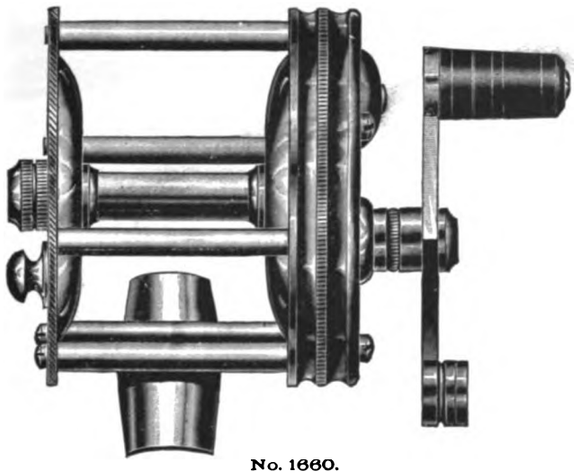

All these Reels are finely polished, heavily nickel-plated and well made.

The Nos. 3440, 3540, 34100, 34250, 35100 and 36150 have an entirely new device for use in casting or "playing" a fish, whereby the angler may vary the reel from a free-running to a delicate drag, heavy drag or bring it to a complete stop, simply by the pressure of the thumb upon the guard. By this device the line may be stopped instantly at any desired point when casting. This guard is made of extra hard spring metal, so that no matter how often used or struck by accident, it will resume its original position.

Fish Rod Holders.

For trolling and still fishing in a boat. It can be fastened either to the gunwale or seat. It enables a person, if he desires, to go fishing without a guide to row for him, or to have two or three rods in use without their being all over the bottom of boat to be stepped on and broken. By means of a thumb screw it can be adjusted to any angle or any direction, as it works on a ball and socket joint. It is neatly and strongly made, and tinned.

Rudolph's Jointed Ring Landing and Dip Net Handles.

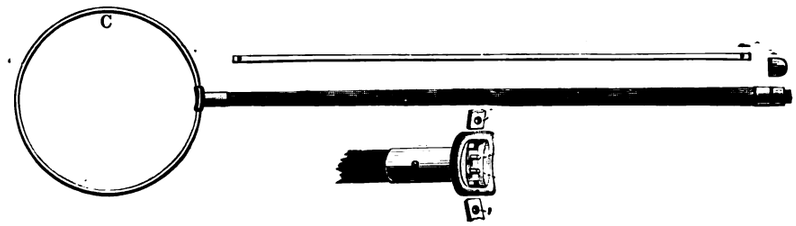

Patented 1890.

NO.	DESCRIPTION.	PER DOZEN.
7	Short, or 31 inch Landing Handle and Ring,	$31 50
8	Long, or 48 inch Dip Net, Handle and Ring,	36 00

The strongest and most compact of any in the market. The Ring is jointed in the middle and so arranged as to admit its being put away in a 31 or 48 inch handle. It is absolutely impossible to pull or spring out the ring when adjusted. It is plain, simple, rigid and durable.

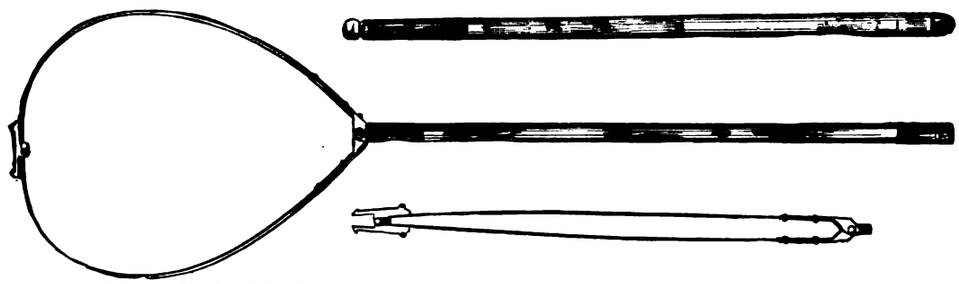

Bailey's Landing Net Ring and Handle, with Net.

NO.	DESCRIPTION.	PER DOZEN.
1	12-inch Ring, 3½ foot Handle,	$30 00
2	14-inch Ring, 4 foot Handle,	32 00

The ring is made of best spring Brass with eyed ends, and is carried inside the Bamboo Handle. When wanted for use, the ends of the ring are simply passed through the slots in the ring holder until the spurs enter the eyes, when the natural spring of the metal presses the ends down, holding the ring firmly and securely in position.

Harrimac Patent Steel Net Rings and Staffs.

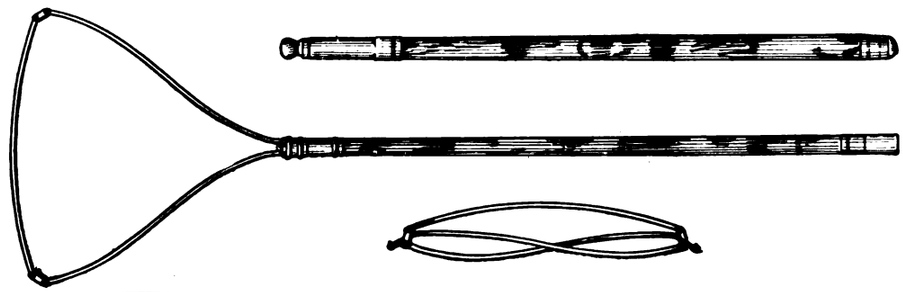

NO.	DESCRIPTION.	PER DOZEN.
4	Harrimac, without Net,	$27 00
5	Trout Size, without Net,	30 00

No. 4. Rings made of the best tempered steel and japanned, with nickel trimmings. The net is left on the ring when not in use, and may be expanded for use in an instant. Size of ring 12x15 inches, length of jointed staff 4 feet. Put up in a partitioned cloth bag.

No. 5. Same description as No. 4, but size of ring 7½x10½ inches, length of handle 12 inches.

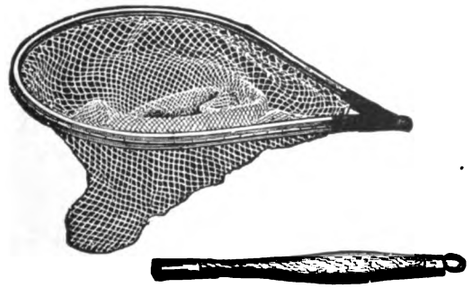

Triplex.

NO.	DESCRIPTION.	PER DOZEN.
6	Triplex, without Net,	$21 00

This staff is especially adapted for a bait net; the net can be slid on frame without sewing. Made of brass and nickel plated; length of jointed staff 4 feet. Put up in a partitioned cloth bag.

Landing Net, Ring and Handle, With Net Complete.

NO.	DESCRIPTION.	PER DOZEN.
10	Wooden Frame Landing Net,	$18 00

This Cut is a *fac similie* of our wooden frame Landing Net, with screw-off handle, a very complete and necessary part of a fishing outfit.

Rudolph's Ventilated Tackle Boxes.

Each tray is made of perforated tin, concaved, with double bottoms to each division, thus enabling the contents to be kept perfectly dry and free from rust or accumulation of dust. The concaved bottoms to divisions enable one to readily draw any article ever so small from any part of the trays, there being no corners. The divisions are carefully arranged so as to hold Hooks, Lines, Sinkers, Fly Book, etc., lines on original blocks, tools, stringers, etc., in bottom, and a roomy place for two or more reels. Handsomely ornamented and japanned in green. These boxes are made in two sizes.

NO.	DESCRIPTION.	EACH.
1	Medium, 7 x 9½ x 3 deep, - - -	$2 63
2	Large, 7½ x 12½ x 4½ deep, - -	3 75

Rudolph's Pocket Tackle Box.

NO.	DESCRIPTION.	EACH.
5	Rudolph's Pocket Tackle Box, -	$0 50

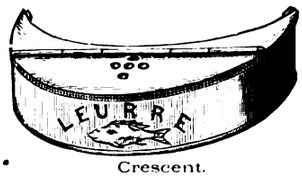

There is a perforated creel to hold the lines or gut leaders, two circular trays to hold assortments of hooks, swivels, flies, hooks on gut, etc.

It makes an admirable Leader or Fly Box. The entire box so compact as to fit in the hip pocket almost unobserved. The box is fitted with stout brass hinge, and suitable fastening.

Brooks' Line Drying Reel.

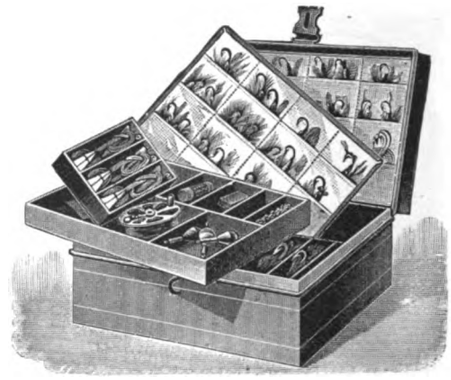

DESCRIPTION.	PER DOZ.
Brooks' Line Drying Reel, - - - - -	$18 00

This is a new device, intended to be carried in the tackle box, for drying fishing lines, also transferring a new line from the original block to the rod reel.

This reel can be fastened on the cover of the tackle box, as shown in the cut, or the end of the shaft can be placed in the crevice of a fence, or other convenient place; also held in many other ways, for winding on the line to dry, and re-winding the dry line back again on to the rod reel. Several lines can be dried on it at once.

Borcherdt's Box.

These Boxes have a series of pockets, as shown in the cut. They are made of waterproof parchment paper, reinforced with tape, and are folded into two pieces of tin, one of which is permanently attached to the cover, and the other movable attached by a single turn buckle, rendering the contents of the pockets readily accessible. This device practically doubles its capacity.

Borcherdt's Tackle Box.

NO.	DESCRIPTION.	EACH.
3	7 x 9½ x 3, - - - - - -	$3 25
4	7½ x 12 x 4½, - - - - -	5 00

Rudolph's Steel Hook Extractor.

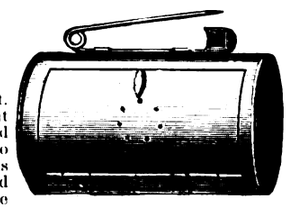

DESCRIPTION.	PER DOZ.
Rudolph's Hook Extractor, - - - -	$2 30

To extract a hook out of the fish's mouth or belly you simply pass the line through the slot in the tube, then run the Extractor down the line until it will go no further; let the hook drop into the notch, then pry it out the way it went in.

Rudolph's Adjustable Bait Box.

NO.	DESCRIPTION.	PER DOZ.
18	Rudolph's Adjustable Bait Box, -	$5 40

Handiest and most sensible Bait Box on the market. It is round, roomy and out of the way; has a stout safety pin swiveled to back to enable its being attached to side of waist or carried in pocket if desired. No necessity for the wearing of a belt to hold it on; is nicely japanned and ornamented; the fastening to lid enables you to open and close the box and remove the bait instantly with one hand, avoiding the necessity of laying down your rod.

Rudolph's Fishing Specialties.

Rudolph's Floating Minnow Buckets.

Bucket Complete.

New Pattern.

Noiseless. The handiest, lightest and most complete Minnow Bucket ever put on the market. Will not sink. Free circulation of air and water. Attracts the fish to it, *thereby making good fishing around the bucket.* No loss of bucket or bait should you drop it overboard. When you arrive at the lake, drop the inside bucket in the water, where it will remain on the surface; the waterproof wire making it so open that it affords full flow of fresh water all the time, bringing to your minnows the insect food upon which they exist, as well as attracting other fish to it.

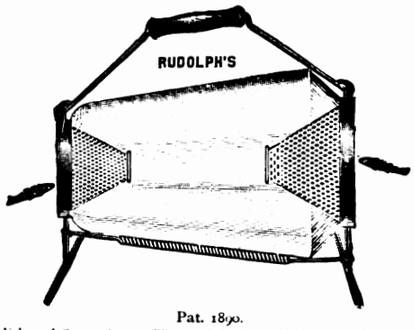

Quarts, - - -	6	8	10	12
Per Doz., - -	$17 60	$20 80	$23 15	$25 24

Inside Buckets are made of strong Galvanized Wire Cloth.

Inside Bucket.

Rudolph's Minnow Traps.

Pat. 1890.

This is a revolution in Minnow catching, far superior to, and one-fourth the cost of a Minnow Seine. No wading, dragging, rotting or tearing, as is necessary in using the seine. Place a small quantity of the bait or bread crumbs in the trap, and set it in the water. The minnows can be removed instantly. If set in the water half or two-thirds its depth, the minnows will live in it for days. Each trap is packed in a light wooden box, with hinged lid and fastening. The entire is so light as to be readily carried with one hand.

DESCRIPTION.	EACH.
Rudolph's Minnow Traps, - - - - - -	$3 25

Rudolph's Minnow and Trout Bait.

DESCRIPTION.	PER DOZ.
Rudolph's Minnow and Trout Bait, in 8 oz. boxes,	$3 75

Put up in half-pound boxes for baiting traps and fishing waters.

Rudolph's Patent Floating Fish Decoys.

The Decoy is just the thing claimed to be. It is made of strong, waterproofed galvanized wire, with a float attached to lid to prevent its sinking. Put a number of fresh minnows in the Decoy, then put it in a stream of lake or fresh water, keep quiet for a while, and if there are any fish within 50 feet of it on either side of the Decoy, they will see the minnows through the clear water and gather around it. Drop your hook with a bait on it in their midst, and you are sure of a bite immediately. This is an absolute certainty. We don't say it will attract fish where there are none. These Decoys can be sunk to any depth by placing weight inside of Decoy.

DESCRIPTION.	EACH.
Rudolph's Patent Floating Fish Decoys, - - - - - -	$1 00

The Harvard Ice Top Minnow Pail.

Is neatly japanned, well proportioned and designed to fill the wants of the Tin and Hardware trade, as well as the dealer in Sporting Goods, for a low-priced Pail. It has a perforated Ice Top cover to enable one to carry a lump of ice on top to keep the water cool and minnows fresh.

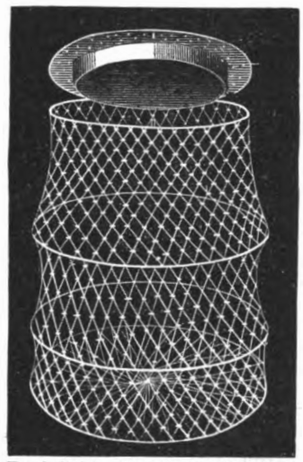

Quarts, - -	6	8	10
Per Dozen, -	$9 66	11 78	13 97

Rudolph's Floating Live Nets.

When Not in Use.

It is designed to furnish the angler with an instrument for keeping his fish alive, fresh and within reach; impossible for them to escape, and if left over night in the water they are as fresh in the morning as when caught. When shut it is very portable, and about as thick as your hand.

Inches, -	10	12	14
Each, -	$1 50	1 65	1 80

Rudolph's Floating Live Net.

Rudolph's Floating Minnow Pockets.

Pat. July 25, 1884.

When in Use.

When several ladies and gentlemen go fishing together they may provide themselves with a Floating Minnow Pocket each, so that when they arrive at the fishing grounds, each may have their own minnows, avoiding the necessity of more than one minnow bucket in the party. When not in use, are so small they will go in an ordinary coat pocket, and no thicker than your hand.

When Not in Use.

DESCRIPTION.	EACH.
Rudolph's Floating Minnow Pockets,	$1 25

Rudolph's Popular Wood Polish.

Works a wonderful effect in brightening up and renewing the appearance of your fishing rod as well as forming a waterproof covering.

Rudolph's Popular Wood Polish, per dozen, -	$3 00

Rudolph's Nickeled Drinking Cup.

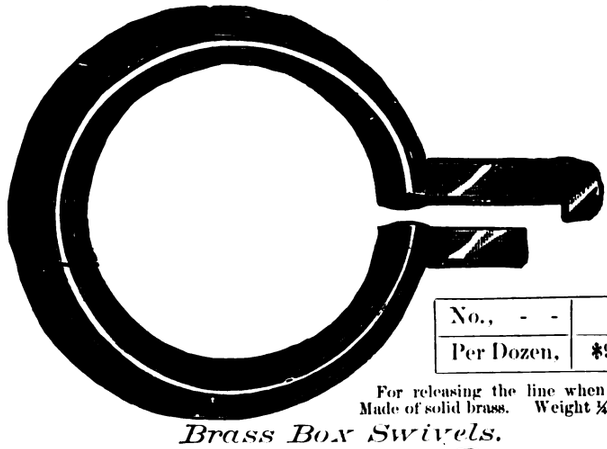

Pat. 1890.

Especially designed for sportsmen, anglers, etc. Made in one piece, no seam or handle to come apart, is heavily nickel plated, has stout safety pin swiveled on so that it can be attached to any portion of waist. The cup being nickeled on heavy tin, makes it very durable and prevents its either rusting, corroding or tasting in use of water, lemonade or liquors of any kind

No., - - - - - -	2

Rudolph's Safety Chain Fish Stringer.

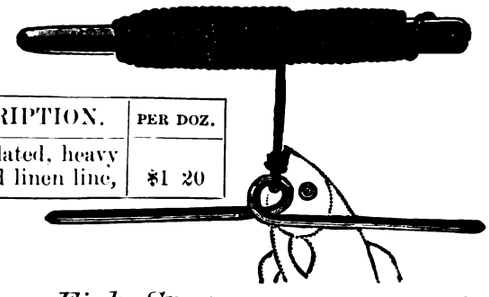

Made from best brass safety links. The round pointed needle and bar are soldered on and so adjusted as to be utterly impossible to pull out, and being heavily nickeled, will not corrode or rust in any water, making it indestructible and last a lifetime. Nothing so desirable to tug heavy strings of fish behind your boat. Are made in small size for ordinary fishing and large size for muscallonge, etc.

Any other length, depth, size twine or size mesh, including tapering Seines, or Seines with wings, in proportion.

These Seines are all of best Cotton Twine, tanned or white as desired; Cork line ¼ inch Manila hemp tarred, and bottom lines of ¼ inch Manila hemp tarred, doubled, with reversed twist to prevent rolling.

Special prices named for extra large Seines. Tarred Seines and Seines with heavy bottom lines, ½ inch to 1¼ inch rope, cost 5 cents to 20 cents per yard additional to above figures.

All *tarred* work is at *owner's risk*. We allow nothing to leave our hands that is not in perfect condition, but cannot assume any further responsibility for this class of work. We use Pine Tar only.

Netting for River Seines.

Size of Mesh as given is always Square or Bar Measure.

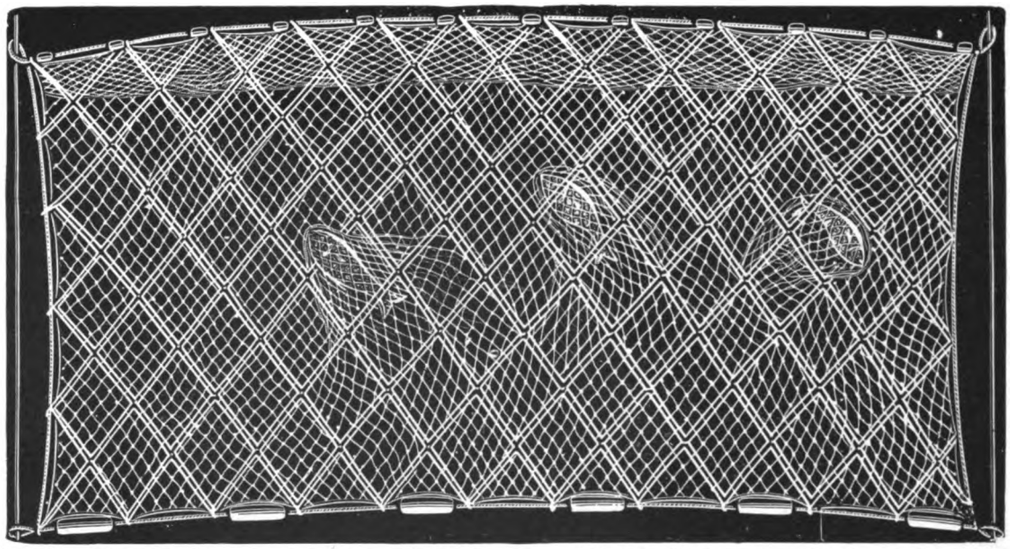

DESCRIPTION.	PER POUND.
9th Soft Twine, 1, 1¼ or 1½ inch Mesh, - - - - - - - - - - - - - - - -	.49
12th Soft Twine, 1, 1¼, 1½, 1¾, 2 or 2½ inch Mesh, - - - - - - - - - - - - - - -	.45
16th, 20th Soft Twine, 1, 1¼, 1½, 1¾, 2 or 2½ inch Mesh, - - - - - - - - - - - - - -	.42
12th Medium Twine, 1½ or 2 inch Mesh, - - - - - - - - - - - - - - - -	.45
15th or 18th Medium Twine, 1¾ or 2¼ inch Mesh, - - - - - - - - - - - - - -	.42

The Netting or Web only, to make a Seine of any given depth, size twine add size mesh, under 30 yards in length, will cost one-third less than price of same Seine complete as given above. Thus, a Seine complete, 12th, 1½ inch, 50 feet x 7 feet, costs $6.75. The netting only to make the Seine would cost one-third less, or, say $4.50.

For *Tapering* Netting, a small additional charge will be made, equal 5 to 10 cents per lb., to cover cost of extra labor.

New Mail No. 3, Ladies' Pattern.

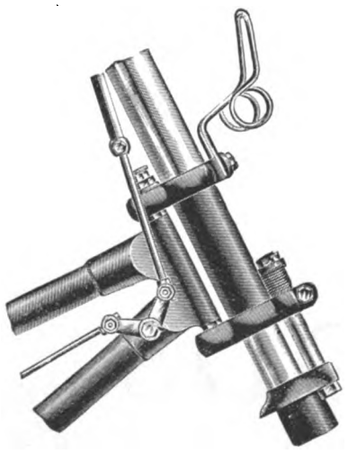

Credenda Tubing, Cushion Tires, Ladies' Pattern Garford Saddle, very easy, Tangent Spokes, Half Nickeled. Of Finest Material with Brazed Frame. A Beautiful Wheel.

Bicycle riding for ladies is commendable, inasmuch as it tends to draw them from their sedentary indoor existence, and gives them outdoor exercise.

When Ladies' Bicycles were first talked of, it was said "They will do very well in England where private grounds are surrounded by high walls, but they can never become popular in America where there are no walled-in estates; no lady will ride on the public highways; they will never ride bicycles." To-day in every city and town there are to be found lady riders.

New Mail No. 1, Highest Grade.

No. 1.

Trigwell Ball Bearing Head, Garford Saddle, Spring Fork, Rear Axle Band Brake, Bown's Aeolus Ball Bearings, Cushion Tires.

DESCRIPTION.	EACH.
No. 1 New Mail Safety, All Improvements, including Cushion Tires, - - - -	$135 00

We feel that in offering the New Mail Bicycle as improved for 1891, that we are placing before the public the best and strongest Bicycle made. Veteran Bicycle Riders will remember that no rider of the New Mail has ever changed his mount. Once becoming acquainted with the merits of this wheel, the owner cannot be induced to ride any other. While other manufacturers have employed expensive advertising experts, racing men, "makers amateurs," under salary and heavy expense, to exhibit the paces of their machines, and have spent thousands of dollars in all sorts of advertising schemes, showy engravings, expensive catalogues, calendars, the makers of the New Mail have quietly spent their time and money toward the improvement of the machinery for making the wheels and in securing whatever new patents and improvements have been demonstrated to be of actual worth. Every point has been studied to obtain an easy running and a true running wheel, and we believe these qualities are accorded to the New Mail, while also we think it is conceded to be the handsomest Safety made. No wheel in the market is its superior in construction and material. All parts are interchangeable, and every wheel passes the strictest inspection before shipment. By this care in construction and nicety in every detail, New Mails have stood the severest tests and won many leading events in road and path competitions. Mr. Murphy rode a New Mail Ordinary 12,890 miles in two years and gave a splendid testimonial. Mr. A. M. Beers rode a New Mail Safety 8,368 miles in one season, winning the medal for long distance riding of that year, and also testified to its splendid qualities. Such performances and testimonials from such judges of wheels are convincing proofs of the worth of cycles. The New Mail has features which are found in no other make, and which we claim are improvements, and these should be considered by a purchaser in deciding his mount. The New Mail is the strongest wheel on the market and will stand more knocking about over rough roads than any other bicycle. Do not be enticed into getting machines too light for American roads. Get a wheel with staying qualities.

The New Mail Safety has Cushion Tires for annulling jar and vibration. Cushion Tires of a pattern which has been thoroughly tested and are all right for road work. Cushion Tires, if too large or very soft, will not stand road use, but we have adopted a conservative size and degree of softness which have stood the test and still give the elasticity and life desired, and are a great improvement for comfort over solid tires. We believe Cushion Tires are to have a great demand, and recommend them.

The New Mail High Grade will still have the same desirable features which has given it its Great Reputation in past years. New Mails have passed their experimental years. Throughout the country the reputation of New Mail Cycles for Strictly High Quality is Unquestioned! No other wheel has the same improvements. A direct vertical Spring, the simplest of all, allowing front wheel to run perfectly true, with no side swaying, no yielding of forks sideways; a coiled spring inside column. Trigwell's Ball Bearing Head, Rear Axle Band Brake, which is the greatest improvement, as it does not cut the rubber tire, does not collect mud as when near the tire, nor spatter mud on the chain, which is always difficult to keep clean. The New Mail handle bars are low and well back to rider. Very popular and the most graceful bar in the market.

Straight Front Forks, giving steadiness of steering. Garford Saddle, the easiest. Thickened Base Hollow Rims, Tangent Spokes strongly tied, and nickeled to intersections, Ball Bearings throughout, offered as the Finest Safety in the Market.

An American wheel, made by the finest machinery of the Ames Manufacturing Company, of Chicopee, Mass., who have long been Bicycle Manufacturers. They are built under the supervision of Wm. Read & Sons, Boston, and from their experience, coupled with our own, we offer them as the most perfect machines yet made. Every detailed part has been constructed with the greatest nicety, and all are strictly interchangeable. It is in fact a Perfect Wheel.

Bicycles.

New Mail No. 2.

Diamond Frame, Tangent Spokes, Cushion Tires and Garford Saddle, New Mail Pattern Low Handle Bars, Credenda Tubing, and the Principle of Universal Adjustment applied to all Bearings.

DESCRIPTION.	EACH.
No. 2 New Mail, Ball Bearing Wheels, Crank Axle and Pedals, - - - -	$100 00

The No 2. New Mail differs from the No. 1 in that it does not have the spring fork, Trigwell's ball bearing head, nor the rear axle band brake, and has an entirely different device for taking up the slack in chain (see cut, opposite.) The mechanical principles under which it is constructed are, however, the same as now used on all the leading imported wheels, and it is designed to embrace the best and most approved features of the high class English bicycles. Long Socket system of steering; the head of good length, and the cones with large bearing surfaces. Screw arrangement in the back fork ends for chain adjustment.

Has the diamond frame, same as on the High Grade New Mail at $135.00), and which is conceded to be the handsomest model in the market. Straight front forks. Also New Mail Pattern Low Handle Bars, curved and brought well back to rider, making them the most easy and comfortable shape on any wheel (see cut). Credenda Tubing and Brazed Frame throughout. The wheels have tangent spokes. Ball bearings to wheels, crank axle and pedals. Cushion tires and Garford saddle. The chain is the best English make. The bearings are Bown's enclosed ball bearings, and this bicycle has the same general points which the high grade New Mail has, as regards the perfect position which the rider has when seated, the easiest and most natural position, giving steadiness of steering and perfect control of the wheel. The New Mail excels all other wheels in the perfection of its mechanical details and the confidence which the rider gets from the excellence of the workmanship and the consciousness of security. No other wheel imparts to the rider the same confidence. No other wheel is under such perfect control. Once a rider of a New Mail and always a rider of a New Mail. No other wheel gives the same exhilaration when riding, or makes Bicycling such a pleasure.

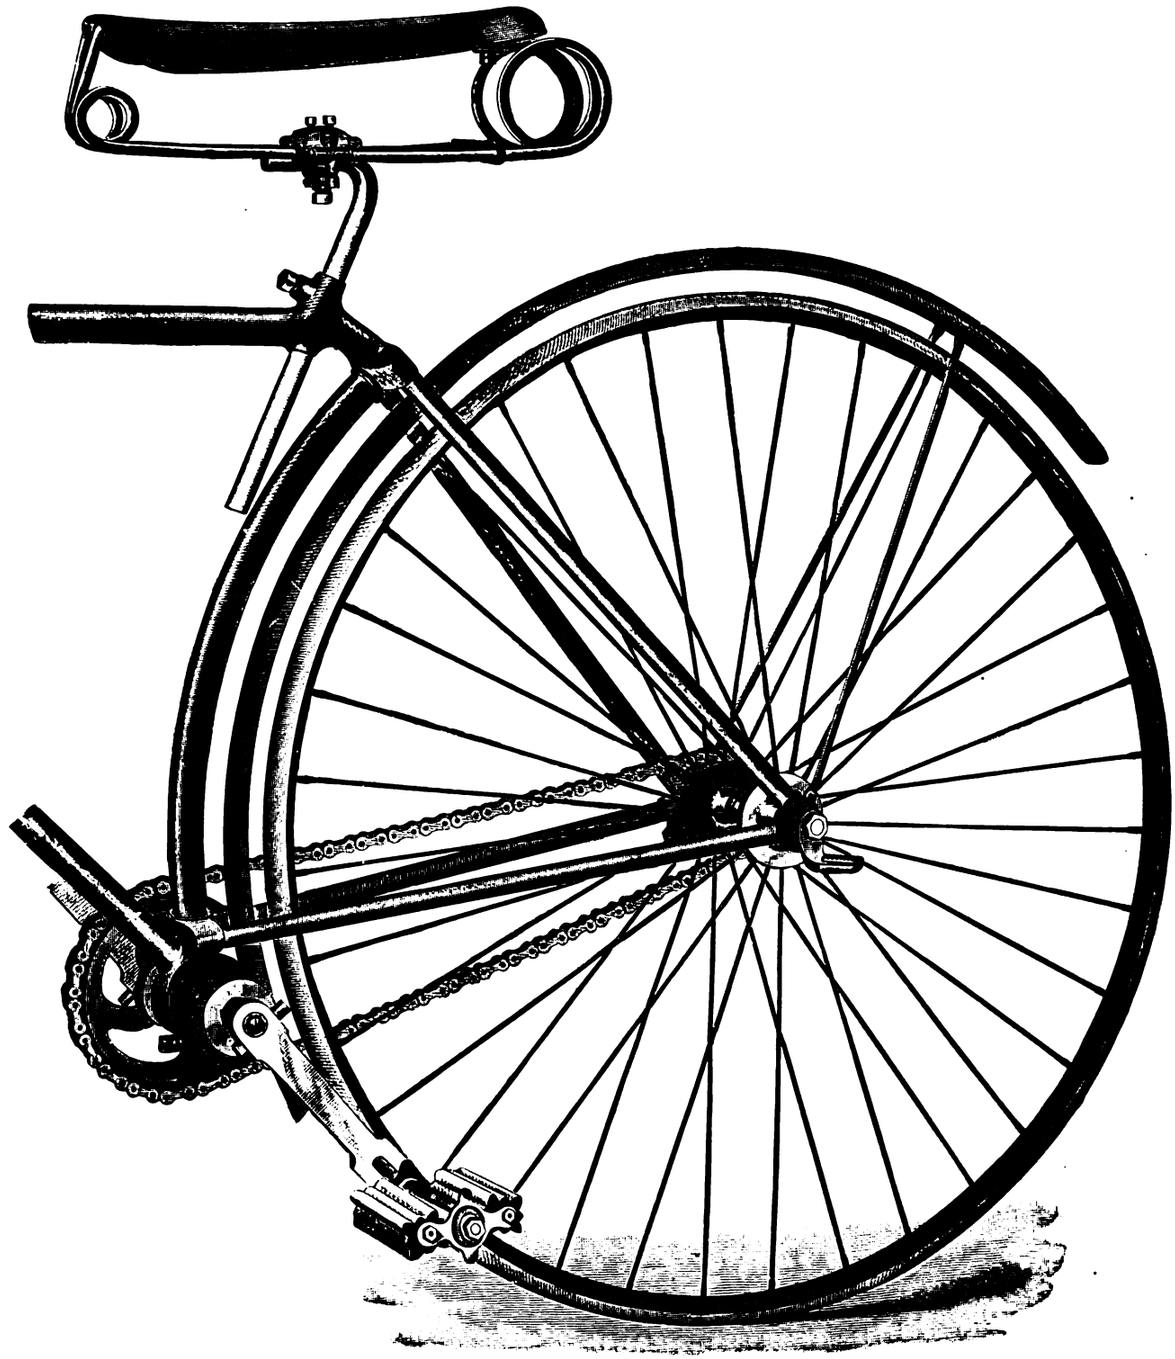

A Word About Weights.

Our $100.00 grade Bicycle complete weighs 52 pounds. Bicycle alone weighs 46 pounds; saddle, 3 pounds; bag and tools, 1 pound; pedals, 2 pounds; making total weight just 52 pounds. The weight given includes cushion tires, which add three to four pounds. We also call attention to the fact that some of our competitors advertise under the real weights, and further do not state whether the weight they give is with solid or cushion tires. The New Mails this year are just right, and all right, and we submit them to the riding public with the assurance that we have been governed in the manufacture of these wheels by the same rule which an investor of the large amount of money which it takes to buy a high class wheel applies. Keep on conservative side of new featnres. We also respectfully remind the purchaser that the New Mails are tried wheels, and made for American roads.

The Chicago Safety Bicycle.

Frame of Novel Design, Imported Seamless Steel Tubing and Steel Drop Forgings, Tangent Spokes. Full Ball Bearings, including Steering Head. Weight, 46 Pounds. Handsome, Light, Durable. Only Imported Seamless Steel Tubing and Steel Drop Forgings are used in this frame and the parts are fitted and brazed together in the strongest manner.

DESCRIPTION.	EACH.
Chicago, Tangent Spokes, Ball Bearings to Head, both Wheels, Crank Axles and Pedals, list,	$100 00

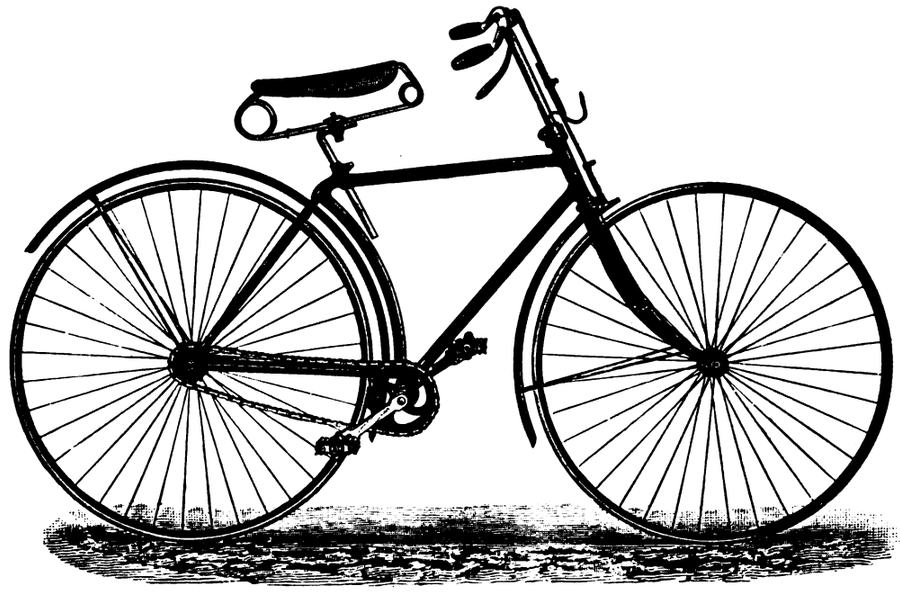

The above cut is a good representation of this wheel, of novel design, possessing all the rigidness of the Diamond Frame, with enough elasticity to make riding a pleasure. It is made entirely of Imported Steel Tubing and Drop Forgings, all the parts being well fitted and firmly brazed together. Bolts and braces, which are generally used on Safety Bicycles, and which are so liable to get loose and rattle, are not required and not used. Both Wheels are 30 inch, with crescent-shaped steel rims. ⅞ inch Best Molded Rubber Tires; Tangent Spokes of most approved pattern. The small Sprocket Wheel and Driving Wheel hub are made in one piece. The teeth of the former, as well as those of the large Sprocket Wheel, are cut out of the solid metal by very accurate and expensive machinery. The Steel Link Chain is of English make, and the best that is made, running on perfectly true sprocket wheels, will work very smooth and quiet, and is adjusted by our well known eccentric crank axle bearing, the most simple and practical chain adjustment made. The 160 Balls used in the bearings of this Machine are of the very best quality, turning on hardened steel cones and separate cases. The adjustments are easy, and quickly made. Ball Bearings are used on both wheels, steering head, crank shaft and pedals (see cut). Cranks are of the best drop forged steel, 6¾ inch long. The Crank Shaft runs on ball bearings of large bearing surfaces (see cut), giving entire protection from dust and grit. The Pedals are the very best, the end plates being forged steel, finely finished; the rubbers are large and shaped so as to afford the best surface for the foot. The Foot Rests are small, neat, adjustable and detachable. The Handle Bar is made of large diameter imported steel tubing, nicely tapered to the ends, and curved gracefully backwards and downwards to bring the handles to a desirable and natural position for the rider. The Handles are large, and of vulcanite rubber, cemented firmly on the handle bar. The Plunger Brake as applied to the front wheel, is neat and strong, and is attached to the handle bar by an adjustable clip. A neat spring Lamp Bracket is attached to the adjusting clamp of the handle bar. The Suspension Oak Tanned Leather Saddle is supported by double wire springs, new design, and is one of the easiest riding saddles made, being adjustable three ways, raised or lowered forward or back, higher or lower at the front, as may be desired. It is also adjustable for a heavy or light person by a sliding cross bar, which decreases or increases the tension. Complete with Tool Bag wrench and oil can. The Step is detachable and of good shape. These Bicycles are geared to 54 inches. Weight, 46 pounds.

Courier Improved Safety Bicycle.

New Pattern Diamond Frame, Imported Seamless Steel Tubing, Steel Drop Forgings, Full Ball Bearings, Including Steering Head. Weight, 47 Pounds. Adapted for all American Roads. Only Imported Seamless Steel Tubing and Steel Drop Forgings are Used in this Frame, and the Parts are Fitted and Brazed Together in the Strongest Manner.

DESCRIPTION.	EACH.
Courier, Ball Bearings to Head, both Wheels, Crank Axles and Pedals, - - -	$85 00

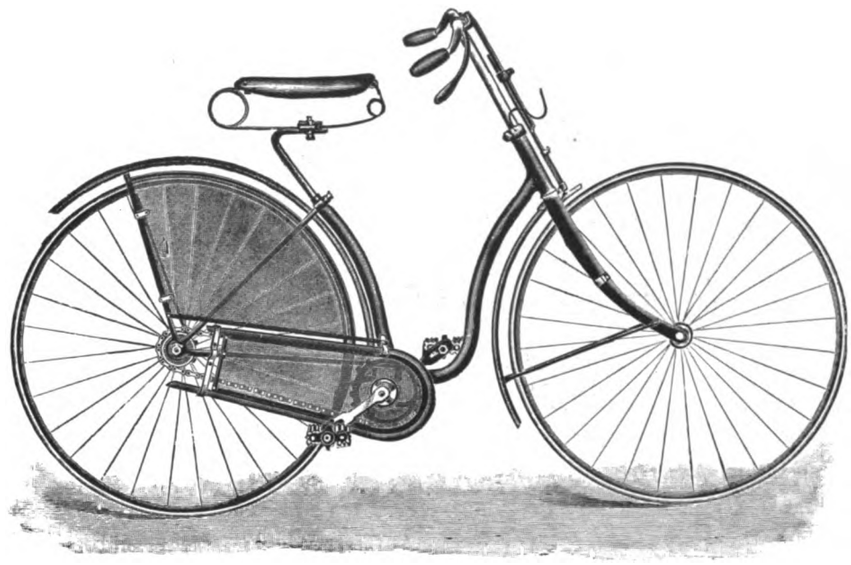

In presenting this Wheel to the bicycle riders who do not care to spend $100.00 or $135.00 for the higher grade, we believe it has no equal at the price. It is decidedly handsome and easy running. The Wheels are 30 inch diameter, with crescent steel rims; $\frac{7}{8}$ inch moulded rubber Tires, direct Spokes, butt ended and screwed into the Hubs, which are finely finished, turned out of one solid piece. Both Wheels run on adjustable ball bearings of the finest construction. All bearings, including the steering head, are provided with ball bearings of the most perfect kind. The balls are 5-16 inch, turning in carefully hardened steel pockets, independent from the hub itself, and can be renewed without disturbing the spokes. The Sprocket Wheels are machine cut. The Frame is unquestionably the strongest ever put in a Safety, is new pattern diamond shape and made of imported steel tubing throughout. There are no stay rods or bolts to get loose and rattle. The Front Forks are made of hollow steel tubing, and shaped so as to bring the steering centers in the proper line, making the machine almost self-steering, allowing it to be ridden "hands off" without any difficulty. The Handle Bar is made of large, hollow steel tubing, tapered to the ends, and curved gracefully backwards and downwards to an easy position, and is adjustably held in front fork by a neat Split collar which at the same time holds the adjusting cone of the Ball Steering Head. The Handles are large and of black vulcanite, cemented firmly to the handle-bar. The suspension oak-tanned leather Saddle is supported by new design double wire springs, which keep the leather taut. It is adjustable for a heavy or light person by a sliding cross-bar which decreases or increases the tension. The L-shaped seat rod allows the saddle to be adjusted as to height, as well as forward and back; there is a neat tilting device which allows the front end of saddle to be raised or lowered to suit the rider. Complete with Tool Bag, oil can and wrench. The Cranks are detachable forged steel $6\frac{3}{4}$ inches long. The Crank Shaft runs in ball bearings, the special features of which are the large bearing surfaces (see cut) and entire protection from dust and grit. A neat nickel-plated cap fits over the outside of bearings, closing them up completely (see cut). Oil is admitted through a small hole in end of shaft; this hole is ordinarily closed by a small screw. The Pedals have perfect ball bearings, and have new corrugated square rubbers. The Chain is wrought steel of the best English make, running on machine cut Sprocket Wheels, and adjusted by the eccentric crank axle bearing (see cut), the simplest and best made. An improved plunger Brake is applied to the front wheel; a neat spring Lamp Bracket is attached to the front fork. The Step is detachable. The Foot Rests on front forks are neat, small, adjustable and detachable. Steel Mud Guards cover both wheels. These Machines are geared to 54 inches, and finished in the best black enamel, with all bright parts heavily nickeled. Weight, 47 pounds.

Gypsy Improved Ladies' Safety.

Full Ball Bearing, Drop Frame, Imported Seamless Steel Tubing, Steel Drop Forgings, Has Been Greatly Improved and has no Equal At the Price. Only Imported Seamless Steel Tubing and Steel Drop Forgings are used in this Frame and the Parts are Fitted and Brazed Together in the Strongest Manner.

DESCRIPTION.	EACH.
Gypsy, Ball bearing wheels, crank axle and pedals, - - - - -	$75 00

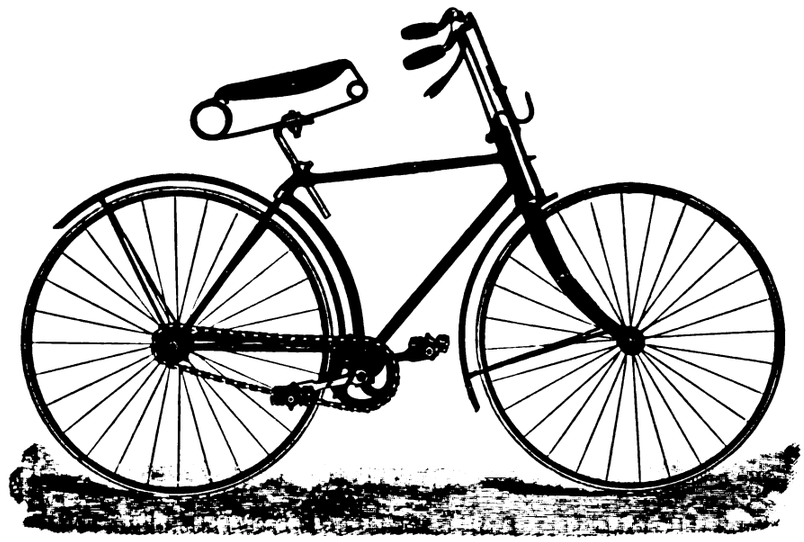

This is a Safety, which, from its peculiar form of frame, is equally well adapted for ladies or gentlemen, or for misses or youths. The Wheels are 28 inch diameter, ¾ & ⅞ inch moulded rubber tires. The Spokes are direct butt ended. The Hubs are finely finished and run on improved dust-proof adjustable ball bearings to both wheels. The Drop Frame is very strong, only imported seamless steel tubing and drop forgings being used, all parts are well fitted and brazed together. The Front Forks are hollow and fitted into a self-adjusting sleeve steering head. The Handle Bar and Post are made of seamless steel tubing of large size, and is adjustable in height, and the ends are curved backwards and downwards, putting the handles in good position. A lever plunger Brake is applied to the front wheel. The Saddle is of oak tanned leather of improved shape, supported by new design double wire spring; giving a most elastic and comfortable seat, besides being adjustable in height and forwards and backwards the saddle can be inclined at different angles by a very simple device on the clamp itself. It is also adjustable for a heavy or light person by a sliding cross bar which increases or decreases the tension. The Crank Shaft runs on improved ball bearings of large bearing surfaces, made perfectly dust proof by caps fitting closely over bearing parts (see cut). Cranks are forged steel 6 inches long, and are detachable. Pedals are ball bearing, with corrugated, square rubbers so constructed that they will take a firm grip and prevent slipping of the foot. One of the best English steel Chains is used, running on machine-cut sprocket wheels, and stretch in same can be taken up by our well known eccentric chain adjustment. Steel Dress Guards are provided for both sides of wheel, as well as for chain and sprocket wheel. Foot rests are provided on front fork. Has Vulcanite Rubber Handles and spring lamp bracket. The step is detachable. A serviceable tool bag, with oil can and steel wrench, is furnished with each machine. They are elegantly finished, only the finest enamel being used, and the nickeling is most elegant. These machines are geared to 50 inches. Weight 48 Pounds.

Tornado Youths' Safety Bicycle.

Diamond Frame, Imported Seamless Steel Tubing, Steel Drop Forgings, Hollow Front Forks, Full Ball Bearings To Both Wheels, Crank Axle and Pedals. Weight, 40 Pounds. Only Imported Seamless Steel Tubing and Steel Drop Forgings are used in this Frame and the Parts are Fitted and Brazed together in the Strongest manner.

DESCRIPTION.	EACH.
Tornado, Ball Bearings to both Wheels, Crank Axles and Pedals, - - -	$60 00

This is a thoroughly high grade machine, built for youths and light weight riders, and has a large range of adjustment. It is made strong and only the very best of material is used in its construction. Having ball bearings throughout and a diamond frame of the most approved design, it is one of the lightest running and most graceful wheels ever put on the market. The wheels are 26 inch diameter, with ¾ inch moulded rubber tires. They have direct butt ended spokes, finely finished hub, turned out of one piece, running on ball bearings. Both Sprocket Wheels are machine cut, and one of the best Chains used in England is used. Has our eccentric chain adjustment. The style of Frame is clearly shown in cut. It combines strength with lightness, and is made of imported steel tube and drop forgings only, firmly fitted and brazed together. It has a self-adjusting sleeve steering head.

The Handle Bar is made of seamless tubing of large diameter, is of good length and graceful shape, curved backwards and downwards, with vulcanite handles firmly cemented on same. The Suspension Oak Tanned Leather Saddle is similar to the one on our "Courier" Bicycle, but reduced in size to correspond with size of machine; it is supported by new design double wire springs, which keep the leather taut. It is adjustable for a heavy or light person by a sliding cross-bar which decreases or increases the tension. The L-shaped seat rod allows the saddle to be adjusted as to height, as well as forward and back; there is a neat tilting device which allows the front end of saddle to be raised or lowered to suit the rider. Complete with tool bag, oil can and wrench. A very efficient plunger brake of new design is applied to the front wheel.

Special attention is called to the Crank Axle Bearings: all wearing parts in this are made very large, and are fully protected by nickel plated caps, making the bearings perfectly dust proof. Oil is admitted through a hole, closed with a small screw in end of shaft. Cranks are 6 inches long and are detachable. Pedals made entirely of steel and rubber, run on balls and are adjustable. Machines are geared to 47 inches; weight 40 lbs. Nickel and enamel of the very best.

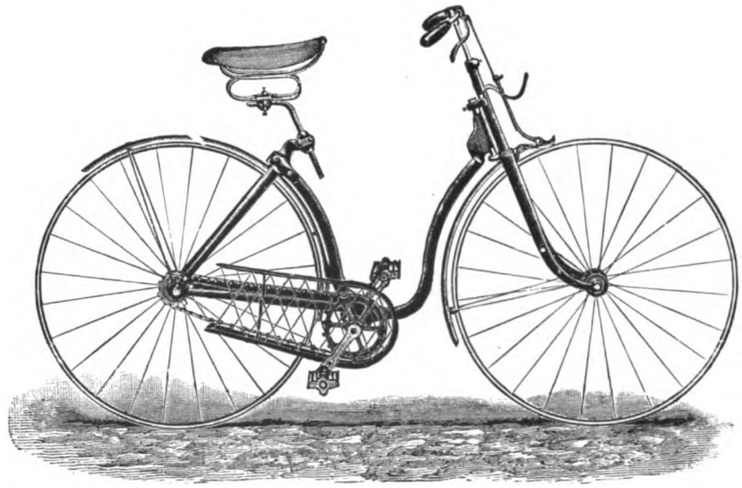

This Bicycle is offered as something new and good. Made for boys from 12 to 18 years of age. It is a much better value than has ever been offered before in Bicycles for anywhere near the price.

All boys give a Bicycle much rougher usage than most men do, and in this machine will be found all the elements of strength necessary to withstand the rough-and-tumble life which a boy leads.

Cricket Girls' and Boys' Safety Bicycles.

For Girls and Boys from 10 to 15 Years of Age.

DESCRIPTION.	EACH.
Cricket, 24 inch, Ball Bearing Wheels, Crank Shaft and Pedals.	$35 00

This Safety is adapted for girls or boys from 10 to 15 years of age, has 24 inch wheels, moulded rubber tires ¾ inch on rear and ⅝ inch on front wheels, both front and rear wheels run on Ball Bearings adjustable for wear. The Spokes are made of No. 11 steel wire with both ends enlarged for strength, has drop frame as shown in cut, and strong braces are provided to strengthen and combine the different parts. The Driving Axle runs on Ball Bearings, adjustable for wear. The Sprocket Wheels are of large diameter, permitting the chain to run freely with little strain, has detachable link chain, Cranks are adjustable and pedals Ball Bearing, with corrugated rubbers. Rubber Foot Rests are provided on front fork, steel dust shields cover front and rear wheels. The Steel Handle Bar is adjustable in height, is of good shape, an efficient brake is applied to front wheel. The Saddle is of the hammock pattern, and is stretched on a set of steel wire elastic springs, which give a more elastic and comfortable seat; seat rod and saddle can be adjusted to height of rider, all oil holes are covered, and great care has been taken to make all bearings practically dust proof. Netting Dress Guard over chain and sprocket wheel. The Finish is most excellent, the frame being enameled with several coats of the finest enamel baked on a polished surface. The usual bright parts are heavily nickel plated. This, together with the graceful form of frame, gives the machine a beautiful appearance.

Wanderer Boys' Safety Bicycle.

For Boys from 10 to 15 Years of Age.

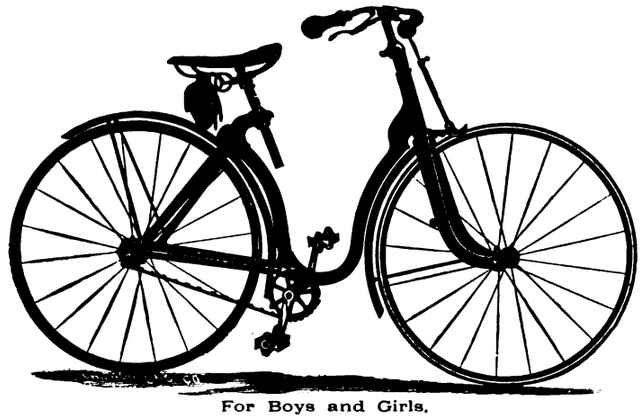

DESCRIPTION.	EACH.
Wanderer, 24 inch, Cone Bearings,	$25 00

The Wheels are 24 inches in diameter, have moulded rubber tires, ¾ inch to rear or drive wheel, and ⅝ inch to front wheel; both front and rear wheels run on hardened steel cones adjustable for wear. Experience shows and teaches that these bearings will outwear any other kind of bearing. The Spokes are made of No. 11 special steel wire, with both ends enlarged for strength. The main parts of tubular section, with the Forks made semi-hollow, a combination that is at once strong, light and pleasing to the eye. Strong braces are provided to still further strengthen and combine the different parts. Steel Dust Shields cover the front and rear wheels. The Crank Shaft runs in a long parallel bearing, adjustable for wear. The Sprocket Wheel is of large diameter, permitting the chain to run freely and with less strain. A detachable Link Chain of standard size, being best suited for this purpose, is used on these machines. The Cranks are adjustable and Pedals parallel, with corrugated rubbers. Rubber Foot Rests are provided on front forks. The Steel Handle Bar is adjustable in height, is of good length, with the ends bent backward and outward to bring the handles in the most comfortable position. The Handles are vulcanite, of good shape, and are cemented on handle-bar. An efficient Brake is applied to the front wheel. The Saddle is of the hammock pattern, of improved shape, and is supported by an T Seat Rod, which allows it to be adjusted in height, as well as forward and back. Complete with Tool Bag, containing oil can and steel wrench. Frame is enameled with several coats of finest enamel baked on a polished surface. Spokes are nickel plated.

The Little Jewel Safety.

For Boys and Girls.

NO.	DESCRIPTION.	EACH.
3	Frame is Enameled with the best enamel, Rubber Tire Wheels, with Dust Shields, Hubs, Handle Bar, Seat Post, Etc., Finely Nickel Plated, - - - -	$20 00

The accompanying cut represents our Little Jewel Safety, which can be used by boys or girls from five to ten years of age. Both Wheels are 20 inches diameter, geared to 34 inches, with $\frac{5}{8}$ tire to rear and $\frac{1}{2}$ inch to front wheel. They run on long straight axles, with the hubs chambered out for an oil supply. The Reach is made of steel tubing, and drops down, leaving the space between the wheels unobstructed. The Rear Fork is formed by four semi-hollow braces firmly riveted to the curved steel tube. The Front Fork is connected to the reach by a tapered sleeve, and held in place by a collar with set screw, which at the same time serves to secure the handle post in the front fork. Both Handle Bar and Saddle are Adjustable in Height. The Saddle is of the hammock pattern, supported on steel wire coil Springs of a new design. The Brake, being applied to the front wheel, is perfectly safe, and gives control over the machine in going down hill. Rubber Foot Rests are provided on front fork. Steel Dust Shields cover front and rear wheels. Step is detachable. Pedals are of a rat trap pattern.

New Lever Tricycle.

In this machine we offer a new type of Lever Tricycle with substantial improvements. The simplicity and lightness of gear is what can be seen at once, but none of its necessary strength has been sacrificed to obtain this result. The elegant and comfortable seat is supported on our new style spring, made of heavy round steel, and can be adjusted up or down in a moment and without the use of a wrench, the handle on set screw being provided for that purpose.

The pedals and levers are in good position for efficient work. Rear axle is made of steel of good dimensions, and bearings are of good length. The steering is done by front handle, which, together with front wheel, can be turned clear around for pulling the machine.

These Tricycles are highly finished; frames in black, neatly striped; wheels, handle, pedals, springs, etc., brightly tinned; seat upholstered in fancy plush.

Steel Tire.

Velocipedes.

This Velocipede is highly finished and ornamented. Steel Suspension Wire Wheels, and Tinned Spokes. Detachable Cranks.

"Fast Mail" Iron Velocipede.

This cut represents a new style of wire wheel Velocipede, the frame of which is substantially made of wrought iron, firmly riveted to malleable iron connecting pieces. We call special attention to the mode of connecting the reach to the front fork. This connection works the same as a hinge joint, and no nuts or set screws or parts to shake loose and get lost are employed in this device. It can be put together or taken apart without the use of a wrench or screw driver We have also done away with the malleable front axle, and substituted a Forged Steel Axle, which will avoid all breakage at this vital part. On this Velocipede the old style wooden handle is done away with, and replaced by a gracefully curved cow horn handle bar, with polished wooden handles. The saddle is made of heavy leather, of improved shape, and is supported on a most elastic steel wire spring. The rear reach, being made of wrought iron fastened to the axle by an entirely new device, is staunch and durable. The rear reach being spread wide apart prevents tipping.

Steel Tires.

Cut Full Size.

NO.	DESCRIPTION.	PER DOZ.
30	The Cleanest and Handiest Pocket Oiler in the World. This Oiler consists of a tube for holding the oil, fitted at the top with a patent tip, which can be unscrewed to refill the Oiler. This tip throws only a small quantity at a time, and prevents all spilling and waste of oil. As the ordinary oil can throws from twenty drops and upward at each stroke, the immense superiority of this Oiler as to neatness, cleanliness and economy, will be at once apparent. The shape and nickel finish make it the handsomest, neatest and most convenient Oiler in use, - - - - - - - - -	$5 00

2	The Favorite, 2¼ inches in diameter, with Full Nickel Gong and Fastenings, - - - - -	75
3	The Standard, 3½ inches in diameter, with Nickel Gong and Fastenings. This is absolutely the loudest Bicycle Bell in use, - - - -	1 00
4	The London Chime, an elegant 3 inch Double Chime Bell, which gives two distinct notes with one pull of the lever, Full Nickeled. - - - -	1 50
6	Perfection Bicycle Alarm, will fit any machine made. Is fastened to the brake upright, is out of the way, and unaffected by headers. It will not rattle. The spring to operate the alarm is contained within the bell, and is wound by a button on the outside of the gong. The alarm is given by a slight forward pressure on the projecting lever. A simple alarm stroke, a succession of strokes, or a continuous alarm at pleasure of rider, - - - -	2 50
12	The Daisy Bicycle Alarm. "It's a daisy!" So say all that have seen it and used it. It is the most thorough and durably made bell on the market. It has a perpetual automatic motion, and it never has to be wound up, thus avoiding the nuisance of winding. It gives the electrical cathedral sound, and is the best bell ever constructed for bicycles and tricycles. All bells are warranted. Any imperfection in any way, shape, or manner will be made good at the factory free of charge. They fit all kinds of machines, - - - - -	2 50

Brooks' Ideal Cyclometer.

This instrument designed to meet the demand for a strictly first-class Cyclometer at a moderate cost, and is offered with confidence that it will supply a long felt want. Being entirely without weights or springs, and its few parts being always in gear, it is the least likely to get out of order. Its weight is 11 ounces, about one-half that of other direct acting Cyclometers. The Collar enclosing the hub of the bicycle has a rubber packing, rendering its attachment to hubs of different sizes very easy. State size of wheel when ordering Cyclometers.

DESCRIPTION.	EACH.
List, - - - - - - - -	$5 00

The Butcher Cyclometer.

Can be read from the saddle. It registers to 1,000 miles and then returns to zero. It weighs less than twenty ounces. The weight which holds the dial always upward can be easily removed and a lamp substituted in its stead. In ordering mention size and make of wheel.

DESCRIPTION.	EACH.
For Safeties, List, - - - - -	$11 00

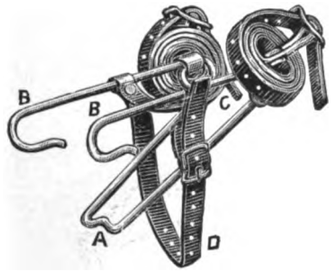

The Lakin Cyclometer.

The mile dial is divided into Quarters, Eighths, Sixteenths and Thirtyseconds. At every revolution of the hand on the mile dial, the long hand on the large dial will move forward one figure and thus record each mile. While it requires 50 turns of the mile hand to make one complete revolution of the long hand, it also requires 50 revolutions of the long hand to make one revolution of the short or 50 mile hand, and they all return to zero together.

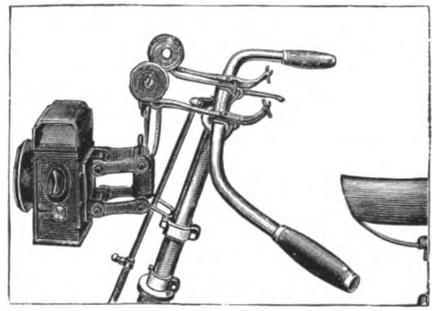

DESCRIPTION.	EACH.
List, - - - - - -	$10 00

Gray's Patent Body Protector.

We now have the sole agency for this most useful device ever invented for the protection of catchers or umpires. This body protector renders it impossible for the catcher to be injured while playing close to the batter. It is made of best rubber and inflated with air, and is very light and pliable, and does not interfere in any way with the movements of the wearer, either in running, stooping or throwing. No catcher should be without one of these protectors. When not in use the air can be let out, and the protector rolled in very small space.

Decker's Improved Catcher's Mitts.—Patented.

Left Hand Mitt, Front View.

We take pleasure in calling attention to the new Decker Safety Catching Mitt, which has, wherever shown and introduced, been conceded to be unequaled for protection to the hands. A catcher need have no fear of broken fingers in using them.

The left hand back stop Mitt is made as follows: The inner part of the Mitt is of a light grade buckskin, thoroughly padded and covered with the very best grade Indian Tanned Buckskin. On the back is sewed a stiff piece of sole leather, extending from a little above the knuckles beyond the tips of the fingers, thus making it impossible to break or injure a finger in any manner.

By using this Mitt it will be simply impossible to hurt your hand, and at the same time the ball can be easily handled.

The right hand glove is also made of the best Indian Tanned Buckskin, well padded, with seamless palm, open back, without fingers, and so constructed as not to interfere with throwing the ball.

Right Hand Throwing Glove.

The Gentlemen.

DESCRIPTION.	EACH.
Plain Handle,	$10 50
Cork Handle,	11 00

This Racket is the latest production of Slazenger & Sons, and is the most elegant and costly Tennis Racket ever made by any manufacturer. It is double strung with the choicest gut that can be produced. The frame is selected with the greatest care and fully tested before leaving the factory, and is absolutely free from flaws and imperfections. This Racket, as the name indicates, is made expressly for the player who appreciates and who wants the finest in this line that money can buy.

The Demon Special.

DESCRIPTION.	EACH.
Plain Handle,	$9 00
Cork Handle,	9 50

This Racket has achieved one of the greatest successes of any Racket ever put on the market. It is celebrated for its great beauty of shape and finish, and has been used by the most expert tennis players throughout England. It is strung very closely with the finest 13-strand gut that can be manufactured, and has more drive than any racket ever made. The frame is of the best rent ash, the groove in handle affords a perfect grip, and enables the player to know the exact position of the blade; the projecting shoulder also adds to the firmness of the grip, and effectually prevents the racket from slipping out of the hand. Made in the finest possible manner.

The Whitehouse.

DESCRIPTION.	EACH.
Plain Handle,	$9 00
Cork Handle,	9 50

This is a racket of the shape most generally used, being perfectly straight and symmetrical, strung with extra fine 13-strand gut of the very best English manufacture, and closer mesh than ordinary. The frame is of the best English rent ash, naturally bent, with straight grain, and is made in the best possible manner.

The Chester.

	EACH.
Price,	$8 25

This racket is made by Messrs. Slazenger & Sons after patterns furnished by us and manufactured to our order. It is particularly an expert's racket, and by such will be thoroughly appreciated. Strung with extra fine gut of the best English make, and of very close mesh. The handle is something new, being made of India cane, making it light, and yet very strong. The frame is from the best rent ash, naturally bent, and free from all flaws.

The Cam.

DESCRIPTION.	EACH.
Plain Handle,	$8 00
Cork Handle,	8 50

This is of a new pattern, combining the best qualities of the older styles with new features suggested by tennis players. Is strung with the finest English gut by the best stringers. The frame is made from the best selected white ash. This racket is fully guaranteed and is strictly first-class in every respect.

The Chicago.

The Renshaw.

The Woodlawn.

The Ich Dien.

DESCRIPTION.	EACH.
Plain Handle,	$7 75
Cork Handle,	8 25

To meet the requirements of those players whe desire a bat similar to the Whitehouse, Slazenger & Sons have introduced a racket which they designate the "Ich Dien." It is made of rent frames, thoroughly seasoned. The gut is transparent, white and red, English manufacture, and of excellent quality. It is a useful and sightly bat, and made on the most approved lines, from the recent decisions of experts. Octagon handle and oval head.

The Q. C.

DESCRIPTION.	EACH.
Plain Handle,	$7 25
Cork Handle,	7 75

This is a new racket of the most approved form. It is made on the precise lines of rackets made for many of the most prominent and successful experts of the game of lawn tennis, and has been most highly spoken of by them. We have every reason to be certain that it is one of Messrs. Slazenger & Sons' most popular productions. It is strung with the very best English gut, the frame is of the most select white ash, naturally bent, and will make one of the most serviceable rackets ever manufactured.

The Renshaw.

DESCRIPTION.	EACH.
Plain Handle,	$5 25
Cork Handle,	5 75

The shape is the result of a consultation and arrangement of a number of tennis authorities meeting together for this purpose. It has now been adopted by them, and as a consequence, by many of the leading clubs throughout the world. The durability has been most severely tested, and is admitted to be thoroughly substantial and trustworthy. Special attention has been given to the gut; it is, although not so white in color, very strong and durable.

The Chicago.

DESCRIPTION.	EACH.
Plain Handle,	$4 75
Cork Handle,	5 25

This racket, like the Chester, is made particularly for us, best shape, strung with all red best English gut, close mesh. The frame is from second growth white ash, carefully selected and seasoned, with ebonized wedge, very handsome, and first class in every respect. Our trade mark and the name Chicago on each racket.

The Woodlawn.

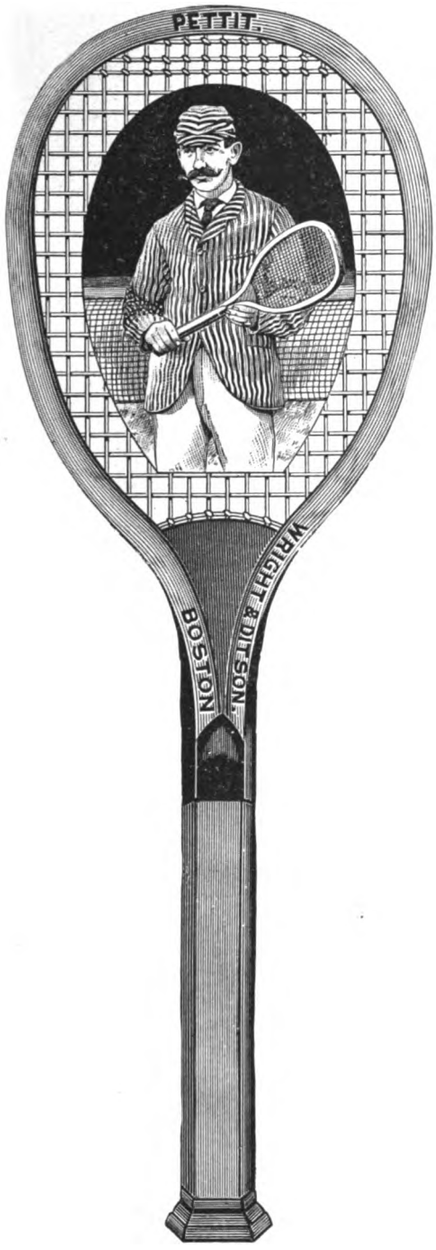

DESCRIPTION.	EACH.
Plain Handle,	$4 25
Cork Handle,	4 75

This racket we brought out last year, and met with splendid success. Is is made with extra large playing surface, strung with red and white English gut. The frame is of the finest selected ash, and made on scientific principles. Trade mark and name Woodlawn on each racket.

Wright & Ditson's Champion Rackets.

The Pettit.

DESCRIPTION.	EACH.
Plain Handle,	$5 50
Cork Handle,	6 00

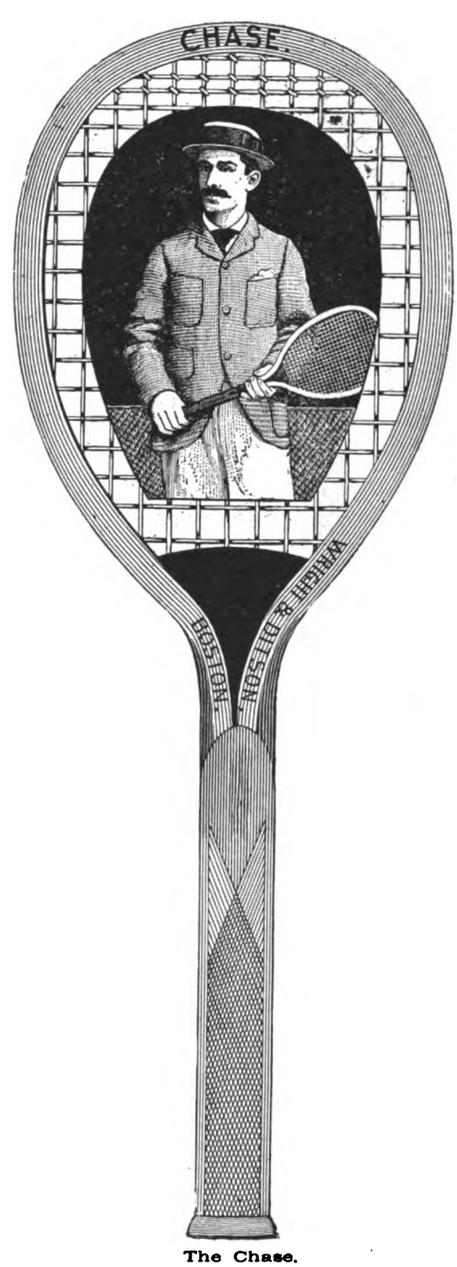

This is one of our latest in Tennis Rackets, made for and used by Thos. Pettit, the Champion of the World. Strung with half English and half German red and white gut, we can safely recommend it to our customers as being far superior to any of the so-called English-strung rackets in the market.

Sears Special.

DESCRIPTION.	EACH.
Plain Handle,	$7 00
Cork Handle,	7 50

This is one of the finest rackets ever put upon the market. The frame is made from selected, thoroughly seasoned, straight-grained, second growth white ash, and it is strung (by experts only) with Genuine red and white English gut of the highest grade. The handle is handsomely checkered, which not only adds greatly to its appearance, but insures a firm grasp. There are more of these rackets used in the United States and Canada than all other so-called first-class rackets combined.

The Chase.

DESCRIPTION.	EACH.
Plain Handle,	$6 00
Cork Handle,	6 50

This is a new addition to our already large line of rackets, made for and used by Chas. A. Chase, of Chicago, the Western Champion. The frame is made from the best selected white ash, with ebonized throat, and handsomely checkered handle. The stringing is of the best all red English gut, and done only by our most skilled stringers.

The Club Racket.

DESCRIPTION.	EACH.
Plain Handle,	$4 75
Cork Handle,	5 25

This is another new production. The frame is made from selected ash, with ebonized throat, and strung with red and white gut, half English and half American. It is a very fine racket throughout, and one that will guarantee a large sale.

The Longwood Racket.

DESCRIPTION.	EACH.
Plain Handle,	$4 00
Cork Handle,	4 50

This is the second year we have offered this popular Racket to the trade, and, judging from its enormous sale, it is safe to say it is one of the most desirable ones we make. The frame is made from selected white ash, with walnut throat, all nicely finished, and strung with the best quality American gut.

The Park Racket.

	EACH.
Price,	$3 00

This is a full-sized Racket, made the same shape as the "Tate," which is sold to the trade at large as a $5.00 Racket. The frame is made from good selected white ash, with a white holly throat, nicely finished, and strung with a nice quality of gut.

The Surprise Racket.

	EACH.
Price,	$2 00

This is an old standby with us, and one that has had an extraordinary sale. It is a youth's Racket, well made and finished, stringing good, and calculated to stand.

The Hub Racket.

	EACH.
Price,	$2 50

This is a new Racket this year, introduced to supply a demand for a full-sized Racket at a popular price. Frame made of good ash, mahogany throat, all well finished, and strung with good gut.

The Star Racket.

	EACH.
Price,	$1 50

This is one of the cheapest Rackets made, and is as low as is consistent to make anything of the name and expect any service from it. Designed especially for children's use, and for playing battledore and shuttlecock as well.

Tennis Sundries.

Columbia Lawn Marker.

This is the only perfect marker in the market, and has been thoroughly tested at all the large tournaments and on club and private courts with entire satisfaction. Contact in full view. It is neat, light, compact and durable. It is made of tin and iron, nicely painted. It is simple and easy to operate. It makes a clean, even ribbon line. It will mark or not, as desired, as it delivers only while running. It has no valves or cocks to adjust or get out of order. It is warranted to give satisfaction. It is packed in a crate for safe transportation.

NO.	DESCRIPTION.	EACH.
14	Complete, - - - - - - -	$6 00

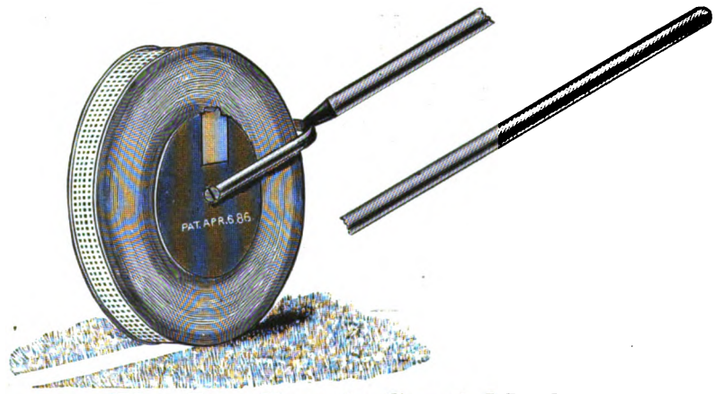

NOTE.—In marking out a court, whitening should be used in preference to lime. Mix the whitening in a pail about three-fourths full of water to about the consistency of paint, before placing in the marker. This will be sufficient for marking one court.

Wright & Ditson's Portable Tennis Tapes.

These tapes are especially adapted for clay, cinder and grass courts. Being light and compact, they can be easily carried and set out almost anywhere in a very short time. They are made up into sets consisting of a sufficient number of strong pieces of webbing (mounted with brass at each intersecting point) for marking out a court correctly. The tapes are fastened to the ground by means of pins and staples, which accompany each set.

DESCRIPTION.	
Double Court, per set, - - - -	$5 00
Single Court, per set, - - -	4 00
Extra Galvanized Staples, per 100, - -	75

The Dry Tennis Court Marker.

This marker requires no mixing of material with water to get ready for use. Put in any powdered material, such as marble dust, air-slacked lime, plaster of Paris, or ground plaster, such as is used for fertilizing purposes. By sprinkling immediately after marking, or by marking at evening before the dew falls, the lime is rendered more permanent. Fill the wheel about two-thirds full, which is sufficient for once marking the court.

Tennis Sundries.

Taylor's Tennis Poles.

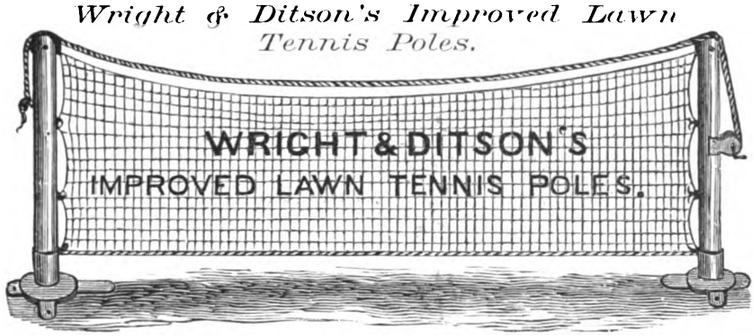

These poles are the simplest and most effective yet constructed, being entirely free from guy ropes, pulleys or windlasses, for tightening the net. Each pole consists of two parts: 1st, An iron socket driven into the ground about fourteen inches, and left there permanently, so as to be flush with the ground and not interfere with a lawn mower or roller, and 2d, a pole which is dropped loosely into this socket. To tighten the net, it is merely necessary to twist the pole around in the socket, wrapping the upper cord of the net around the pole. The pull of the net upon the pole prevents it from untwisting. By means of the handles projecting from the top of the pole, it can be readily twisted with sufficient force to tighten the net to any desired extent. The socket is provided with wide flanges, as shown in the cut, to prevent it from upsetting when subjected to the heaviest strain of the net, and also with a projection, at the end of each flange, for readily removing the socket from the ground.

(PATENT APPLIED FOR.)

NO.	DESCRIPTION.	PER PAIR.
0	Made of Hard Wood, highly polished and oil finished. Including sockets,	$6 00
1	Same as No. 0, only with one pole shod with iron; especially adapted for driving the socket into the ground. including sockets,	7 50

Wright & Ditson's Improved Lawn Tennis Poles.

Do away with guy ropes, are easily and quickly adjusted, and are strong and durable, being made of solid ash and iron, finely finished. The net is adjusted by the small crank illustrated in cut.

Boxing Gloves.

Our Own Trade Mark.

This Trade Mark Signifies the Highest Quality, the Standard for Excellence.

The Gloves of to-day are put to a much greater strain and are in more frequent use than formerly, and an improvement in the quality of these goods has been necessary to withstand this severe strain. We present our line of Boxing Gloves to the trade with the assertion that they are manufactured with a full knowledge of the requirements of the subject and that nothing better in this line can be made.

Hubbard's Folding Lawn Outfits.

This cut represents our new No. 20 Lawn Outfit, which consists of our No. 14 Hammock Chair with patent folding standard and umbrella canopy. We would particularly recommend this outfit for its combination of lightness and strength, neatness of finish, rapidity in which it can be set up or taken down without the use of tools, compactness into which it can be folded and its special fitness to adorn any lawn. The supporting frame is very light, yet strong and elegant in appearance, and is independent of guy ropes and stakes.

One person can easily move the entire outfit from place to place when set up.

The large umbrella canopy, large enough to furnish shade without trees, is covered with the best of fancy awning stripe. It is attached to standard with ball and socket joint, is adjustable to any angle desired and securely fastened by thumb-screw. All the woodwork is of selected hard maple, finished in either English vermilion, varnished, or natural wood, oiled and varnished. All iron work is malleable, heavily tinned. By removing the canopy it may be used indoors with great satisfaction. A thing of beauty, ease and comfort. - Weight, 25 pounds.

Hubbard Folding Hammock Chairs and Lawn Outfits.

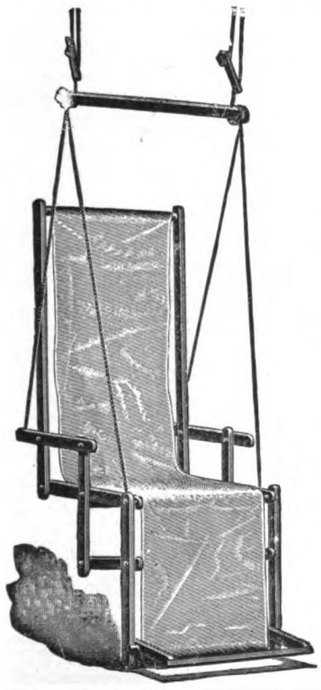

Lawn Outfit No. 11.

DESCRIPTION.	EACH.
Complete with Chair, - - - - - -	$10 00

This cut is a correct representation of our new improved Lawn Outfit, with patent folding standards and large gothic canopy, four feet six inches square, which folds like an umbrella, being large enough to afford sufficient shade without trees, is made of the best quality of fancy striped awning duck. Can be adjusted by means of a ball and socket joint, so as to keep the occupant always in the shade. The outfit can be taken down so as to occupy very little space, and it is impossible to set it up wrong. When set up it can be easily moved about the lawn by one person. It is finished in either vermillion and varnished. or natural wood, oiled and varnished. The material is of choice selected hardwood. This outfit is cased in combination with our No. 14 Hammock Chair. Weight, complete, 30 pounds.

Folding Adjustable Parasol Canopy, used in No. 11 Lawn Outfit.

Hammock Chair No. 15.

Our No. 15 Hammock Chair, shown in cut, is with the following exceptions the same as No. 14, shown opposite. In this- rope hangers are used instead of wood, and it is made from a cheaper, but at the same time durable duck. The woodwork is finished in oil only.

DESCRIPTION.	EACH.
No. 15, Hammock Chair, - - -	$3 00

New Lawn Outfit No. 17.

DESCRIPTION.	EACH.
Complete, with Chair, - - - - -	$ 5 00

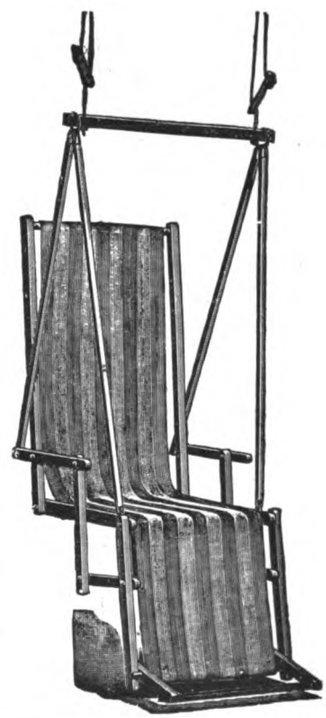

A standard for our Hammock Chair. without canopy, in which we furnish our No 15 Hammock Chair. This makes the most complete, most easily adjusted and cheapest Lawn or Porch outfit ever made; is very light and durable, and will sustain a weight of 500 pounds. It can be taken down and set up without the aid of any tool whatever, and can be easily moved about when set up. Weight, including chair, 25 pounds.

Hammock Chair No. 14.

Cut represents No. 14 Hammock Chair, as used when suspended from ceiling of porch or limb of tree.

This chair automatically adjusts itself to any desired position by the slightest effort of the occupant; has an adjustable foot rest, which can be easily and quickly adjusted to suit people of different heights. Has adjustable web seat, which can be so adjusted as to keep the seat in a comfortable and firm position. In fact no hammock chair can be complete without this patent web seat. Finished in natural wood, oiled, and Vermillion. All weighing but 14 pounds, and folding as completely as a camp stool.

6 x8	Cotton Stove Wicks,	59

Felt Stove Wick.

SIZE.	DESCRIPTION.	PER DOZ.
Inches.		
4 x 8	Felt Stove Wicks,	$0 50
4½x12	Felt Stove Wicks,	1 00
5 x 8	Felt Stove Wicks,	67

We use only "The Fletcher" make of Wick, which we have found, from long experience, is the best and most satisfactory in use. While sometimes it is higher in price, it is cheaper in the end than the common Wick, which will not work satisfactorily in the Burners, and frequently has to be thrown away before it is half burned.

Dash Board and Barn Lamps.

Dash Board Attachments.

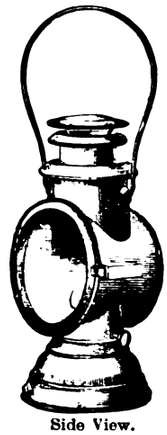

DESCRIPTION.	PER DOZ.
Tin Dash Board Attachment, - - - -	$3 00

Front View.

Side View.

NO.	DESCRIPTION.	EACH.
354	Tubular Driving Lamps, - -	$3 75

For No. 0 Burner, ⅜ inch Wick. Burns Kerosene. Is fitted with 5⅜ Bevel Plate Glass Lens. Throws a strong, powerful light, and will not blow out.

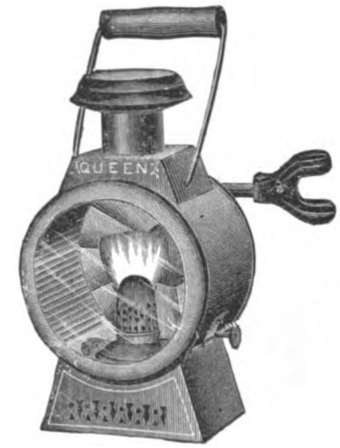

DESCRIPTION.	PER DOZ.
Kenton Lens Attachment, - -	$3 60

Diameter, 4 inches.

To attach the Lens to the Lantern, spring the wire frame over the upright side pieces of the Lantern and see that the center of the Lens is right in front of the flame of the lamp. This gives the proper focus.

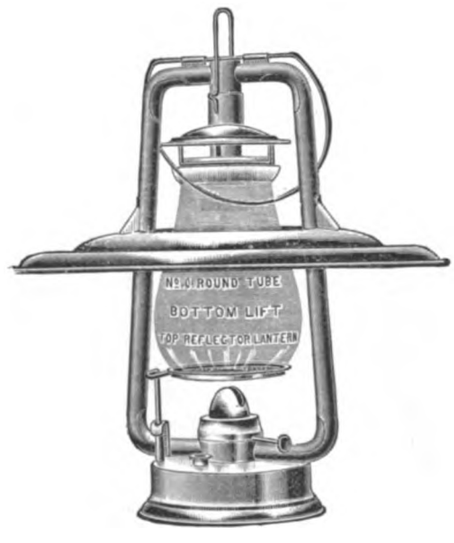

This Lens Attachment is far superior to the old style tin reflectors, as it throws out a much stronger light and will not rust or get out of order.

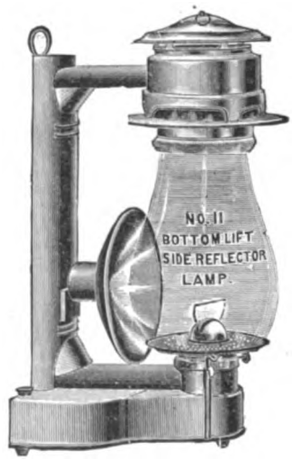

NO.	DESCRIPTION.	PER DOZ.
1	Dash Lamp for Kerosene,	$18 00

NO.	DESCRIPTION.	PER DOZ.
